Several Short Sentences About Writing Verlyn Klinkenborg, 2013-04-09 An indispensable and distinctive book that will help anyone who wants to write, write better, or have a clearer understanding of what it means for them to be writing, from widely admired writer and teacher Verlyn Klinkenborg. Klinkenborg believes that most of our received wisdom about how writing works is not only wrong but an obstacle to our ability to write. In *Several Short Sentences About Writing*, he sets out to help us unlearn that “wisdom”—about genius, about creativity, about writer’s block, topic sentences, and outline—and understand that writing is just as much about thinking, noticing, and learning what it means to be involved in the act of writing. There is no gospel, no orthodoxy, no dogma in this book. Instead it is a gathering of starting points in a journey toward lively, lucid, satisfying self-expression.

Humans in Outer Space - Interdisciplinary Odysseys Luca Codignola-Bo, Kai-Uwe Schrogl, 2010-10-28 Humans and space When faced with the issue of space exploration, one generally has an idea of the fields of study and disciplines that are involved: technology, physics and chemistry, robotics, astronomy and planetary science, space biology and medicine, disciplines which are usually referred to as the “sciences”. In recent discussions, the human element of space exploration has attracted more and more the interest of the space sciences. As a consequence, adjacent disciplines have gained in relevance in space exploration and space research, in times when human space “rights” are almost part of everyday life. These disciplines include psychology and sociology, but also history, philosophy, anthropology, cultural studies, political sciences and law. The contribution of knowledge in these fields plays an important role in achieving the next generation of space exploration, where humans will resume exploring the Moon and, eventually, Mars, and where space tourism

is beginning to be developed. With regard to technology, one might soon be prepared for this. Much less is this the case with space exploration by humans, rather than by robots. Robotic explorations to other planets across the solar system have developed in the past 50 years, since the beginning of the 'space age' with the presence of humans in nearby space and the landing on the Moon. Space exploration is now not only focused on technological achievements, as its development also has social, cultural and economic impacts. This makes human space exploration a topic to address in a cross-disciplinary manner.

Democracy and Globalization Josep M. Colomer, Ashley L. Beale, 2020-06-02 As democracy is disrupted by globalization, the solution is to globalize democracy. This book explores the causes of the current crisis of democracy and advocates new ways for more representative, effective, and accountable governance in an interdependent world. Part 1 analyzes the split of the middle class and the subsequent political polarization which underlies people's dissatisfaction with the way democracy works in developed countries. It also addresses the role of political emotions, including disappointments about unmet expectations, anger incited from opposition candidates, fear induced

from government, and hope wrapping up new proposals for reform and change. In Part 2, the authors argue that a more effective governance would require reallocations of power at local, national, continental and global levels with innovative combinations of direct democracy, representative government, and rule by experts. This book will be of interest to students and scholars of political science, comparative politics, international relations, political economy and democratic theory, as well as general readers interested in politics and current events.

Fundamental Questions in Astrophysics: Guidelines for Future UV Observatories Ana I. Gómez de Castro, Willem Wamsteker, 2007-01-30 Modern astrophysics has evolved early phases of discovery and classification to a physics-oriented quest for answers to fundamental problems from cosmology to the origin and diversity of life-sustainable systems in the Universe. Future progress in modern astrophysics requires access to the electromagnetic spectrum in the broadest energy range. This book describes the fundamental problems in modern astrophysics that cannot progress without easy and wide-spread access to modern UV instrumentation.

Timothy Verlyn Klinkenborg, 2006 Timothy, a tortoise who lived in the garden of eighteenth-century curate Gilbert White, speaks out on his life in the garden, his nine-day adventure outside the gate, his observations of the curious habits and habitations of humans, and the natural world around him. 30,000 first printing.

The Rural Life Verlyn Klinkenborg, 2007-09-03 The hugely admired author of *The Last Fine Time* preserves and makes new the sights, smells, sounds, and poetry of country living. Klinkenborg reveals the beauty of the American landscape, not from a scenic overlook, but through a screened-in porch or from the window of a pickup driving down an empty highway in the teeth of an approaching storm.

