**Patellofemoral Pain, Instability, and Arthritis** David Dejour,Stefano Zaffagnini,Elizabeth A. Arendt,Petri Sillanpää,Florian Dirisamer,2020-05-23 This excellently illustrated book adopts an evidence-based approach to evaluate the efficacy of different techniques for the imaging and treatment of patellofemoral pain, instability, and arthritis. The aim is to equip practitioners with an informative guide that will help them to manage disorders of the patellofemoral joint by casting light on the many issues on which a consensus has been lacking. The opening chapters supply essential background information and explain the role of various imaging modalities, including radiography, CT, MRI, and bone scan. The various conservative and surgical treatment approaches for each of the three presentations – pain, instability, and arthritis – are then described and assessed in depth, with precise guidance on indications and technique. Postoperative management and options in the event of failed surgery are also evaluated. Throughout, careful attention is paid to the literature in an attempt to establish the level of evidence for each imaging and treatment method. The new edition has been thoroughly updated, with inclusion of additional chapters, in order to present the latest knowledge on biomechanics, diagnosis, surgical techniques, and rehabilitation.

**Road Movies** D. Orgeron,2007-12-09 Road Movies engages with two foundational twentieth century technologies: cinematic and automotive. It is a book about road movies, a genre burdened by its own seductiveness. It is also, however, a book about images of human mobility more generally and the social function those images have served.

Reading North Korea Sonia Ryang,2020-04-06 Often depicted as one of the world's most strictly isolationist and relentlessly authoritarian regimes, North Korea has remained terra incognita to foreign researchers as a site for anthropological fieldwork. Given the difficulty of gaining access to the country and its people, is it possible to examine the cultural logic and social dynamics of the Democratic People's Republic of Korea?In this innovative book, Sonia Ryang casts new light onto the study of North Korean culture and society by reading literary texts as sources of ethnographic data. Analyzing and interpreting the rituals and language embodied in a range of literary works published in the 1970s and 1980s, Ryang focuses critical attention on three central themes—love, war, and self—that reflect the nearly complete overlap of the personal, social, and political realms in North Korean society. The ideology embedded in these propagandistic works laid the cultural foundation for the nation as a “perpetual ritual state,” where social structures and personal relations are suspended in tribute to Kim Il Sung, the political and spiritual leader who died in 1994 but lives eternally in the hearts of his people and still weaves the social fabric of present-day North Korea.

Analytical Pyrolysis of Natural Organic Polymers S.C. Moldoveanu,1998-11-11 Analytical pyrolysis is one of the many tools utilized for the study of natural organic polymers. This books describes in three parts the methodology of analytical pyrolysis, the results of pyrolysis for a variety of biopolymers, and several practical applications of analytical pyrolysis on natural organic polymers and their composite materials. Analytical pyrolysis methodology covers two distinct subjects, the instrumentation used for pyrolysis and the analytical methods that are applied for the analysis of the pyrolysis products. A variety of pyrolytic techniques and of analytical instruments commonly coupled with pyrolysis devices are given. The description of the results of pyrolysis for biopolymers and

some chemically modified natural organic polymers is the core of the book. The main pyrolysis products of numerous compounds as well as the proposed mechanisms for their pyrolysis are described. In this part an attempt is made to present as much as possible the chemistry of the pyrolytic process of natural organic polymers. The applications of analytical pyrolysis include topics such as polymer detection used for example in forensic science, structure elucidation of specific polymers, and identification of small molecules present in polymers (anti-oxidants, plasticizers, etc.). Also, the degradation during heating is a subject of major interest in many practical applications regarding the physical properties of polymers. The applications to composite polymeric materials are in the fields of classification of microorganisms, study of a variety of biological samples, study of fossil materials, etc. Analytical pyrolysis can also be used for obtaining information on the burning area generate pyrolysates that have complex compositions. Their analysis is important in connection with health issues, environmental problems, and taste of food and cigarettes. Features of this book: • Presents analytical pyrolysis as a uniform subject and not as a conglomerate of scientific papers. • Puts together in an organized manner a large volume of available information in this specific field. • Provides original results which address subjects with relatively scarce information in literature. • Gives original views on subjects such as the parallel between the pyrolytic process and the ion fragmentation in mass spectrometry. • Includes the role of pyrolysis in the burning process. The three parts of the book are covered in 18 chapters, each divided into sections. Some sections are further divided by particular subjects. References are given for each chapter, and an effort has been made to include as much as possible from the available representative information. A few unpublished personal results are also included.

*Indifferent Inclusion* Russell McGregor, 2011 Combining the perspectives of political, social and cultural history, this book presents a holistic interpretation of the complex relationship between Indigenous and settler Australians during the mid 20th century. The author provides an insightful history of the changing nature of race relations in Australia.

*Women, Imagination and the Search for Truth in Early Modern France* Rebecca M. Wilkin, 2016-12-05 Grounded in medical, juridical, and philosophical texts of sixteenth- and seventeenth-century France, this innovative study tells the story of how the idea of woman contributed to the emergence of modern science. Rebecca Wilkin focuses on the contradictory representations of women from roughly the middle of the sixteenth century to the middle of the seventeenth, and depicts this period as one filled with epistemological anxiety and experimentation. She shows how skeptics, including Montaigne, Marie de Gournay, and Agrippa von Nettesheim, subverted gender hierarchies and/or blurred gender difference as a means of questioning the human capacity to find truth; while positivists who strove to establish new standards of truth, for example Johann Weyer, Jean Bodin, and Guillaume du Vair, excluded women from the search for truth. The book constitutes a reevaluation of the legacy of Cartesianism for women, as Wilkin argues that Descartes' opening of the search for truth even to women was part of his appropriation of skeptical arguments. This book challenges scholars to revise deeply held notions regarding the place of women in the early modern search for truth, their role in the development of rational thought, and the way in which intellectuals of the period dealt with the emergence of an influential female public.

