Gramsci's Common Sense Kate Crehan, 2016-09-16 Acknowledged as one of the classics of twentieth-century Marxism, Antonio Gramsci's Prison Notebooks contains a rich and nuanced theorization of class that provides insights that extend far beyond economic inequality. In *Gramsci's Common Sense* Kate Crehan offers new ways to understand the many forms that structural inequality can take, including in regards to race, gender, sexual orientation, and religion. Presupposing no previous knowledge of Gramsci on the part of the reader, she introduces the Prison Notebooks and provides an overview of Gramsci's notions of subalternity, intellectuals, and common sense, putting them in relation to the work of thinkers such as Bourdieu, Arendt, Spivak, and Said. In the case studies of the Tea Party and Occupy Wall Street movements, Crehan theorizes the complex relationships between the experience of inequality, exploitation, and oppression, as well as the construction of political narratives. *Gramsci's Common Sense* is an accessible and concise introduction to a key Marxist thinker whose works illuminate the increasing inequality in the twenty-first century.

The Great Plant-Based Con Jayne Buxton, 2022-06-09 Plant-based is best for health, go vegan to help save the planet, eat less meat... Almost every day we are bombarded with the seemingly incontrovertible message that we must reduce our consumption of meat and dairy - or eliminate them from our diets altogether. But what if the pervasive message that the plant-based diet will improve our health and save the planet is misleading - or even false? What if removing animal foods from our diet is a serious threat to human health, and a red herring in the fight against climate change. In **THE GREAT PLANT-BASED CON**, Jayne Buxton demonstrates that each of these 'what-ifs' is, in fact, a

reality. Drawing on the work of numerous health experts and researchers, she uncovers how the separate efforts of a constellation of individuals, companies and organisations are leading us down a dietary road that will have severe repercussions for our health and wellbeing, and for the future of the planet. THE GREAT PLANT-BASED CON is neither anti-plant nor anti-vegan - it is a call for us to take an honest look at the facts about human diets and their effect on the environment. Shocking and eye-opening, this book outlines everything you need to know to make more informed decisions about the food you choose to eat.

Ten Reasons Paul H. Betancourt, 2012-10-01 There is a lot of nonsense that goes on in the name of the environment. Farmers and other producers regularly shake their heads at red tape and Death of Common Sense experiences. In Ten Reasons, Betancourt seeks to find balance on environmental issues. We need a healthy environment and a healthy economy. Betancourt's Ten Reasons explores how we have lost perspective and how to restore balance on environmental issues as we go forward. Betancourt offers an alternative to gridlock on environmental issues. As Betancourt says, If we are going to do this, let's do it right. Paul Betancourt farms with his family in California's Central Valley. They currently grow Pima cotton, wheat and almonds. In addition to being active in the community, Betancourt is an instructor at the University of Phoenix in Fresno, California and Madera Center Community College. Betancourt's observations on life and farming can be heard on 940ESPN radio every weekday in Fresno, California. You can also follow him on his blog, This Week on the Farm, at <http://betancourtunlimited.blogspot.com/> Paul Betancourt faces the challenges of farming in a region with good soils and plentiful degree days but uncertain surface water supplies and increasingly degraded and dwindling groundwater supplies. His recounting of his frustrations dealing with these factors and a bureaucracy struggling to address water and air issues in this environment makes an

interesting read. Dr. Karl Longley Dean Emeritus- California State University Fresno, School of Engineering Past Chairman- Central Valley Regional Water Quality Control Board As an organic farmer I am so buried with paperwork that I barely have time to set equipment and check my fields. I appreciate the common sense light that Paul shines on farming and environmental issues. We really do need balance. Daniel Babschoff Kerman, California

Management of marketing activities of agricultural formations in the conditions of European integration Lohosha R., Mazur K., Hontaruk Y., Babyna O., Babyn I., Belkin I., Bereziuk S., Harbar Z., Germanyuk N., Kolesnik T., Kubai O., Prylutskyi A., Furman I., Yaremchuk N., Pidlubnyi V., Koval O., Revkova A., 2022-11-18 In modern conditions of global and transformational changes, the role of management of marketing activities of agrarian enterprises is growing. Understanding and using the concept of marketing in the management of agro-industrial enterprises in the conditions of European integration is a mandatory element of effective entrepreneurial activity. The quality of marketing activity in management is decisive, as it determines the highly profitable rhythmic activity of the enterprise. Studies of agricultural enterprises of Ukraine confirm that, although the implementation of marketing is becoming more and more widespread, all existing forms of management of marketing activities are not yet fully used. What would ensure the competitiveness of agricultural enterprises, adaptation to constant changes in the external environment and market conditions, stability of economic conditions. Management of marketing activities plays a significant role in the development and effective operation of an agricultural enterprise. It is effective work in the field of marketing activity management that will increase the competitiveness of an agricultural enterprise, expand its opportunities to enter new markets, and lead to an increase in product sales and profit growth. Due to inertia, many enterprises do not pay attention to the importance of such a component as marketing

