**La construcción del sujeto robado** Juan Antonio Roche Cárcel,2023-06-13 La reivindicación de las artistas, que va ganando peso a lo largo del siglo XX, especialmente desde su segunda mitad, es el resultado, lógicamente, de la incorporación masiva de la mujer al mundo laboral y, en particular, al campo artístico, y de los procesos de cambios estructurales socioculturales experimentados desde la Revolución Industrial. Así, a partir de la década de los 70 del siglo XX, las mujeres adoptan una postura consciente tanto en la producción artística como en el campo teórico, y en la base se hallan dos procesos intelectuales paralelos: la expansión del movimiento feminista y el deseo de expresar una nueva manera de ver. Sin embargo, a partir de ahora, de lo que se trata es de liberar el cuerpo de la mujer y de transformarlo de objeto de deseo y/o temor en sujeto de goce y dolor, sintiente y pensante. Por consiguiente, se trata también de diferenciar entre la mujer como sujeto del acto artístico (como artista) y como objeto de representación. En el caso de España y de la Comunitat Valenciana, en general, y de Alicante, en particular, y por lo que se refiere al arte producido por mujeres desde 1950, este libro considera que las principales transformaciones por las que han pasado y que constituyen su raíz principal son (1.º) la ruptura con el formalismo; (2.º) la modernización artística y la incorporación al informalismo; (3.º) la incursión en nuevos materiales y soportes; (4.º) la consideración del cuerpo gozoso y sufriente, y (5.º) el multiculturalismo y la globalización. Estos cinco procesos de cambio caracterizan a las artistas de estas tierras valencianas de la segunda mitad del siglo XX y de principios del XXI, pero, a la luz de las investigaciones de historiadores y críticos de arte que se recogen en este libro y de las 24 mujeres seleccionadas, el editor lo ha concretado y agrupado en cuatro apartados: «La interiorización: autonomía y fusión, hibridación y armonía», «El ser humano problemático. Los cuerpos y las emociones como intermediarias», «La naturaleza: fusión y protección» e «Hilos, tramas y urdimbres que cosen y construyen la vida y el mundo».

**Collectives in the Spanish Revolution** Gaston Leval,2018-08-01 Revolutionary Spain came about with an explosion of social change so advanced and sweeping that it remains widely studied as one of the foremost experiments in worker self-management in history. At the heart of this vast foray into toppling entrenched forms of domination and centralised control was the flourishing of an array of worker-run collectives in industry, agriculture, public services, and beyond. *Collectives in the Spanish Revolution* is a unique account of this transformative process—a work combining impeccable research and analysis with lucid reportage. Its author, Gaston Leval, was not only a participant in the Revolution and a dedicated anarcho-syndicalist but an especially knowledgeable eyewitness to the many industrial and agrarian collectives. In documenting the collectives' organisation and how they improved working conditions and increased output, Leval also gave voice to the workers who made them, recording their stories and experiences. At the same time, Leval did not shy away from exploring some of the collectives' failings, often ignored in other accounts of the period, opening space for readers today to critically draw lessons from the Spanish experience with self-managed collectives. The book opens with an insightful examination of pre-revolutionary economic conditions in Spain that gave rise to the worker and peasant initiatives Leval documents and analyses in the bulk of his study. He begins by surveying agrarian collectives in Aragón, Levante, and Castile. Leval then guides the reader through an incredible variety of urban examples of self-organisation, from factories and workshops to medicine, social services, Barcelona's tramway system, and beyond. He concludes with a brief but perceptive consideration of

the broader political context in which workers carried out such a far-reaching revolution in social organisation—and a rumination on who and what was responsible for its defeat. This classic translation of the French original by Vernon Richards is presented in this edition for the first time with an index. A new introduction by Pedro García-Guirao and a preface by Stuart Christie offer a *précis* of Leval's life and methods, placing his landmark study in the context of more recent writing on the Spanish collectives—eloquently positing that Leval's account of collectivism and his assessments of their achievements and failings still have a great deal to teach us today.

**New Perspectives on Applied Industrial Ergonomics** Arturo Realyvásquez Vargas,Jorge Luis García-Alcaraz,Emigdio Z-Flores,2021-06-15 This book reports the most recent, advanced, successful, and real applications of ergonomics in order to improve the human well-being and performance in a short term, as well as the organizational performance in a long term. The book is organized as follows: Physical Ergonomics. This section reports case studies where physical risk factors are presented in the workplace, such as physical risk factors including uncomfortable body postures, repetitive movements, force application, manual material handling, and physical environmental conditions. In addition, case studies must report applications from physical ergonomics methods, for instance, RULA, REBA, OWAS, NIOSH, JSI, Suzane Rodgers, ERIN, among others. Cognitive Ergonomics. This section reports the implementation of ergonomic tools, techniques, and methods in real case studies. These applications are aimed to know, decrease, and control cognitive and psychological risk factors, such as mental workload, information processing, situation awareness, human error identification, and interface analysis. These applications may include the following methods NASA-TLX, SWAT, CWA, SHERPA, HET, TAFEI, SAGAT, SART, SACRI, QUIS, SUMI, to mention a few of them. Macro-ergonomics. This section is focused on the analysis, design, and evaluation of work systems. It reports case studies where risk factors are beyond a specific workstation. These risk factors may include supervision styles, teamwork management, task variety, social relationships, organizational culture, organizational communication, technology, work schedules, and motivation, among others. In addition, case studies report the application of macro-ergonomic methods, such as MOQS, focus group, participatory ergonomics, HITOP, MAS, and MEAD, among others.

**The Human Cost of Food** Charles D. Thompson, Jr.,Melinda F. Wiggins,2009-01-27 Finding fresh fruits and vegetables is as easy as going to the grocery store for most Americans—which makes it all too easy to forget that our food is cultivated, harvested, and packaged by farmworkers who labor for less pay, fewer benefits, and under more dangerous conditions than workers in almost any other sector of the U.S. economy. Seeking to end the public's ignorance and improve workers' living and working conditions,

this book addresses the major factors that affect farmworkers' lives while offering practical strategies for action on farmworker issues. The contributors to this book are all farmworker advocates—student and community activists and farmworkers themselves. Focusing on workers in the Southeast United States, a previously understudied region, they cover a range of issues, from labor organizing, to the rise of agribusiness, to current health, educational, and legal challenges faced by farmworkers. The authors blend coverage of each issue with practical suggestions for working with farmworkers and other advocates to achieve justice in our food system both regionally and nationally.
