Affective Health and Masculinities in South Africa Hans Reihling, 2020-04-03 Affective Health and Masculinities in South Africa explores how different masculinities modulate substance use, interpersonal violence, suicidality, and AIDS as well as recovery cross-culturally. With a focus on three male protagonists living in very distinct urban areas of Cape Town, this comparative ethnography shows that men's struggles to become invulnerable increase vulnerability. Through an analysis of masculinities as social assemblages, the study shows how affective health problems are tied to modern individualism rather than African 'tradition' that has become a cliché in Eurocentric gender studies. Affective health is conceptualized as a balancing act between autonomy and connectivity that after colonialism and apartheid has become compromised through the imperative of self-reliance. This book provides a rare perspective on young men's vulnerability in everyday life that may affect the reader and spark discussion about how masculinities in relationships shape physical and psychological health. Moreover, it shows how men change in the face of distress in ways that may look different than global health and gender-transformative approaches envision. Thick descriptions of actual

events over the life course make the study accessible to both graduate and undergraduate students in the social sciences. Contributing to current debates on mental health and masculinity, this volume will be of interest to scholars from various disciplines including anthropology, gender studies, African studies, psychology, and global health.

Antoine of Oregon : A Story of the Oregon Trail
James Otis, 1912 Antoine of Oregon : A Story of the Oregon Trail The author of this series of stories for children has endeavored simply to show why and how the descendants of the early colonists fought their way through the wilderness in search of new homes. The several narratives deal with the struggles of those adventurous people who forced their way westward, ever westward, whether in hope of gain or in answer to the call of the wild, and who, in so doing, wrote their names with their blood across this country of ours from the Ohio to the Columbia. To excite in the hearts of the young people of this land a desire to know more regarding the building up of this great nation, and at the same time to entertain in such a manner as may stimulate to noble deeds, is the real aim of these stories. In them there is nothing of romance, but only a careful, truthful record of the part played by children in the great battles with those forces, human as well as natural, which, for so long a time, held a vast 4 portion of this broad land against the advance of home seekers. With the knowledge of what has been done by our own people in our own land, surely there is no reason why one should resort to fiction in

order to depict scenes of heroism, daring, and sublime disregard of suffering in nearly every form.

Mastering Islamic Finance: A practical guide to Sharia-compliant banking, investment and insurance Faizal Karbani, 2015-02-19 A practical and accessible guide to Islamic finance that helps demystify the differences with conventional banking, enabling practitioners to develop Sharia compliant products for customers. The Islamic

Finance industry is estimated to be worth \$1.2 trillion and is growing globally at over 10% per year. Mastering Islamic Finance will give practitioners an understanding of Islamic finance, from the basic techniques, through to advanced applications. Helping to demystify and clarify the differences with conventional banking, it will enable practitioners to develop Sharia compliant products for customers. According to Sharia law there are strict rules on how financial services and products can be designed; in Islamic Finance money cannot make money and the subject of the finance must be an asset or a verifiable, real trade or business activity. Sharia compliant financial instruments have been devised to enable Muslims to abide by the principles of Islam and still make the most of their money. Mastering Islamic Finance will equip readers with an understanding of Islamic financial instruments so they can sensibly apply them in practice. For each instrument there is a definition of the concept and how it differs from its equivalent in conventional banking. There are also examples and case studies to highlight practical applications. society? Are some research methods more successful at bringing about change than others? Contributors to this volume discuss principles of feminist inquiry, providing examples from their own experience and evaluating research practices for their potential to promote social change. The twelve chapters cover methodologies including ethnographic study, in-depth interviewing, naming, and going public. Love in Case of Emergency Daniela

Krien, 2021-04-06 Fans of Sarah Dunn, Elisabeth Egan, and Isabel Gillies will relate to the multifaceted lives of Krien's characters, brilliantly rendered in her vivid voice. -- Booklist Writing with the wry realism of Sally Rooney, one of Germany's most promising literary talents demonstrates her incisive understanding of the complexities of relationships and the depths of the human heart in this witty and compulsively readable novel about five very different women whose lives intersect. What happens when women fulfill their roles as wives, mothers, friends, lovers, sisters, and daughters? What comes next? Award-winning author Daniela Krien explores these questions in this powerful novel of friendship, love, loss, and everything in between. Krien explores the hopes, ambitions, challenges, and disappointments that shape modern women's lives, offering intimate insights on motherhood and childlessness, bereavement, infidelity, and divorce. At the heart of the novel are five very

different women who find themselves hurtling towards a new way of living without knowing quite how they got there. A fresh take on women's lives, *Love in Case of Emergency* is a punchy yet sensitive novel that takes the notion of aspiring to find happiness and connection to new and exhilarating heights. Translated from the German by Jamie Bulloch

Communicating Process Architectures 2009 P. H. Welch, 2009 This book is a collection of the papers presented at the 32nd Communicating Process Architecture conference (CPA), held at the Technical University Eindhoven, the Netherlands, from the 1st to the 4th of November 2009.

Concurrency is a fundamental mechanism of the universe, existing in all structures and at all levels of granularity. To be useful in this universe, any computer system has to model and reflect an appropriate level of abstraction. For simplicity, therefore, the system needs to be concurrent - so that this modeling is obvious and correct. Today, the commercial reality of multicore processors means that concurrency issues can no longer be ducked if applications are going to be able to exploit more than an ever-diminishing fraction of their power. This is a second, but very forceful, reason to take this subject seriously. We need theory and programming technology that turns this around and makes concurrency an elementary part of the everyday toolkit of every software engineer. This is what these proceedings are all about. Subjects covered in this volume include: system design and implementation for both hardware and software;

tools for concurrent programming languages, libraries and run-time kernels; and formal methods and applications.--
