Comet Carl Sagan,Ann Druyan,2011-07-06 What are these graceful visitors to our skies? We now know that they bring both life and death and teach us about our origins. Comet begins with a breathtaking journey through space astride a comet. Pulitzer Prize-winning astronomer Carl Sagan, author of *Cosmos* and *Contact*, and writer Ann Druyan explore the origin, nature, and future of comets, and the exotic myths and portents attached to them. The authors show how comets have spurred some of the great discoveries in the history of science and raise intriguing questions about these

brilliant visitors from the interstellar dark. Were the fates of the dinosaurs and the origins of humans tied to the wanderings of a comet? Are comets the building blocks from which worlds are formed? Lavishly illustrated with photographs and specially commissioned full-color paintings, Comet is an enthralling adventure, indispensable for anyone who has ever gazed up at the heavens and wondered why. Praise for Comet Simply the best. —The Times of London Fascinating, evocative, inspiring. —The Washington Post Comet humanizes science. A beautiful, interesting book. —United Press International Masterful . . . science, poetry, and imagination. —The Atlanta Journal & Constitution

Science In Public Jane Gregory, Steven Miller, 2000-09-07 Does the general public need to understand science? And if so, is it scientists' responsibility to communicate? Critics have argued that, despite the huge strides made in technology, we live in a scientifically illiterate society--one that thinks about the world and makes important decisions without taking scientific knowledge into account. But is the solution to this illiteracy to deluge the layman with scientific information? Or does science news need to be focused around specific issues and organized into stories that are meaningful and relevant to people's lives? In this unprecedented, comprehensive look at a new field, Jane Gregory and Steve Miller point the way to a more effective public understanding of science in the years ahead.

The Archive of the Amateur Observation Network of the International Halley Watch. Volume 1; Comet Giacobini-Zinner National Aeronautics and Space Administration (NASA), 2018-08-04 The International Halley Watch (IHW) was organized for the purpose of gathering and archiving the most complete record of the apparition of a comet, Comet Halley (1982i = 1986 III = 1P/Halley), ever compiled. The redirection of the International Cometary Explorer (ICE), toward Comet Giacobini-Zinner (1984e = 1985 XIII = 21P/Giacobini-Zinner) prompted the initiation of a formal watch on that comet. All the data collected on P/Giacobini-Zinner and P/Halley have been published on CD-ROM in the Comet Halley Archive. This document contains a printed version of the archive data, collected by amateur astronomers, on these two comets. Volume 1 contains the Comet Giacobini-Zinner data archive and Volume 2 contains the Comet Halley archive. Both volumes include information on how to read the data in both archives, as well as a history of both comet watches (including the organizing of the network of astronomers and lessons learned from that experience).
