

Commerzbank

Dr. oec. Fabian Brunner

M & A of the Commerzbank and Dresdner Bank Philipp Gauß, 2009-11 Seminar paper from the year 2009 in the subject Business economics - Marketing, Corporate Communication, CRM, Market Research, Social Media, grade: 1,0, European School of Business Reutlingen, language: English, abstract: The current financial crisis has caused governments and central banks to compete, who will achieve the biggest bail-out- and economic stimulus package including the lowest interest rates. These are supposed to slow down the worldwide recession and avoid a deflation. The current crisis has parallels to the great depression in the 1930th and therefore is also called the great re-pression. The German Government has also installed a safety shield, worth 480 billion Euro for financially suffering banks and financial institutions. Thus, the Financial Markets Stabilization Act was created. It only took a week to pass the bill which is unknown off in Germany and therefore shows the importance of this law. It enables the government to act further than the German Basic Law would allow. The Commerzbank was the first German bank to claim a part of governments help. This was due to high losses in the 4th quarter of 2008 and the acquisition of Dresdner Bank. [...]

Sir Norman Foster and Partners Volker Fischer, Horst Grüneis, Ralph Richter, 1997 Foster's new Commerzbank is architecturally exceptional and also energy efficient.

The Commerzbank Headquarters by Norman Foster Esther Rieck, 2006-02-13 Seminar paper from the year 2006 in the subject English Language and Literature Studies - Culture and Applied Geography, grade: 2,3, University of Paderborn, course: The Cultural Heritage: The Nineteen Nineties, language: English, abstract: The subject matter of this term paper is a description as well as an interpretation of the "Commerzbank Headquarters" in Frankfurt which was built by Norman Foster. First I will say a few words about Norman Foster and his works and afterwards about the background of the Commerzbank. In the main part I want to concentrate on the Commerzbank in Frankfurt with its structure and how this "green" skyscraper works. Norman Foster was born in Manchester in 1935. In 1961 after his final degree at the School of Architecture and City Planning at the University of Manchester, he was given a bursary of the University of Yale where he finished his studies with a master's degree in architecture. In 1963 he formed the "Team 4", together with his colleague and friend Richard Rogers. Four years later they split off and went separate ways. Foster founded "Foster Associates" which was later renamed in "Foster and Partners". He was knighted in 1990 and appointed to the Order of Merit in 1997. In 1999 he was created a life peer. Foster has received more than 190 awards and citations for his projects and has won over 50 national and international competitions. The Commerzbank Tower, at 300 meters tall, is one of the tallest buildings in Europe and the tallest naturally ventilated building in the world. The German political and social environment played a big role in the development of the design for this building. Frankfurt's Green Party strongly encouraged Commerzbank's new structure to be, obviously, "green". The aim was to create a revolutionary high rise, a high rise that would be both environmentally and people friendly. This building would also have to be a landmark for a town committed to building towers that symbolize hope for a future as a key European financial centre while providing space for about 2600 employees. In order to fulfil these requirements and still create green architecture, Norman Foster had to redesign the concept the skyscraper itself. Some of the ideas which were realized in Frankfurt had their roots in earlier works done by Foster. Back in 1971 he tried to integrate nature into an office building. "Willis Faber & Dumas" with its roof garden was his first building where he combined a garden with an office building. A few years later the "Hong Kong and Shanghai Bank" Headquarters was envisioned to have "gardens in the sky", but this idea was never realized.

British and German Banking Strategies S. Janssen, 2009-04-28 The author investigates the strategies of eight publicly listed banks in Britain and Germany in the context of European financial integration. Evidence is provided that banks with defensive strategies fared better than those which attempted to break out of a coherent financial system in order to embrace new business opportunities

Handbook on the History of European Banks Manfred Pohl, 1994-01-01 Analyse: Banque cantonale vaudoise: p. 1072-1078.

