Government Impact on Sustainable and Responsible Supply Chain Management Taghipour, Atour, 2023-07-19 A supply chain comprises different actors existing in different countries, including suppliers, producers, and customers. Clothes are supplied from Asia to all other regions; most coffee beans are supplied from South America; and cocoa is produced in Africa. Protecting the rights of people who produce goods in different countries is essential. In fact, according to this evolutionary law, companies need to identify, analyze, and prioritize the risks in their supply chains, and new policies must be established based on these results. New measures are taken to prevent or minimize violations of human rights and damage to the environment. Companies also need to set up grievance channels for people in the supply chains for regular reporting on supply chain practices. The German Supply Chain Act gives consumers the security that companies are managed based on fair production, and many similar legislations are likely to follow in other nations. Businesses around the world must prepare for these types of policies to impact their own supply chain management strategy before they are enforced if they wish to avoid revenue-impacting delays. Government Impact on Sustainable and Responsible Supply Chain Management is edited by Atour Taghipour, with about a decade of experience as a director in Automobile and High-Tech Industries, provides new and innovative ways to integrate social and environmental analysis into global value chains and adapt the law that regulates corporate responsibility for the observance of sustainability and human rights in the supply chain. This book is ideal for professionals and researchers working in governmental and private organizations in supply chain management, operations management, logistics, and operations research. Moreover, the book provides insights and support for executives

in managing expertise, knowledge, information, and organizational development in different work communities and environments.

Domestic Regulation and Service Trade Liberalization Pierre Sauve, Aaditya Mattoo, 2003-08-29 Trade in services, far more than trade in goods, is affected by a variety of domestic regulations, ranging from qualification and licensing requirements in professional services to pro-competitive regulation in telecommunications services. Experience shows that the quality of regulation strongly influences the consequences of trade liberalization. WTO members have agreed that a central task in the ongoing services negotiations will be to develop a set of rules to ensure that domestic regulations support rather than impede trade liberalization. Since these rules are bound to have a profound impact on the evolution of policy, particularly in developing countries, it is important that they be conducive to economically rational policy-making. This book addresses two central questions: What impact can international trade rules on services have on the exercise of domestic regulatory sovereignty? And how can services negotiations be harnessed to promote and consolidate domestic policy reform across highly diverse sectors? The book, with contributions from several of the world's leading experts in the field, explores a range of rule-making challenges arising at this policy interface, in areas such as transparency, standards and the adoption of a necessity test for services trade. Contributions also provide an in-depth look at these issues in the key areas of

accountancy, energy, finance, health, telecommunications and transportation services.
