Ask Beardeners Bill Frindall, 2010-06-30 What is the highest number of runs a player has scored in Test matches without ever being dismissed? Did P. G. Wodehouse name Bertie Wooster's valet, Jeeves, after a county cricketer? Why is Ashley Giles known as the 'King of Spain'? Who scored the 1,000th century in Test cricket? No one knew and loved, cricket quite like Bill Frindall - his passion and his encyclopaedic knowledge of the game was evident as soon as he took over scoring for Test Match Special in 1966, a post he held until his death in 2009. In 2001, he began offering his cricket expertise through a column on the Test Match Special website, 'Ask Beardeners'. Fans would write in with the most difficult and arcane questions possible, hoping to 'Stump the Bearded Wonder'. They never did. Ask Beardeners collects the best of the Q & As from Bill's popular column, offering cricket fans a one-stop compendium of the most challenging bits of history and statistics the game has to offer. It is a unique testament to the perfection Bill sought in his study of the game, and an essential book for any serious cricket fan

It saw the decimation of the ruling Congress party, a spectacular victory for the BJP and a new style of campaigning that broke every rule in the political game. But how and why? In his riveting book, Rajdeep Sardesai tracks the story of this pivotal election through all the key players and the big news stories. Beginning with 2012, when Narendra Modi won the state elections in Gujarat for a third time but set his sights on a bigger prize, to the scandals that crippled Manmohan Singh and UPA-II, and moving to the back-room strategies of Team Modi, the extraordinary missteps of Rahul Gandhi and the political dramas of election year, he draws a panoramic picture of the year that changed India.

Duckworth Lewis Frank Duckworth,Tony Lewis,2011 Name cricket's most famous partnership nowadays and you can forget Hobbs and Sutcliffe, Statham and Trueman or Lillee and Thomson. Instead you have to turn to Duckworth and Lewis, the two statisticians who brought order to the one-day game when rain interfered. These days almost every weather-truncated one-day match throughout the world is decided by the Duckworth Lewis method; this book tells the story behind it; how it came into being and how the two were sometimes pilloried in the media after commentators and correspondents failed to understand the logic behind it. Mathematicians and keen cricket fans, Frank Duckworth, editor of RSS News, the monthly magazine of the Royal Statistical Society, and Tony Lewis, retired university lecturer in mathematical subjects, grew up within a few miles of each other in West Lancashire although they didn't know one another – indeed they had planned to call their formula the 'Lancastrian' method. The book sets out why the method was needed and gives a full explanation of how it works. Although a computer program is needed for top games, those at a lesser level can still use the tables in the book. But the book also shows the human side of the story, how they persuaded the cricket authorities to accept their method; the mistakes they made along the way and how they corrected them; the way they developed it to take account of changes in the way the game is played, and how they coped with increasing fame. Most of all it tells how two mathematicians were able to blend their separate skills to succeed in selling a mathematical product to a non-mathematical public. The duo became so well known that they had a racehorse named after them and then a pop group, although they have a much more famous connection with the world of music than the group The Duckworth Lewis Method: when a student at Liverpool University in the early 1960s Frank Duckworth lodged with Aunt Mimi, the woman who brought up her nephew John Lennon!

There Plant Eyes M. Leona Godin, 2021-06-01 From Homer to Helen Keller, from Dune to Stevie Wonder, from the invention of braille to the science of echolocation, M. Leona Godin explores the fascinating history of blindness, interweaving it with her own story of gradually losing her sight. “[A] thought-provoking mixture of criticism, memoir, and advocacy. —The New Yorker There Plant Eyes probes the ways in which blindness has shaped our ocularcentric culture, challenging deeply ingrained ideas about what it means to be “blind.” For millennia, blindness has been used to signify such things as thoughtlessness (“blind faith”), irrationality (“blind rage”), and unconsciousness (“blind evolution”). But at the same time, blind people have been othered as the recipients of special powers as compensation for lost sight (from the poetic gifts of John Milton to the heightened senses of the comic book hero Daredevil). Godin—who began losing her vision at age ten—illuminates the often-surprising history of both the condition of blindness and the myths and ideas that have grown up around it over the course of generations. She combines an analysis of blindness in art and culture (from King Lear to Star Wars) with a study of the science of blindness and key developments in accessibility (the white cane, embossed printing, digital technology) to

paint a vivid personal and cultural history. A genre-defying work, *There Plant Eyes* reveals just how essential blindness and vision are to humanity's understanding of itself and the world.

Born at the Right Time Ron McCallum, 2019-07-01 Blind since birth, Ron regards himself as fortunate to have been born at a time when ever improving technology has enabled him to live a rich and full life, and to become a professor of law at one of Australia's most prestigious universities. Ron McCallum has been blind from birth. When he was a child, many blind people spent their lives making baskets in sheltered workshops, but Ron's mother had other ideas for her son. She insisted on treating him as normally as possible. In this endearing memoir, Ron recounts his social awkwardness and physical mishaps, and shares his early fears that he might never manage to have a proper career, find love or become a parent. He has achieved all this and more, becoming a professor of law at a prestigious university, and chairing a committee at the United Nations. Ron's glass is always half full. He has taken advantage of every new assistive technology and is in awe of what is now available to allow him and other blind people to realise their potential. His is a life richly lived, by a man who remains open to all people from all walks of life. 'Ron McCallum's life story is both fascinating and inspiring.' - Julian Morrow, *The Chaser* 'A moving book on the life of a brilliant man who often saw the needs of our world more clearly than the sighted people around him.' - The Hon Michael Kirby AC CMG, Past Justice of the High Court of Australia 'In this warm, wise and witty memoir, he makes us see his remarkable life.' Deborah Glass OBE, Victorian Ombudsman 'Ron has lived through a period of major changes in society, technology and the lives of people with disabilities. His description of his life full of challenges and his many successes is inspiring.' Maryanne Diamond AO, former President of the World Blind Union