management, which in the future negatively affects their economic indicators. The article examines the main features of marketing management of agricultural enterprises of the Vinnytsia region and Ukraine as a whole in the conditions of European integration. The significance of the research on the management of marketing activities, which is necessary not only for profit, but also for being competitive in the market, is determined. The necessity of using an integrated marketing approach is substantiated. The expediency of using modern methods of product promotion has been determined. The scientific basis of managing the economic development of agribusiness entities is revealed in the works of Ukrainian economists - V. Andriychuk, I. Balaniuk, I. Gryshova, G. Kaletnik, M. Malik, P. Sabluk, A. Tretyak, O. Shpykulyak and other scientists. Theoretical issues of strategic management are highlighted in the scientific works of M. Albert, O. Amosov, I. Ansoff, Y. Zavadskyi, M. Meskon, G. Mintzberg, H. Mostovoi, G. Odintsova, M. Porter, A. Thompson, A. Fayol and other domestic and foreign authors. The theoretical principles of marketing activity management became the object of research by H. Armstrong, L. Balabanova, O. Varchenko, A. Voychak, O. Gudzynskiy, P. Doyle, H. Kaletnik, S. Kamilova, F. Kotler, Zh-Zh . Lamben, I. Lytovchenko, L. Naumova, M. Oklander, O. Osnach, P. Ostrovsky, A. Pavlenko, I. Reshetnikov, M. Sakhatsky, I. Solovyov, O. Chirva, O. Shpychak, many other domestic and foreign scientists. Theoretical studies and practical recommendations of the mentioned scientists formed the general methodical basis of marketing management of agricultural enterprises. However, research on the management of marketing activities of agribusiness subjects is not sufficiently systematic and complete. In the practice of domestic agricultural enterprises, there are a number of shortcomings that reduce the effectiveness of marketing activities in the conditions of European integration. These include: chaotic use of individual elements of marketing, reduction of marketing functions only to stimulating the sale of goods, food, orientation to the short-term

perspective, lack of flexibility and ignorance of consumer requests. To solve these tasks, it is necessary to develop measures to promote the sale of products through the formation of a sales support system and the development of cooperation with the EU. In these conditions, the role of marketing activity of agricultural enterprises increases and the need to develop recommendations for the organization and development of marketing tools in agro-industrial production at the level of enterprises and the region, which determines the relevance of this scientific research. The results of the research presented in the monograph were carried out as part of the initiative theme of the Department of Agrarian Management and Marketing of Vinnytsia National Agrarian University Development of the concept of management of marketing activity of agricultural enterprises state registration number: 0122U002111. for 2022-2024

Real Common Sense Brian Kahn, 2012-07-24 America's extreme Right falsely claims the Founding Fathers as allies for their radical agenda. Pundit Glenn Beck has gone so far as to use the title of Tom Paine's famous 1776 pamphlet *Common Sense* for his own book—a book that attacks the political, social and economic rights which Paine and the Founders fought for. It's time to cut through the rhetoric, smoke, and spin, and get back to our core American values. We have gone off course as a country by emphasizing consumerism over citizenship, entertainment over education, and me over we. By rediscovering the moral compass our Founders put into place, we can create a united America, and a future worthy of our grandchildren.

