iBrain Dr. Gary Small,Gigi Vorgan,2009-10-06 Their insights are extraordinary, their behaviors unusual. Their brains—shaped by the era of microprocessors, access to limitless information, and 24-hour news and communication—are remapping, retooling, and evolving. They're not superhuman. They're your twenty-something coworkers, your children, and your competition. Are you keeping up? In iBrain, Dr. Gary Small, one of America's leading neuroscientists and experts on brain function and behavior, explores how technology's unstoppable march forward has altered the way young minds develop, function, and interpret information. iBrain reveals a new evolution catalyzed by technological advancement and its future implications: Where do you fit in on the evolutionary chain? What are the professional, social, and political impacts of this new brain evolution? How must you adapt and at what price? While high-tech immersion can accelerate learning and boost creativity, it also has its glitches, among them the meteoric rise in ADD diagnoses, increased social isolation, and Internet addiction. To compete and thrive in the age of brain evolution, and to avoid these potential drawbacks, we must adapt, and iBrain—with its Technology Toolkit—equips all of us with the tools and strategies needed to close the brain gap.

What Mother Never Told Me Donna Hill,2010-03-01 Raised in the Delta by her grandmother, Parris McKay has the voice of an angel and the promise of a bright, loving future with the man she adores. But everything Parris believes about her life is rocked to the core when she discovers that Emma, the mother she believed dead, is very much alive. Compelled to discover the roots of this decades-long deception, Parris goes in search of her mother in France, but the meeting only opens old wounds for them both. Hurt and disillusioned, Parris finds solace in two new friends, Leslie and Celeste. Both have difficult relationships with their own mothers, and both, like Parris, are coming to terms with a legacy of long-buried secrets. And as Emma returns to the States, spurring unexpected revelations, the bond that Parris, Leslie and Celeste forge will sustain them on a journey from heartbreak to healing. Compelling, candid and wise, What Mother Never Told Me is an unforgettable story about the power of our pasts to define us—and sometimes to hold us back. It is a novel about abiding love and hidden truths, about family bonds that may be tested but never truly broken, about the lies that tear us apart—and the friendships that can make us whole again.

The Entrepreneurial Bible to Venture Capital: Inside Secrets From the Leaders in the Startup Game Andrew Romans,2013-08-16 40 leading venture capitalists come together to teach entrepreneurs how to succeed with their startup The Entrepreneurial Bible to Venture Capital is packed with invaluable advice about how to raise angel and venture capital funding, how to build value in a startup, and how to exit a company with maximum value for both founders and investors. It guides entrepreneurs through every step in an entrepreneurial venture from the legalities of raising initial capital to knowing when to change tactics. Andrew Romans is the co-founder and general partner of Rubicon Venture Capital, a venture capital fund that invests in privately held technology companies and enables its investors to co-invest along side the fund on a deal-by-deal basis via innovative sidecar funds right up to IPO or M&A exit. Romans is also the founder and general partner of The Founders Club, a venture capital equity exchange fund and investor in later stage liquidity transactions.

The Making of Citizen Kane, Revised Edition Robert L. Carringer,1996-10-24 Citizen Kane, widely considered the greatest film ever made, continues to fascinate critics and historians as well as filmgoers. While credit for its genius has traditionally been attributed solely to its director, Orson Welles, Carringer's pioneering study documents the shared creative achievements of Welles and his principal collaborators. The Making of Citizen Kane, copiously illustrated with rare photographs and production documents, also provides an in-depth view of the operations of the Hollywood studio system. This new edition includes a revised preface and overview of criticism, an updated chronology of the film's reception history, a reconsideration of the locus of responsibility of Welles's ill-fated The Magnificent Ambersons, and new photographs.

Bazin at Work Andre Bazin,2014-04-04 Bazin's impact on film art, as theorist and critic, is considered to be greater than that of any single director, actor, or producer. He is credited with almost single-handedly establishing the study of film as an accepted intellectual pursuit, as well as with being the spiritual father of the French New Wave. Bazin at Work is the first English collection of disparate Bazin writings since the appearance of the second volume of What Is Cinema? in 1971. It includes work from Cahiers le cinema (which he founded and which is the most influential single critical periodical in the history of the cinema) and Esprit. He addresses filmmakers including Rossellini, Eisenstein, Pagnol, and Capra and well-known films including La Strada, Citizen Kane, Scarface, and The Bridge on the River Kwai.

