Rising Sun, Falling Skies Jeffrey Cox, 2014-03-20
Author Jeffrey Cox conducts a thorough and
compelling investigation of the Java Sea Campaign,
the first major seabattle of the Pacific War,
which inflicted huge costs on the Allies and set
the stage for Japan's rout across the Pacific and
Indian oceans. Few events have ever shaken a
country in the way that the Japanese attack on
Pearl Harbor affected the United States. The
Japanese forces then continued to overwhelm the
Allies, attacking Malaya with its fortress of
Singapore, and taking resource-rich islands in the
Pacific in their own blitzkrieg offensive. Allied
losses in these early months after America's entry
into the war were great, and among the most

devastating were those suffered during the Java Sea Campaign, where a small group of Americans, British, Dutch, and Australians were isolated in the Far East - directly in the path of the Japanese onslaught. It would be the first major sea battle of World War II in the Pacific.

Setting Up a Weather Station and Understanding the Weather Roger Brugge,2016-07-31 This fascinating and well-illustrated book, which is packed with valuable information and advice, provides a complete guide to observing, recording and understanding the weather and to setting up an amateur weather station. As the author explains, the advent of relatively modern electronic weather sensors means that weather observing is now within the reach of almost everybody. Moreover, thanks to computer software and the internet, it is easier than ever before to record and share with others your weather data and observations. The book considers why it is useful and interesting to set up a weather station and observe the weather, and outlines many different types of weather. It explains how to get started and describes the instruments that are available to the amateur meteorologist. It further demonstrates how good observations can be made using some simple instruments, or, in some instances, no instruments at all. It discusses clouds, snow, wind, optical phenomena, thunder dust, ash and hail and examines atmospheric pressure, precipitation, thermometer screens, air temperature and humidity, soil and surface temperatures and evaporation. It covers sunshine and solar radiation, and also local weather and climate and includes a valuable chapter on instrument and computer software suppliers. Essential reading for all those with an

interest in observing and understanding the weather, and superbly illustrated with 132 colour photographs and 20 charts & graphs.
