*Intelligent Computing* Kohei Arai,2022-07-06 The book, "Intelligent Computing - Proceedings of the 2022 Computing Conference", is a comprehensive collection of chapters focusing on the core areas of computing and their further applications in the real world. Each chapter is a paper presented at the Computing Conference 2022 held on July 14-15, 2022. Computing 2022 attracted a total of 498 submissions which underwent a double-blind peer-review process. Of those 498 submissions, 179 submissions have been selected to be included in this book. The goal of this conference is to give a platform to researchers with fundamental contributions and to be a premier venue for academic and industry practitioners to share new ideas and development experiences. We hope that readers find this book interesting and valuable as it provides the state-of-the-art intelligent methods and techniques for solving real-world problems. We also expect that the conference and its publications will be a trigger for further related research and technology improvements in this important subject.

**The Mary Jane Mission** Daniel Wyatt,2008-05-12 When the B29 Superfortress Mary Jane is discovered in 1945 sitting in thick jungle with no visible damage, and her crew and mysterious payload are missing, the incident is hushed up and forgotten. But in 1990, mysterious radar images start to appear. F18 crews sent up to investigate discover a B29 flying towards Japan. What is this mysterious plane? If it is the Mary Jane continuing her mission, how can they stop it?

**Shots on the Bridge** Ronnie Greene,2016-09-06 A harrowing story of blue on black violence, of black lives that seemingly did not matter. On September 4, 2005, six days after Hurricane Katrina's landfall in New Orleans, two groups of people intersected on the Danziger Bridge, a low-rising expanse over the Industrial Canal. One was the police who had stayed behind as Katrina roared near, desperate to maintain control as their city spun into chaos. The other was the residents forced to stay behind with them during the storm and, on that fateful Sunday, searching for the basics of survival: food, medicine, security. They collided that morning in a frenzy of gunfire. When the shooting stopped, a gentle forty-year-old man with the mind of a child lay slumped on the ground, seven bullet wounds in his back, his white shirt turned red. A seventeen-year-old was riddled with gunfire from his heel to his head. A mother's arm was blown off; her daughter's stomach gouged by a bullet. Her husband's head was pierced by shrapnel. Her nephew was shot in the neck, jaw, stomach, and hand. Like all the other victims, he was black—and unarmed. Before the blood had dried on the pavement, the shooters, each a member of the New Orleans Police Department, and their supervisors hatched a cover-up. They planted a gun, invented witnesses, and charged two of their victims with attempted murder. At the NOPD, they were hailed as heroes. Shots on the Bridge explores one of the most dramatic cases of police violence seen in our country in the last decade—the massacre of innocent people, carried out by members of the NOPD, in the brutal, disorderly days following Hurricane Katrina. It reveals the fear that gripped the police of a city slid into anarchy, the circumstances that drove desperate survivors to the bridge, and the horror that erupted when the police opened fire. It carefully unearths the cover-up that nearly buried the truth. And finally, it traces the legal maze that, a decade later, leaves the victims and their loved ones still searching for justice. This is the story of how the people meant to protect and serve citizens can do violence, hide their tracks, and work the legal system as the nation awaits justice.
