Edward Friedman

Disaster Research Rasmus Dahlberg, Olivier Rubin, Morten Thanning
Vendelø, 2015-09-07 Given the tendency of books on disasters to predominantly focus on strong geophysical or descriptive perspectives and in-depth accounts of particular catastrophes, *Disaster Research* provides a much-needed multidisciplinary perspective of the area. This book is structured thematically around key approaches to disaster research from a range of different, but often complementary academic disciplines. Each chapter presents distinct approaches to disaster research that is anchored in a particular discipline; ranging from the law of disasters and disaster historiography to disaster politics and anthropology of disaster. The methodological and theoretical contributions underlining a specific approach to disasters are discussed and illustrative empirical cases are examined that support and further inform the proposed approach to disaster research. The book thus provides unique insights into fourteen state-of-the-art disciplinary approaches to the understanding of disasters. The theoretical discussions as well as the diverse range of disaster cases should be of interest to both postgraduate and undergraduate students, as well as academics, researchers and policymakers.

A Life Less Ordinary John Hodge, 1997 He's a down-on-his-luck janitor with aspirations of writing the great American trash novel. She's the spoiled, sharp-tongued boss's daughter, always looking for a creative way to spice up her boring life. Normally, these two would never meet, but a higher power has different plans for both of them. The major motion picture from 20th Century Fox starring Ewan McGregor, Cameron Diaz and Holly Hunter hits the box office in October.

The Disaster Experts Scott Gabriel Knowles, 2012-07-02 In the wake of 9/11 and Hurricane Katrina, many are asking what, if anything, can be done to prevent large-scale disasters. How is it that we know more about the hazards of modern American life than ever before, yet the nation faces ever-increasing losses from such events? History shows that disasters are not simply random acts. Where is the logic in creating an elaborate set of fire codes for buildings, and then allowing structures like the Twin Towers—tall, impressive, and risky—to go up as design experiments? Why prepare for terrorist attacks above all else when floods, fires, and earthquakes pose far more consistent threats to American life and prosperity? *The Disaster Experts* takes on these questions, offering historical context for understanding who the experts are that influence these decisions, how they became powerful, and why they are only slightly closer today than a decade ago to protecting the public from disasters. Tracing the intertwined development of disaster expertise, public policy, and urbanization over the past century, historian Scott Gabriel Knowles tells the fascinating story of how this diverse collection of professionals—insurance inspectors, engineers, scientists, journalists, public officials, civil defense planners, and emergency managers—emerged as the authorities on risk and disaster and, in the process, shaped modern America.

Appropriating the Weather Robert Marc Friedman, 2018-07-05 In this book, Robert Marc Friedman analyzes the revolution in the theory and practice of meteorology during the first quarter of the twentieth century, initiated by Vilhelm Bjerknes (1862-1951) and his collaborators. In contrast to the approach that had dominated meteorology since the late nineteenth century, their weather models and forecasting techniques marked a decisive turn to a dynamical-physical understanding of the atmosphere. Using a wide range of sources, both published and unpublished, Friedman traces the emergence of the new, so-called Bergen methodology and the process by which it transformed first Norwegian and then worldwide weather forecasting. The establishment of the new meteorology, he argues, was the result of a complex interaction of scientific, social, and technological factors, and he gives special emphasis to the way in which Bjerknes adapted his mechanical physics of the atmosphere

to benefit commercial purposes. By providing more reliable forecasts for farmers, fishermen, and especially for aviators, Bjerknes was able to nurture a school of disciples that could exert a profound influence on the international meteorological community, thereby increasing his own authority and that of the discipline he sought to shape. Friedman does an unusually subtle job of integrating the often opposing methods of the history and the sociology of science. He explains in detail how Bjerknes, a theoretical physicist, and his collaborators developed a new model of cyclone evolution and the first clear physical explanation of how weather happens. At the same time, Friedman demonstrates how conceptual change was interconnected with the Bergen school's striving to obtain political support at home and to dominate professional meteorology abroad. Appropriating the Weather is an invaluable contribution to our understanding of the processes in which scientific, institutional, and social factors interact to form scientific disciplines. It deserves wide readership among historians and sociologists of science and science policy makers, as well as meteorologists and other geophysical scientists. Winner of the Louis J. Battan Author's Award (American Meteorological Society) Winner of the Jehuda Neumann Memorial Prize for History (Royal Meteorological Society) One of eight classics of 20th-century continental European history of science (Isis, History of Science Society)

The Rise of Modern Japan William G. Beasley, 2001 This book covers the history of Japan from the mid-19th century up to the present day. It charts the spectacular rise of a society which leapt in little more than a generation from late feudal to early industrial forms of organisation - an exceptionally disturbing experience for the Japanese as they left behind the traditional and Asian and moved towards the modern and Western. It examines the violent thirties and an Empire won and lost between 1937 and 1945, and investigates the major changes after 1945, including the astonishing economic growth achieved since the 1950s.

China's Rise, Taiwan's Dilemma's and International Peace Edward Friedman, 2006-03-13 If we are to believe the media then a war between China and Taiwan is inevitable. Incorporating interviews, archives and original research, this book examines the troubled relationship between China, Taiwan and the US, bringing Taiwanese views on identity politics to the forefront of the discussion. Centering on the primary issues facing Taiwan, China and the US, the book analyzes Taiwan's need to prevent China's rule suffocating their cherished democracy. It questions whether China will pursue military force to achieve political and economic dominance over Taiwan, and how the US proposes to maintain peace between these two countries to ensure both a continuation of democracy in Taiwan and good relations with China. In highlighting these issues, the book seeks to offer practical policy alternatives that could help to advance the cause of freedom and international peace. Featuring chapters from an international group of academics, the book makes a valuable edition to the understanding of Taiwan-China relations within an international

context.

Together We Equip Jody Dean, Hal Stewart, 2018-02-23 In *Together We Equip*, you will discover the biblical foundation for equipping others. Equipping others in ministry is a process you bring with you as the leader! Its both personal and public. Its you as an individual and your church. This book will challenge you to take responsibility to grow spiritually, engage the culture, and share the gospel. Further, you will discover the impact of discipleship in the local church by examining mentoring small groups and preaching as relevant means to equip others. In the later chapters of the book, seasoned church ministry leaders with years of experience in making disciples through equipping ministry of the local church share many practical ways to equip others and lead church ministries: childrens ministry youth ministry collegiate ministry mens and womens ministry adult and senior adult ministries. Many ministry leaders do not know how to make disciples. They know, accept, and believe the Great Commission (Matt. 28: 19-20). Yet they struggle with practical approaches and methods to carry out a viable equipping ministry. The book will help you elevate the importance of personal growth, making disciples, and assist you to align your age-graded and gender-based ministry leadership development.
