Managing Volunteers in Tourism Kirsten Holmes, Karen Smith, 2012-05-16 Recent years have seen an explosion in research on tourism volunteering. Volunteers are an essential part of tourism, whether they are volunteering in their local museum, at a sporting mega-event, as an airport ambassador, or travelling the global as a volunteer tourist. Managing Volunteers in Tourism reviews the latest research to highlight the key management issues and relate them to the tourism volunteering context. It includes previously under-researched forms of tourism volunteering such as meet-and-greeters, surf life-savers, conservation, festival, and information centre volunteers and volunTourists. The book develops through three distinct sections, the first of which begins by introducing the concept of volunteering and considering the variety of volunteer forms and settings within tourism. The next part picks up the organisational approach and examines volunteer program design and planning, volunteer motivation, recruitment and selection, training and development, reward and retention, and diversity management. The final part consists of ten case studies from leading international researchers and practitioners identifying best practice and key management challenges. Real-life examples and case studies throughout this book provide an in-depth examination of the challenges facing those managing tourism volunteers, making this book indispensable for current and future managers in the tourism industry.

**The Politics of Sport** Paul Gilchrist,Russell Holden,2013-09-13 Sport is an essential part of community structure, membership and identity. Whether on the field of play, in stadia, or on the streets, sport has consistently brought together disparate individuals to share culture, values and memories. Nowadays these relationships are being rewritten through the effects of global socio-economic practices, the interventions of government, the impact of cultural imperialism and, at the local level, through the actions of individuals and new constituencies that are emerging in response. Furthermore, this generates discourse on matters of regional and national identity. This themed issue presents a range of essays that examine the relationship between sport and society through the conceptual

lenses of community, mobility and identity. Drawing upon insights from contemporary history and current political phenomena from leading academic specialists in the field, the issue addresses cross-cutting themes such as loyalty and allegiance, migration and integration, identity and collective memory, and the politics of resistance and change, which will be of interest to the political scientist, the contemporary historian and sport scholar alike. This book was previously published as a special edition of the journal Sport in Society.