Evolution of the House Mouse Miloš Macholán, Stuart J. E. Baird, Pavel Munclinger, Jaroslav Piálek, 2012-07-19 The house mouse is the source of almost all genetic variation in laboratory mice; its genome was sequenced alongside that of humans, and it has become the model for mammalian speciation. Featuring contributions from leaders in the field, this volume provides the evolutionary context necessary to interpret these patterns and processes in the age of

genomics. The topics reviewed include mouse phylogeny, phylogeography, origins of commensalism, adaptation, and dynamics of secondary contacts between subspecies. Explorations of mouse behaviour cover the nature of chemical and ultrasonic signalling, recognition, and social environment. The importance of the mouse as an evolutionary model is highlighted in reviews of the first described example of meiotic drive (t-haplotype) and the first identified mammalian speciation gene (*Prdm9*). This detailed overview of house mouse evolution is a valuable resource for researchers of mouse biology as well as those interested in mouse genetics, evolutionary biology, behaviour, parasitology, and archaeozoology.

**Humanism and the Death of God** Ronald E. Osborn, 2017 Humanism and the Death of God is a critical exploration of secular humanism and its discontents. Through close readings of three exemplary nineteenth-century philosophical naturalists or materialists, who perhaps more than anyone set the stage for our contemporary quandaries when it comes to questions of human nature and moral obligation, Ronald E. Osborn argues that the death of God ultimately tends toward the death of liberal understandings of the human as well. Any fully persuasive defense of humanistic values--including the core humanistic concepts of inviolable dignity, rights, and equality attaching to each individual--requires an essentially religious vision of personhood. Osborn shows such a vision is found in an especially dramatic and historically consequential way in the scandalous particularity of the Christian narrative of God becoming a human. He does not attempt to provide logical proofs for the central claims of Christian humanism along the lines some philosophers might demand. Instead, this study demonstrates how philosophical naturalism or materialism, and secular humanisms and anti-humanisms, might be persuasively read from the perspective of a classically orthodox Christian faith.

*Pseudo-Manetho, Apotelesmatica*, 2023-04-27 The corpus of astrological material ascribed to the Egyptian priest Manetho consists of six books of poetry. This book serves as the companion to the one published by OUP in 2020, which was the first commentary in any language on the earliest three books of Manetho's poetry (two, three, and six as they appear in the manuscript). This volume supplies the remainder (books four, one, and five). Manetho was credited with a series of didactic poems which list outcomes for planetary set-ups in a birth chart. The books covered in this volume are not as easily dated as those in the first volume, but the most recent is probably no later than the fourth century and they are still Egyptian. As in the first volume, their descriptions of the kinds of person who are born under happy and unhappy configurations of stars speak to the lived realities, aspirations, and fears of the astrologer's clientele. Unlike in the first volume, however, the individual books treated here have different authors, and there is more emphasis on profiling individual poets in terms of style, metre, and mannerisms. As in the first volume, there is a Greek text with English translation and an apparatus with parallel material to enable comparison with related works. But this volume pays more attention to the transmission of traditional material from one author to another, and to the special approach

required of an editor of material which, being in practical use, circulated in unstable and minutely-varying textual forms.

Competing Memories of European Border Towns Steen Bo Frandsen, Jörg Hackmann, Kimmo Katajala, 2024-03-18 This book considers competing memory politics in European border towns after the First and Second World Wars. In the twentieth century Europe's borders shifted dramatically in the wake of war, and towns were often moved from one state to another despite their physical locations remaining unchanged. Urban spaces adapted to incorporate new place names, monuments, and requirements, overlaid onto the cultural heritage of previous settlers. This book investigates how the memories of different ethnic groups compete and sometimes contest with each other in the town's space, using the case studies of Vyborg/Viipuri in present-day Russia, Klaipėda/Memel in Lithuania, Szczecin/Stettin in Poland, Flensburg in Germany, Trieste in Italy, and Rijeka/Fiume in Croatia. The book considers how public memories are built and how old traditions are moulded to new forms in urban settings. Drawing on perspectives from across borderland, urban, and memory studies, this book will be an important resource for researchers with an interest in Europe, and in how urban memories are constructed and contested.

**Alexandra** Lycophron, 2015 The Alexandra attributed to Lykophron is a minor poetic masterpiece. At 1474 lines, it is one of the most important and notoriously difficult Greek poems dating from the Hellenistic period (most likely the early second century BC). Most of the poem purports to be a prophecy by the mythical Trojan princess, Cassandra, the most beautiful of the daughters of King Priam, and her prophecy ranges from the Trojan War to the Roman defeat of Macedon in 197 BC, which took place in the poet's own time. The poem's importance arises from the light which it sheds on Greek religion (in particular the role of women), on foundation myths and myths of colonial identity, and on local - especially Italian - cults and cult places. The difficulty of the poem stems from its unusual vocabulary - many words of ancient Greek are found only in this poem - and the riddling and indirect way in which most of the many mythological characters are introduced. As well as providing the Greek text in full and its English translation, this volume provides the first ever full-length commentary in English on the poem.

 web a rate law shows how the rate of a chemical  
 reaction depends on reactant concentration for a

reaction such as  $aa \rightarrow products$  the rate law generally  
 has the form  $rate = k a^n$  where  $k$  is a proportionality  
 constant called the rate constant and  $n$  is the order  
 of the reaction with respect to  $a$  the value of  $n$  is  
 not related to the reaction stoichiometry and
