Beyond Women's Words Katrina Srigley,Stacey Zembrzycki,Franca

Iacovetta,2018-05-01 Beyond Women's Words unites feminist scholars, artists, and community activists working with the stories of women and other historically marginalized subjects to address the contributions and challenges of doing feminist oral history. Feminists who work with oral history methods want to tell stories that matter. They know, too, that the telling of those stories—the processes by which they are generated and recorded, and the different contexts in which they are shared and interpreted—also matters—a lot. Using Sherna Berger Gluck and Daphne Patai's classic text, Women's Words, as a platform to reflect on how feminisms, broadly defined, have influenced, and

continue to influence, the wider field of oral history, this remarkable collection brings together an international, multi-generational, and multidisciplinary line-up of authors whose work highlights the great variety in understandings of, and approaches to, feminist oral histories. Through five thematic sections, the volume considers Indigenous modes of storytelling, feminism in diverse locales around the globe, different theoretical approaches, oral history as performance, digital oral history, and oral history as community-engagement. Beyond Women's Words is ideal for students of oral history, anthropology, public history, women's and gender history, and Women's and Gender Studies, as well as activists, artists, and community-engaged practitioners.

Canadian Organized Crime, Second Edition Stephen Schneider, 2022-07-29 The second edition of Stephen Schneider's highly regarded Canadian Organized Crime provides an introduction to criminal syndicates, organized crimes, and enforcement principles and practices in Canada. This widely informative and accessible new edition continues its comprehensive historical, empirical, and theoretical overview of organized crime in Canada with numerous case studies that make the material vivid and understandable for students. Incorporating new research, recent Canadian cases, and current enforcement structures and laws in Canada, this text will give readers a broad understanding of the social, political, and economic forces that contribute to the continued existence of organized crime in Canada. The text examines new trends and developments that have affected organized crime since the first edition, including the ongoing revolution in digital communications (the internet dark web), the proliferation of cryptocurrency, the opioid epidemic, organized criminality in the time of COVID, the growing power of the

'Ndrangheta in Ontario, the fallout from the implosion of Quebec's Rizzuto mafia family, and the new business model employed by the Hells Angels throughout Canada. This textbook will appeal to students in criminology, sociology, political science, and law and justice programs, criminal justice professionals working in the field of organized crime enforcement, and readers interested in true crime literature.

Telecom Tensions Mike Zajko,2021-05-15 Today's internet service providers mediate communication, control data flow, and influence everyday online interactions. In other words, they have become ideal agents of public policy and instruments of governance. In Telecom Tensions Mike Zajko considers the tensions inherent to this role - between private profits and the public good, competition and cooperation, neutrality and discrimination, surveillance and security - and asks what consequences arise from them. Many understand the internet as a technology that cuts out traditional gatekeepers, but as the importance of internet access has grown, the intermediaries connecting us to it have come to play an increasingly vital role in our lives. Zajko shows how the individuals and organizations that keep these networks running must satisfy a growing number of public policy objectives and contradictory expectations. Analyzing conflicts in Canadian policy since the commercialization of the internet in the 1990s, this book unearths the roots of

contemporary debates by foregrounding the central role of internet service providers. From downtown data centres to publicly funded rural networks, *Telecom Tensions* explores the material infrastructure, power relations, and political aspirations at play. Theoretically informed but grounded in the material realities of people and places, *Telecom Tensions* is a fresh look at the political economy of telecommunications in Canada, updating conversations about liberalization and public access with contemporary debates over privacy, copyright, network neutrality, and cyber security.

Big Data Surveillance and Security Intelligence David Lyon, David Murakami Wood, 2020-12-01 Intelligence gathering is in a state of flux. Enabled by massive computing power, new modes of communications analysis now touch the lives of citizens around the globe – not just those considered suspicious or threatening. *Big Data Surveillance and Security Intelligence* reveals the profound shift to “big data” practices that security agencies have made in recent years, as the increasing volume of information challenges traditional ways of gathering intelligence. In this astute collection, leading academics, civil society experts, and regulators debate the pressing questions this trend raises about civil liberties, human rights, and privacy protection in Canada.

Life Is Like Canadian Football and Other Authentic Folk Songs Henry Adam Svec, 2021-06-10 A grossly inaccurate memoir about Canadian folk legends. Henry Adam

Svec has been pushing boundaries in Canadian folklore since he unearthed songs by CFL players in Library and Archives Canada, thereby thrusting himself into the scene--and the media spotlight. Those spartan poems are finally included in this anthology, in addition to the fruits of his subsequent expeditions, but there is much more besides, including honest accounts of the folklorist's myriad trials and tribulations. This experimental and genre-defying book mixes the adventurous energies of Alan Lomax and Stompin' Tom, the intertextual conceptualism of Vladimir Nabokov and Mark Z. Danielewski, and the searing intensity of Elizabeth Smart and Chris Kraus.

The Perfect Predator Steffanie Strathdee, Thomas Patterson, 2019-02-26 An electrifying memoir of one woman's extraordinary effort to save her husband's life--and the discovery of a forgotten cure that has the potential to save millions more. A memoir that reads like a thriller. -New York Times Book Review A fascinating and terrifying peek into the devastating outcomes of antibiotic misuse--and what happens when standard health care falls short. -Scientific American Epidemiologist Steffanie Strathdee and her husband, psychologist Tom Patterson, were vacationing in Egypt when Tom came down with a stomach bug. What at first seemed like a case of food poisoning quickly turned critical, and by the time Tom had been transferred via emergency medevac to the world-class medical center at UC San Diego, where both he and Steffanie worked, blood work revealed why modern medicine was failing: Tom was fighting one of the most dangerous, antibiotic-resistant bacteria in the world. Frantic, Steffanie combed through research old and new and came across phage therapy: the idea that the right virus, aka the perfect predator, can kill even the most lethal bacteria. Phage treatment had fallen out of favor

almost 100 years ago, after antibiotic use went mainstream. Now, with time running out, Steffanie appealed to phage researchers all over the world for help. She found allies at the FDA, researchers from Texas A&M, and a clandestine Navy biomedical center -- and together they resurrected a forgotten cure. A nail-biting medical mystery, *The Perfect Predator* is a story of love and survival against all odds, and the (re)discovery of a powerful new weapon in the global superbug crisis.

The Bridge in the Parks Dennis G. Molinaro, 2021-07-30 Established in the 1940s, the Five Eyes intelligence network consists of Australia, Britain, Canada, New Zealand, and the United States. The alliance was integral to shaping domestic and international security decisions during the Cold War, yet much of the intelligence history of these countries remains unknown. In *The Bridge in the Parks*, intelligence scholars from across the Five Eyes come together to present case studies detailing the varied successes and struggles their countries experienced in the world of Cold War counter-intelligence. The case studies draw on newly declassified documents on a variety of topics, including civil liberties, agent handling, wiretapping, and international relations. Collectively, these studies highlight how Cold War intelligence history is more nuanced than it has often been portrayed – and much like in the world of intelligence, nothing is ever entirely as it seems.

Digital Politics in Canada Tamara A. Small, Harold J. Jansen, 2020 The increased use of digital politics by citizens, groups, and governments over the last 25 years carried the promise of transforming the way politics and government was practiced. This book looks at Canadian political practice and the reality of the political process against those early promises.
