Trademarks and Social Media Danny Friedmann,2015-09-25 Legal conflicts between trademark holders, social media providers and internet users have become manifest in light of wide scale, unauthorised use of the trademark logo on social media in recent decades. Arguing for the protection of the trademark logo against unauthorised use in a commercial environment, this book explores why protection enforcement should be made automatic. A number of issues are discussed including the scalability of litigation on a case-by-case basis, and whether safe harbour provisions for online service providers should be substituted for strict liability.

The Moral Metaphor System ,2022-07-21 This book investigates moral metaphors in English and Chinese, applying conceptual metaphor theory to a comparative study of the linguistic manifestation of the moral metaphor system rooted in the domains of bodily and physical experience. Ning Yu sheds light on the metaphorical nature of moral cognition and how it is systematically manifested in language, and explores the potential commonalities that define moral cognition in general, as well as the differences that characterize distinct cultures. The work investigates moral cognition at the cultural level as reflected in language, based on linguistic evidence from both English and Chinese and, to a limited extent, multimodal evidence from the corresponding cultures. The moral metaphor system is taken to consist of three major subsystems, referred to as physical, visual, and spatial. These subsystems are clusters of conceptual metaphors, whose source concepts are from domains of embodied experiences in the physical world, and which are formulated in contrastive categories with bipolar values for the target concepts of moral and immoral. The study is characterized by two keywords: system and systematicity: The former refers to the fact that metaphors (conceptual and linguistic) are connected within networks, and the latter to the need for those metaphors to be studied in such networks.

Inventing the World Grant University Steven Fraiberg,Xiqiao Wang,Xiaoye You,2017-11-15 Through an exploration of the literacy practices of undergraduate Chinese international students in the United States and China, Inventing the World Grant University demonstrates the ways in which literacies, mobilities, and transnational identities are constructed and enacted across institutional and geographic borders. Steven Fraiberg, Xiqiao Wang, and Xiaoye You develop a mobile literacies framework for studying undergraduate Chinese international students enrolling at Western institutions, whose numbers have increased in recent years. Focusing on the literacy practices of these students at Michigan State University and at Sinoway International Education Summer School in China, Fraiberg, Wang, and You draw on a range of mobile methods to map the travel of languages, identities, ideologies, pedagogies, literacies, and underground economies across continents. Case studies of administrators', teachers', and students' everyday literacy practices provide insight into the material and social structures shaping and shaped by a globalizing educational landscape. Advocating an expansion of focus from translingualism to transliteracy and from single-site analyses to multi-site approaches, this volume situates local classroom practices in the context of the world grant university. Inventing the World Grant University contributes to scholarship in mobility, literacy, spatial theory, transnationalism, and disciplinary enculturation. It further offers insight into the opportunities and challenges of enacting culturally relevant pedagogies.

The Chinese Story in Global Order Chen Liu,2023-06-29 This book provides a historical review of the transformation of China's image around the world since the 1978 Reform and Opening Up. Based on a synthetic model that the author constructs for evaluating national images, together with a historical review and quantitative analysis, it discusses the issues and challenges confronting China's image around the world since the Opening Up. To help rectify the situation that most of the research on China's reform efforts focuses on hard power (esp. economic power), this book, which mainly focuses on China's soft power, reviews and assesses its global image from the three perspectives of politics, economy and culture. In the process, it sheds valuable new light on the presentation of China's image and the world's perceptions of China.

SEO Management Véronique Duong,2020-01-02 Search Engine Optimization (SEO) is arguably the most significant tool that marketeers have to push online content. As the hub of the computational engineering fields, SEO encompasses technical, editorial and link-building strategies, and is an integral part of our daily lives. As important as it is ubiquitous, SEO is needed for the development of a brands website and online reputation. When a website is live, one of its priorities is to drive organic traffic towards it, in order to attract visibility. In order to achieve such an aim, many proactive measures must be put in place, advice followed and tips implemented. There should also be an understanding of the holistic connection between a websites HTML sources, content management system and its relationship with external websites too (SEO off-site). There are many different search engines in the world and depending on the international boundary, one web browser usually dominates the landscape. Google features prominently in SEO Management, but this book also goes into detail regarding Baidu SEO (China), Yandex SEO (Russia) and Naver SEO (South Korea). There is also guidance given on how to manage a SEO project.

