**Destination Normandy** G. H. Bennett, 2009-04-20 A cross-section of the American experience on D-Day Unique perspective from the regimental level that also integrates strategic and tactical considerations Stories of largely forgotten acts of valor G. H. Bennett collects oral histories from the soldiers of three American regiments and weaves them into an intimate account of the D-Day invasion of June 6, 1944. Widely scattered during its drop into Normandy, the 507th Parachute Infantry Regiment (82nd Airborne Division) stopped the advance of an SS division. The untested 116th Infantry Regiment (29th Infantry Division) landed on bloody Omaha Beach, where it suffered more

casualties than any other regiment that day. Meanwhile, the 22nd Infantry Regiment (4th Infantry Division) easily waded ashore on Utah Beach but faced savage fighting as it moved inland.

*Nonmetallic Materials and Composites at Low Temperature* G. Hartwig, D. Evans, ICMC Symposium, 2012-12-06 This, the second special topical conference on the properties of Non-Metallic Materials at Low Temperatures, was sponsored by the International Cryogenic Materials Conference Board. The potential for plastics materials in the field of cryogenics is vast and as yet only partly explored. In addition, many other materials, which qualify for the title non-metallic but are not 'plastics', have numerous possible outlets in low temperature technology. This conference aimed at providing a forum, whereby specialists from Industry, the Universities and from Government sponsored Institutions could assemble to discuss the extent of our current knowledge. As it transpired, the meeting was also to highlight the considerable gaps that still exist in our fundamental understanding of the low temperature behaviour of these materials. On this theme, during the course of the conference, a reference was made to an almost forgotten quotation by Lord Kelvin, who said: When you cannot measure what you are speaking about, when you cannot express in numbers, your knowledge is of a meagre and unsatisfactory kind; it may be the beginning of knowledge, but you have scarcely in your thoughts advanced to the stage of a science, whatever the

matter be. This simple statement sums up the aims, objectives and hopefully the achievements of this conference. To discuss and disseminate the current knowledge on non-metallic materials in order that realistic predictions of in-service performance may be made.

*On Film* Stephen Mulhall, 2008-03-25 In this significantly expanded new edition of his acclaimed exploration of the four Alien movies,

Stephen Mulhall adds several new chapters on Steven Spielberg's Mission: Impossible trilogy and Minority Report. The first part of the book discusses the four Alien movies. Mulhall argues that the sexual significance of the aliens themselves, and of Ripley's resistance to them, takes us deep into the question of what it is to be human. At the heart of the book is a highly original and controversial argument that films themselves can philosophize. Mulhall then applies his interpretative model to another sequence of contemporary Hollywood movies: the Mission: Impossible series. A brand new chapter is devoted to each of the three films in the series, and to other films by the relevant directors that cast light on their individual contribution to it. In this discussion, the nature of television becomes as central a concern as the nature of cinema; and the shift in generic focus from science fiction to thriller also makes room for a detailed reading of Spielberg's Minority Report. On Film, Second Edition is essential reading for anyone interested in philosophy, film theory and cultural studies, and in the way philosophy can enrich our understanding of cinema.

**Transaction Processing** Jim Gray, Andreas Reuter, 1992-09-30 The key to client/server computing. Transaction processing techniques are deeply ingrained in the fields of databases and operating systems and are used to monitor, control and update information in modern computer systems. This book will show you how large, distributed, heterogeneous computer systems can be made to work reliably. Using transactions as a unifying conceptual framework, the authors show how to build high-performance distributed systems and high-availability applications with finite budgets and risk. The authors provide detailed explanations of why various problems occur as well as practical, usable techniques for their solution. Throughout the book, examples and techniques are drawn from the most successful commercial and research systems. Extensive use of

compilable C code fragments demonstrates the many transaction processing algorithms presented in the book. The book will be valuable to anyone interested in implementing distributed systems or client/server architectures.

**Improvement** Andreas Riel, Rory O'Connor, Serge Tichkiewitch, Richard Messnarz, 2010-08-19 A typical characterization of EuroSPI is reflected in a statement made by a company: ". . . the biggest value of EuroSPI lies in its function as a European knowledge and experience exchange mechanism for SPI and innovation. " Since its beginning in 1994 in Dublin, the EuroSPI initiative has outlined that there is not a single silver bullet to solve SPI issues, but that you need to understand a combination of different SPI methods and approaches to achieve concrete benefits. Therefore each proceedings volume covers a variety of different topics, and at the conference we discuss potential synergies and the combined use of such methods and approaches. These proceedings contain selected research papers for five topics: Section I: SPI Tools Section II: SPI Methods Section III: SPI in SMEs Section IV: Economic Aspects of SPI Section V: The Future of

SPI Section I presents studies on SPI tools. The authors provide an insight into new tools which can be used for SPI. Willem Bekkers et al. present a new assessment method and tool for software product management. Ismael Edrei-Espinosa-Curiel et al. illustrate a graphical approach to support the teaching of SPI. Paul Clarke and coworkers deal with an analysis and a tool to help real adoption of standards like ISO 12207 and they focus on SPI implementation and practices. Esparanca Amengual et al. present a new team-based assessment method and tool.

**Eros Plus Massacre** David Desser,1988-05-22 The decade of the 1960s encompassed a New Wave of films whose makers were rebels, challenging cinematic traditions and the culture at large. The films of the New Wave in Japan have, until now, been largely overlooked. *Eros plus Massacre* (taking its title from a 1969 Yoshida Yoshishige film) is the first major study devoted to the examination and explanation of Japanese New Wave film. Desser organizes his volume around the defining motifs of the New Wave. Chapters examine in depth such themes as youth, identity, sexuality, and women, as they are revealed in the Japanese film of the sixties. Desser's research in Japanese film archives, his interviews with major figures of the movement, and his keen insight into Japanese culture combine to offer a solid and balanced analysis of films by Oshima, Shinoda, Imamura, Yoshida, Suzuki, and others.