Commerzbank Tower Norman Foster, Colin Davies, 2013-06 At 56 stories and just under 1,000 feet, the Commerzbank Tower in Frankfurt is Germany's tallest building and the second tallest in the European Union. Height is not the only distinguishing feature of the Commerzbank Tower. As this illustrated guide to its design and construction reveals, this iconic structure is also the world's first ecological high-rise office building. This sleek and beautifully designed book explores every aspect of Foster's pioneering project--from the central spiraling atrium, which allows for natural light and ventilation, to the outside gardens that give the building a sense of airiness and transparency. One of Foster + Partners' most influential projects, this tower wields a low impact on the environment while offering the neighborhood an attractive site for cultural events. AUTHOR: Norman Foster is the Founder and Chairman of Foster + Partners, one of the most respected international architectural practices. He was awarded the Pritzker Architecture Prize in 1999 and the Praemium Imperiale in 2002; and in 2009 he became the twenty-ninth laureate of the Prince of Asturias Award for Arts. He was granted a knighthood in 1990 and was appointed to the Order of Merit in 1997. 100 illustrations

Banking in Crisis Dr. oec. Fabian Brunner, 2020-07-06 In the foreseeable future, banks as we now know them will cease to exist. In view of the increasingly digital banking business, the pressure on costs and the reduction in vertical integration, the banking industry in the future will be characterized by technologization and specialization and threatened by the influence and capabilities of the BigTechs. There will need to be drastic changes in the competitive situation, the value creation structures and business models of the banking industry; despite the protection provided by banking supervisors and governance regulations, the core functions of banking - the handling of payment transactions and financing - are no longer the unique key functions that have made the banking industry indispensable within an economy to date. The perfect storm seems to be brewing; as Bill Gates already said in 1994 banking is necessary, banks are not. Banks around the world are striving to find an adequate response. This book starts by providing a well-founded theoretical basis and then analyses the situation, identifies the present shortcomings and problem areas of the banks and outlines possible approaches to solutions.

Inflation-Linked Bonds and Derivatives Jessica James, Michael Leister, Christoph Rieger, 2023-01-30 Disruptions in supply chains and consumption patterns triggered by the pandemic together with stimulus packages and the energy crisis have catapulted inflation rates to levels last seen in the 1970s. For inflation markets, it's hard to understate this sudden and enormous change in fortunes. Understanding the future evolution of consumer prices has become crucial for investors across all asset classes as central banks tailor their policy responses with a view to anchoring inflation expectations. Inflation-Linked Bonds and Derivatives condenses more than 15

years of dedicated coverage of inflation markets. It provides investors, issuers and policy makers with all the relevant tools to navigate inflation markets, starting with the nuts and bolts of consumer price indices, forwards, carry and trading strategies, to advanced topics like seasonality adjustments and the use of inflation options. With its many illustrative graphs and tabulated data, this exceptional book will benefit traders, corporate treasury departments, fixed income investors, insurance companies and pension funds executives.

Corporate Governance and Risk Management in Financial Institutions Robert C. Gericke, 2018-03-27 This book presents an overview of corporate governance and risk management, analyzing their interdependence and particularly their relevance in banking. It discusses current trends in corporate governance, such as stakeholder management, financial performance and the cost of equity, compensation schemes, board structures and shareholder activism. Further, it reviews some of the most important regulatory changes introduced since the latest financial crisis and highlights their impact on the annual reports of the banks under analysis. Lastly, the book assesses and compares major banks in Brazil and Germany with special emphasis on the aspects mentioned above, revealing surprising similarities between the banking systems of these otherwise disparate countries.

LogoLounge 6 Catharine Fishel, Bill Gardner, 2011-02-01 Logos define, distinguish, and disseminate a company's core message. It is no wonder that creating successful marks takes a well conceived strategy and a skilled hand. This book, the sixth in the series, once again celebrates the brilliant work top designers around the world have created for clients both large and small. This diverse collection offers a wealth of inspiration and insights for graphic designers and their clients. Created by Bill Gardner, president of leading design firm Gardner Design, the LogoLounge website (www.logolounge.com) showcases the work of the world's top designers as well as up-and-coming new talent. The book presents the site's best designs of the past year as judged by an elite group of name-brand designers. The first portion of the book profiles ten top designers and spotlights their biggest, newest campaigns. A handful of their smaller projects are also featured in this section along with unused logos that have never before been seen. The second half of the book contains almost 2,000 logos organized by visual categories. LogoLounge 6 features the work of superstar artists and firms such as Stefan Sagmeister, Landor, Saffron, Jessica Hische, and MetaDesign. With 2,000 logos from every corner of the earth, this visually compelling volume is the go-to resource for inspiration from the best in the field.