E-Business Essentials Nick Bontis,2004-09-01 This special issue of QJEC marks the final instalment of the journal. The QJEC has had a long-standing history of international scholarship focused on the emerging field of electronic commerce with a broad, interdisciplinary approach. It has established the field's intellectual foundation with state-of-the-art research from business, computer science, engineering, law, psychology, and sociology. This particular issue focuses on an eclectic group of papers that are international in scope with authors from Canada, Australia, France, Germany, South Africa and Italy. The papers range in topics from valuing dot com companies, to mobile health and portals, to supply chain management.

Seven Minutes Norman M. Klein,1993 He traces the development of the art at Disney, the forces that led to full animation, the whiteness of Snow White and Mickey Mouse becoming a logo.

Perspectives on Citizen Kane Ronald Gottesman,1996 Citizen Kane has generated a significant amount of critical scholarship since its release in 1941. Orson Welles' work continues to be recognized as a singular artistic achievement, and this collection of reviews, articles and essays reveal the entire history of the film - from its conception, pre-production, and previewing, to its critical reception and influence. Included in this volume are many essays by such scholars as Morris Dickstein, Bruce Kavin, Robert Carringer and Robert Wise.

The Invisible Art Mark Cotta Vaz,Craig Barron,2004-09-02 Now available in paperback, The Invisible Art provides an unprecedented retrospective of matte art painting

-- the unsung hero in the fast-paced world of cinematic visual effects. Until recently, matte-painting techniques were closely guarded secrets kept locked up on studio lots. The Invisible Art flings open the gates to reveal the finest representations of matte paintings from rare examples seen in epics such as Gone with the Wind and Citizen Kane to prove that the brush is mightier than the computer, as seen in such blockbusters as Star Wars and Titanic. Lavishly illustrated, the book's tremendous scope unveils a century's worth of fascinating stories, legendary personalities, and cunning movie craft from the first pioneering glass shots to the dawn of digital technology. Including a foreword by George Lucas, The Invisible Art conjures a never-before-told story of film wizardry.

Film and Its Techniques Raymond Spottiswoode,1951

Philosophical Problems of Classical Film Theory Noël Carroll,1988 This book is an analytical inquiry into classical film theory (that is, film theory before the advent of the semiotics and poststructuralism that began to dominate academic film literature in the 1970s). The author brings his training and experience as both an analytical philosopher and a film scholar to bear on its chief tenets. Using Rudolf Arnheim, Andre Bazin, and V. F. Perkins as representatives of major types of thinking about film, he provides clear and concise overviews of their work and locates their thought against the critical and theoretical currents of their times, the historical development of the cinema, and the prevalent issues in philosophical aesthetics. This closely reasoned book characterizes the structure of classical film theory, attempts to diagnose its shortcomings, and suggests avenues of inquiry for postclassical film theory. In addition, it includes many illuminating discussions of particular films and cinematic techniques. Arnheim and Bazin represent opposing positions on the nature of photographic recording that are so deeply entrenched in our intellectual culture that these arguments seem to return over and over whenever discussion of the photographic arts is broached. Professor Carroll offers a uniquely penetrating appraisal of their work. Perkins, a more contemporary thinker, has not been subjected to any detailed analysis until now.

The Technique of Special Effects Cinematography Raymond Fielding,1984-01-01

Plastic Reality Julie A. Turnock,2015-02-03 Julie A. Turnock tracks the use and evolution of special effects in 1970s filmmaking, a development as revolutionary to film as the form's transition to sound in the 1920s. Beginning with the classical studio era's early approaches to special effects, she follows the industry's slow build toward the significant advances of the late 1960s and early 1970s, which set the stage for the groundbreaking achievements of 1977. Turnock analyzes the far-reaching impact of the convincing, absorbing, and seemingly unlimited fantasy environments of that year's iconic films, dedicating a major section of her book to the unparalleled innovations of Star Wars and Close Encounters of the Third Kind. She then traces these films' technological, cultural, and aesthetic influence into the 1980s in the deployment of optical special effects as well as the not-too-realistic and hyper-realistic techniques of traditional stop motion and Showscan. She concludes with a critique of special effects practices in the 2000s and their implications for the future of filmmaking and the production and experience of other visual media.

A Technological History of Motion Pictures and Television Raymond Fielding,1967

Film Style and Technology Barry Salt,2009 Film Style and Technology is a history of film style and its relationship to film technology. It also includes a theory of film analysis and demonstrates this theory using the films of Max Ophuls.