Land Justice: Re-imagining Land, Food, and the Commons Justine M. Williams, Eric Holt-Giménez, 2017-06-22 In recent decades, the various strands of the food movement have made enormous strides in calling attention to the many shortcomings and injustices of our food and agricultural system. Farmers, activists, scholars, and everyday citizens have also worked creatively to

rebuild local food economies, advocate for food justice, and promote more sustainable, agroecological farming practices. However, the movement for fairer, healthier, and more autonomous food is continually blocked by one obstacle: land access. As long as land remains unaffordable and inaccessible to most people, we cannot truly transform the food system. The term land-grabbing is most commonly used to refer to the large-scale acquisition of agricultural land in Asian, African, or Latin American countries by foreign investors. However, land has and continues to be “grabbed” in North America, as well, through discrimination, real estate speculation, gentrification, financialization, extractive energy production, and tourism. This edited volume, with chapters from a wide range of activists and scholars, explores the history of land theft, dispossession, and consolidation in the United States. It also looks at alternative ways forward toward democratized, land justice, based on redistributive policies and cooperative ownership models. With prefaces from leaders in the food justice and family farming movements, the book opens with a look at the legacies of white-settler colonialism in the southwestern United States. From there, it moves into a collectively-authored section on Black Agrarianism, which details the long history of land dispossession among Black farmers in the southeastern US, as well as the creative acts of resistance they have used to acquire land and collectively farm it. The next section, on gender, explores structural and cultural discrimination against women landowners in the Midwest and also role of “womanism” in land-based struggles. Next, a section on the cross-border implications of land enclosures and consolidations includes a consideration of what land justice could mean for farm workers in the US, followed by an essay on the challenges facing young and aspiring farmers. Finally, the book explores the urban dimensions of land justice and their implications for locally-autonomous food systems, and lessons from previous struggles for democratized land access. Ultimately, the book makes the case that to

move forward to a more equitable, just, sustainable, and sovereign agriculture system, the various strands of the food movement must come together for land justice.

Why Are You Still Sending Your Kids to School? Blake Boles, 2020-05-19 For some kids, school offers a positive and engaging experience. For others, it's a boring, stressful, and frustrating waste of time. If your child is in the second category, why keep tormenting them? Instead, why not help them find an educational environment where they feel genuinely motivated, excited, and empowered? In this eye-opening book, Blake Boles makes the case for leaving conventional school and taking one of the many alternative paths through K-12 that exist today. He addresses parents' major concerns about unconventional education -- Can my kids still go to college? Will they still be employable? How will they learn to work hard? -- while highlighting the hidden benefits of self-directed learning, such as improved parent-child relationships, a more balanced decision-making process regarding college, and a heightened sense of autonomy and connection. Drawing upon 15 years of work as a mentor and guide for adolescents in alternative and experiential learning environments -- as well as his own unconventional life path -- Boles weaves together narrative, theory, and research to build a powerful argument for granting children unusual levels of freedom and responsibility.

The Resilient Farm and Homestead Ben Falk, 2013 A manual for developing durable, beautiful, and highly functional human habitat systems fit to handle an age of rapid transition, written by a land designer and site developer whose permaculture-research farm has drawn national attention.

One-Woman Farm Jenna Woginrich, 2013-01-01 A popular blogger and homesteader shares the joys, sorrows, trials, tribulations and blessings she experienced during a year spent farming on her own land, during which she found deep fulfillment in the practical tasks and timeless rituals of agricultural life.

Identity and Ideology in Digital Food Discourse Alla Tovaes, Cynthia Gordon, 2020-11-26 Exploring food-related interactions in various digital and cultural contexts, this book demonstrates how food as a discursive resource can be mobilized to accomplish actions of social, cultural, and political consequence. The chapters reveal how social media users employ language, images, and videos to construct identities and ideologies that both encompass and transcend food. Drawing on various discourse analytic frameworks to digital communication, contributors examine interactions across Facebook, Twitter, YouTube, and Instagram. From the multimodal discourse of a Korean livestreaming online eating show, to food activism in an English blogging community and discussions of a food-related controversy on Omani Twitter, this book shows how language and multimodal resources serve not only to communicate about food, but also as a means of accomplishing key aspects of everyday social life.

The Contrary Farmer's Invitation to Gardening Gene Logsdon, 1997 Gene Logsdon breaks down the garden walls and celebrates the side of gardening that isn't a finicky, style-obsessed, and expensive hobby but rather a hilarious, sensual, and endlessly satisfying way of life. The borders of the contrary garden are limited only by the imagination. Why should crops be merely common vegetables? Why not wheat? Why not the pigeons on the rafters of the barn, or bluegills and edible cattails from your own homestead pond? This is Gene Logsdon at his provocative best. Frequently irreverent, but always optimistic and practical, he uses the tools of good humor and common sense to

smash conventional gardening to smithereens.