Corporate Governance Ulrich Steger, Wolfgang Amann, 2008-04-30 This book presents the value school of corporate governance, outlining a multitude of areas where corporate governance could add real worth, and showing how this can be put into effect. No "one-size-fits-all" model emerges as a solution. Rather, the insights in this book take idiosyncrasies and dynamics over time into consideration. They consider the main issues and their real causes, ownership settings, country settings and new developments in corporate governance research and practice. International focus places emphasises on typical patterns, predicament and solutions instead of national laws. Points are illustrated with in-depth case studies and highlighted learning nuggets. Alerts the reader to typical dilemmas and traps in attaining the goal of value creation, whilst also pointing to promising avenues forward.

The German Financial System Jan Pieter Krahmen (editor), Reinhard H. Schmidt, 2004 Written by a team of scholars, predominantly from the Centre for Financial Studies in Frankfurt, this volume provides a descriptive survey of the present state of the German financial system and a new analytical framework to explain its workings.

Case Studies in Strategic Management Gunther Friedl, Andreas Biagosch, 2018-09-08 Most business schools use case studies in their courses. However, these are typically based on past cases and assigned to students to solve. This book describes a new approach for teaching with case studies, which was developed and applied successfully at TUM School of Management. In this approach, student teams write and solve their own case study on a topic concerning current and future businesses. A case can thus be on their own startup or a strategic decision of existing companies. During the course, the students receive intensive coaching while selecting and developing the case topic by the course advisors as well as feedback by industry experts and executives for whom the case is actually a burning question. The authors present 17 cases covering strategic questions for startups and technology companies such as Deutsche Post, BMW, Ryanair, Lufthansa, Stadtwerke München, Fielmann, adidas, Siemens, Caribou Biosciences, eon, Airbus, Unicredit and UBS.

Design Added Value Ömer Akin, 2021-07-22 Design has intrinsic, economic value. To make this value tangible, design features of buildings need to be explored, measured, and taken into account when initiating projects and financing their construction. It is as calculable as the extrinsic value of a project. However, we need concepts, strategies, methods, techniques, and tools to do just that. The Value Based Design approach and Design-Added Value (D-AV) methodology in this book enables architects, engineers, contractors and owner-clients of buildings to benefit from extraordinary design and construction features. It explains the rationale and motivation for D-AV methodology, outlines and illustrates this methodology with examples, provides complete and detailed examples of how the key analysis techniques work through historical case studies, and describes specific methods used in application of the D-AV methodology, such as Bayesian statistics, cost benefit analysis, pairwise comparison techniques, cognitive walkthroughs, and optimization.

Basel III – Implications for banks' capital structure: What happens with hybrid capital instruments? Timo Köffer, 2014-02-01 This book attempts to answer the question of how CoCos differ from convertible bonds, and how these instruments are suitable for contributing as core capital under Basel III. The plausibility of CoCos and the challenges resulting from their use are discussed in this book. Overall a comprehensive picture of the impacts resulting from the new capital definitions will be created. The Background to the introduction of Basel III is described at the beginning of the book, in addition to a presentation of the Basel III document and the new capital definitions. To create a kind of basic understanding of the functioning of convertible bonds and CoCos, hybrid capital will then be explained. In the following part of the book the design options of CoCos and different interests of investor groups are shown. Then the Commerzbank AG is analyzed by means of an analysis of how the capital components changed in Basel II through to Basel III over the last two years. The effect of Basel III on hybrid capital will be illustrated with a practical example. At the end of the book follows a short conclusion regarding the potential impact of Basel III on hybrid capital and the new capital instrument CoCos.

Banking in Transition G. Robins, 2000-02-17 The book asks whether transplanting banks can solve the problems involved in creating a well-functioning market economy from outside, looking especially at the virtually complete takeover of East German banks by their Western counterparts after unification. Drawing on a wide range of English and German sources, and fieldwork interviews across Germany, it argues that there are no quick fix solutions to transition to a market. Implications are discussed for East Germany and for other previously centrally planned economies, and the global implications of foreign ownership in banking are considered.