Thick Tressie McMillan Cottom, 2018-01-08 FINALIST FOR THE 2019 NATIONAL BOOK AWARD Named a notable book of 2019 by the New York Times Book Review, Chicago Tribune, Time, and The Guardian As featured by The Daily Show, NPR, PBS, CBC, Time, VIBE, Entertainment Weekly, Well-Read Black Girl, and Chris Hayes, incisive, witty, and provocative essays (Publishers Weekly) by one

of the most bracing thinkers on race, gender, and capitalism of our time (Rebecca Traister) “Thick is sure to become a classic.” —The New York Times Book Review In eight highly praised treatises on beauty, media, money, and more, Tressie McMillan Cottom—award-winning professor and acclaimed author of *Lower Ed*—is unapologetically thick: deemed thick where I should have been thin, more where I should have been less, McMillan Cottom refuses to shy away from blending the personal with the political, from bringing her full self and voice to the fore of her analytical work. Thick transforms narrative moments into analyses of whiteness, black misogyny, and status-signaling as means of survival for black women (Los Angeles Review of Books) with writing that is as deft as it is amusing (Darnell L. Moore). This transgressive, provocative, and brilliant (Roxane Gay) collection cements McMillan Cottom's position as a public thinker capable of shedding new light on what the personal essay can do. She turns her chosen form into a showcase for her critical dexterity, investigating everything from Saturday Night Live, LinkedIn, and BBQ Becky to sexual violence, infant mortality, and Trump rallies. Collected in an indispensable volume that speaks to the everywoman and the erudite alike, these unforgettable essays never fail to be painfully honest and gloriously affirming and hold a mirror to your soul and to that of America (Dorothy Roberts).

A Question and Answer Guide to Astronomy Carol Christian, Jean-René Roy, 2017-03-23 Are we alone in the Universe? Was there anything before the Big Bang? Are there other universes? What makes stars shine? Where does Earth's water come from? Why is the night sky dark? Was there ever life on Mars? How do telescopes work? This engaging guide book answers all these questions and hundreds more, making it a practical reference for anyone who has ever wondered what is out in the cosmos, where it all comes from, and how it all works. Richly illustrated in color throughout, it gives simple yet rigorous explanations in non-technical language, summarizing current astronomical

knowledge, without overlooking the important underlying scientific principles. This second edition includes substantial new material throughout, including the latest findings from the New Horizons, Rosetta, and Dawn space missions, and images from professional telescopes such as the Hubble Space Telescope and the Atacama Large Millimeter Array.

The Last Fine Time Verlyn Klinkenborg, 2004-04 By turns, an elegy, a celebration, and a social history, *The Last Fine Time* is a tour de force of lyrical style. Verlyn Klinkenborg chronicles the life of a family-owned restaurant in Buffalo, New York, from its days as a prewar Polish tavern to its reincarnation as George & Eddie's, a swank nightspot serving highballs and French-fried shrimp to a generation of optimistic and prosperous Americans. In the inevitable dimming of the neon sign outside the restaurant, we see both the passing of an old world way of life and the end to the postwar exuberance that was Eddie Wenzek's last fine time.

Fathoms Rebecca Giggs, 2020-07-28 Winner of the 2020 Andrew Carnegie Medal for Excellence in Nonfiction * Finalist for the 2020 Kirkus Prize for Nonfiction * Finalist for the PEN/E.O. Wilson Literary Science Writing Award A “delving, haunted, and poetic debut” (The New York Times Book Review) about the awe-inspiring lives of whales, revealing what they can teach us about ourselves, our planet, and our relationship with other species. When writer Rebecca Giggs encountered a humpback whale stranded on her local beachfront in Australia, she began to wonder how the lives of whales reflect the condition of our oceans. *Fathoms: The World in the Whale* is “a work of bright and careful genius” (Robert Moor, New York Times bestselling author of *On Trails*), one that blends natural history, philosophy, and science to explore: How do whales experience ecological change? How has whale culture been both understood and changed by human technology? What can observing whales

teach us about the complexity, splendor, and fragility of life on earth? In *Fathoms*, we learn about whales so rare they have never been named, whale songs that sweep across hemispheres in annual waves of popularity, and whales that have modified the chemical composition of our planet's atmosphere. We travel to Japan to board the ships that hunt whales and delve into the deepest seas to discover how plastic pollution pervades our earth's undersea environment. With the immediacy of Rachel Carson and the lush prose of Annie Dillard, Giggs gives us a "masterly" (*The New Yorker*) exploration of the natural world even as she addresses what it means to write about nature at a time of environmental crisis. With depth and clarity, she outlines the challenges we face as we attempt to understand the perspectives of other living beings, and our own place on an evolving planet. Evocative and inspiring, *Fathoms* "immediately earns its place in the pantheon of classics of the new golden age of environmental writing" (*Literary Hub*).