As a premier conference, IBICA–WICT brings together researchers, engineers and practitioners whose work involves bio-inspired computing, computational intelligence and their applications in information security, real-world contexts, etc. Including contributions by authors from 25 countries, the book offers a valuable reference guide for all researchers, students and practitioners in the fields of Computer Science and Engineering.

Mind in Motion Barbara Tversky,2019-05-21 An eminent psychologist offers a major new theory of human cognition: movement, not language, is the foundation of thought When we try to think about how we think, we can't help but think of words. Indeed, some have called language the stuff of thought. But pictures are remembered far better than words, and describing faces, scenes, and events defies words. Anytime you take a shortcut or play chess or basketball or rearrange your furniture in your mind, you've done something remarkable: abstract thinking without words. In Mind in Motion, psychologist Barbara Tversky shows that spatial cognition isn't just a peripheral aspect of thought, but its very foundation, enabling us to draw meaning from our bodies and their actions in the world. Our actions in real space get turned into mental actions on thought, often spouting spontaneously from our bodies as gestures. Spatial thinking underlies creating and using maps, assembling furniture, devising football strategies, designing airports, understanding the flow of people, traffic, water, and ideas. Spatial thinking even underlies the structure and meaning of language: why we say we push ideas forward or tear them apart, why we're feeling up or have grown far apart. Like Thinking, Fast and Slow before it, Mind in Motion gives us a new way to think about how--and where--thinking takes place.

Baidu SEO Véronique Duong,2017-06-29 SEO practices for Baidu and other Chinese search engines are little known in the Western world. However, in order for a company to promote itself successfully in the Middle Kingdom, it is absolutely necessary to go online in China. Chinese SEO is not only about working on the on-site and off-site aspects of a site, there are also many administrative tasks to take into account: the creation of a site in China can pose governmental problems (obtaining a Chinese mobile line, applying for an ICP license, proving that the company is well established in China, etc.) In order for readers to understand how SEO and web-marketing works in China, tips, advice and case studies are presented throughout this book.

Data Augmented Design Ying Long,Enjia Zhang,2020-08-13 This book offers an essential introduction to a new urban planning and design methodology called Data Augmented Design (DAD) and its evolution and progresses, highlighting data driven methods, urban planning and design applications and related theories. The authors draw on many kinds of data, including big, open, and conventional data, and discuss cutting-edge technologies that illustrate DAD as a future oriented design framework in terms of its focus on multi-data, multi-method, multi-stage and multi-scale sustainable urban planning. In four sections and ten chapters, the book presents case studies to address the core concepts of DAD, the first type of applications of DAD that emerged in redevelopment-oriented planning and design, the second type committed to the planning and design for urban expansion, and the future-oriented applications of DAD to advance sustainable technologies and the future structural form of the built environment. The book is geared towards a broad readership, ranging from researchers and students of urban planning, urban design, urban geography, urban economics, and urban sociology, to practitioners in the areas of urban planning and design.

The Evolution of Chinese Popular Music Ya-Hui Cheng,2023-04-14 Ya-Hui Cheng examines the emergence of popular music genres – jazz, rock, and hip-hop – in Chinese society, covering the social underpinnings that shaped the development of popular music in China and Taiwan, from imperialism to westernization and from modernization to globalization. The political sensitivities across the strait have long eclipsed the discussion of these shared sonic intimacies. It was not until the rise of the digital age, when entertainment programs from China and Taiwan reached social media on a global scale, that audiences realized the existence of this sonic reciprocation. Analyzing Chinese pentatonicism and popular songs published from 1927 to the present, this book discusses structural elements in Chinese popular music to show how they aligned closely with Chinese folk traditions. While the influences from Western genres are inevitable under the phenomenon of globalization, Chinese songwriters utilized these Western inspirations to modernize their musical traditions. It is a sensitivity for exhibiting cultural identities that enabled popular music to present a unique Chinese global image while transcending political discord and unifying mass cultures across the strait.