Small Farms are Real Farms John Ikerd, 2008 Since the middle of the last century, American farm policy has taken the nation into the dead end of industrial farm production and food distribution. Farming, at its core a biological process, has been transformed into an industrial process, thus demolishing the economic and cultural values upon which the nation was founded. Along the way, small farms have been ridiculed and dismissed as inconsequential -- but now the seeds of a rural renaissance are being planted, not by these industrial behemoths, but by family-scale farms. In this collection of essays by one of America's most eloquent and influential proponents of sustainable agriculture, the multifaceted case for small farms is built using logic and facts.--Publisher's website.

The No-Till Organic Vegetable Farm Daniel Mays, 2020-11-10 No-till — a method of growing crops and providing pasture without disturbing the soil — has become an important alternative to standard farming practices. In this comprehensive guide to successful no-till vegetable farming for aspiring and beginning farmers, author Daniel Mays, owner and manager of an organic no-till farm in Maine, outlines the environmental, social, and economic benefits of this system. The methods described are designed for implementation at the human scale, relying primarily on human power, with minimal use of machinery. The book presents streamlined planning and record-keeping tools as well as marketing strategies, and outlines community engagement programs like CSA, food justice initiatives, and on-farm education.

The Death and Life of American Journalism Robert W. McChesney, John Nichols, 2011-07-12 Daily newspapers are closing across America. Washington bureaus are shuttering; whole areas of the federal government are now operating with no press coverage. International bureaus are going, going, gone. Journalism, the counterbalance to corporate and political power, the lifeblood of

American democracy, is not just threatened. It is in meltdown. In *The Death and Life of American Journalism*, Robert W. McChesney, an academic, and John Nichols, a journalist, who together founded the nation's leading media reform network, Free Press, investigate the crisis. They propose a bold strategy for saving journalism and saving democracy, one that looks back to how the Founding Fathers ensured free press protection with the First Amendment and provided subsidies to the burgeoning print press of the young nation.

Principles of Sustainable Soil Management in Agroecosystems Rattan Lal, B.A. Stewart, 2013-06-10
With the use of high-level soil management technology, Africa could feed several billion people, yet food production has generally stagnated since the 1960s. No matter how powerful the seed technology, the seedling emerging from it can flourish only in a healthy soil. Accordingly, crop yields in Africa, South Asia, and the Caribbean could be doubled or tripled through adoption of technologies based on laws of sustainable soil management. *Principles of Sustainable Soil Management in Agroecosystems* describes the application of these laws to enhance ecosystem services while restoring degraded soils and promoting sustainable use. With chapters contributed by world-class soil scientists, ecologists, and social scientists, this book outlines critical changes in management of agricultural soils necessary to achieve food security and meet the food demands of the present and projected future population. These changes include conversion to no-till and conservation agriculture; adoption of strategies of integrated nutrient management, water harvesting, and use of drip sub-irrigation; complex cropping/farming systems such as cover cropping and agroforestry; and use of nano-enhanced fertilizers. The book is based on the premise that it is not possible to extract more from a soil than what is put into it without degrading its quality. The strategy is to replace what is removed, respond wisely to what is changed, and be pro-active to what may happen because of

natural and anthropogenic perturbations. The chapters, which exemplify these ideas, cover a range of topics including organic farming, soil fertility, crop-symbiotic soil microbiota, human-driven soil degradation, soil degradation and restoration, carbon sink capacity of soils, soil renewal and sustainability, and the marginality principle.

Global Agriculture and the American Farmer Kimberly Ann Elliott, 2017-06-27 The United States is one of the world's largest producers and exporters of a range of agricultural commodities, and the largest provider of foreign assistance, so U.S. policies have big effects on global food security and other global public goods linked to agriculture. On the positive side of the ledger, President Obama created the Feed the Future aid initiative to promote agricultural development in poorer countries as a tool to achieve the global goals of ending hunger and extreme poverty, which are mostly rural. But that generosity is undercut by U.S. support for farmers that distorts global markets and ignores negative spillovers for the rest of the world. In this book, Elliott focuses on three policy areas that are particularly damaging for developing countries: traditional agricultural subsidy and trade policies that support the incomes of American farmers at the expense of farmers elsewhere; the biofuels mandate, which in its current form increases market volatility while doing little if anything to mitigate climate change; and weak regulation of antibiotic use in livestock, which contributes to the global spread of drug-resistant super bugs. While noting that broad reforms are needed to fix these problems, Elliott also identifies practical steps that U.S. policymakers could take in the relatively short run to improve farm policies—for American taxpayers and consumers as well as for the poor and vulnerable in developing countries.
