ComSec Justin Carroll,Drew M.,2018-07-13 The most prolific, comprehensive, and intrusive mass surveillance device ever designed by man is the cellular phone you carry with you everywhere you go. This device tracks and collects a staggering amount of personal information. That valuable data is sold and stored indefinitely by a an equally staggering number of companies, government entities, and data brokers that you never knew even existed. How is this data being used, and how will it be used in the future? Communicating with loved ones, colleagues, and other people is a fundamental human necessity. In today's digital world, the ways in which we communicate are convenient, instant, and often happen without even thinking about the technology that makes it all possible. The privacy of our communications, our movements, and our thoughts are also a cornerstone of a free and open society. COMSEC uncovers the methods used by businesses, data brokers, and governments to harvest our data using the surveillance device that we allow into our lives in order to stay constantly connected. The authors share detailed first-hand knowledge about the tools, tradecraft, and techniques used to mitigate and eliminate the threats posed by tracking our communications. These same tactics, taught to covert law enforcement officers, military operatives, and the clandestine community, are explained here for anyone to adopt for their own personal communication strategy. COMSEC is a must read if private and secure communications is important to you. Choose the tactics appropriate for your threat model, or choose to take more extreme measures. If you are a government employee, service member deployed behind enemy lines, a journalist, activist, dissident, politician, shady character of any type, or a privacy advocate, COMSEC offers the tried and tested solutions that you need to know.

THE PROCTOR'S COVENANT David Namerow, 2022-03-18 "Daddy...Daddy..." Missy tugged at her father's sleeve trying to get his attention. "When are we going to see his head chopped off?" "Just be patient, sweetheart... The show will start very soon." Reluctantly she settled back, legs impatiently swinging over the edge of the seat as she waited for the curtain to rise on the third elaborately staged execution extravaganza staged this year in the Cavernium. The audience of more than 20,000 was a strange mixture of the wealthy dregs, each having paid \$2,000 per ticket. The tension was palpable, the thrum of anticipation filling the gargantuan space. Backstage, dancers, actors, technicians and assistants flittered and fretted in nervous circles of frenzy. On stage, a guillotine, designed as a surreal monolith, an impressionist construct hinting at death, horror, terror and the balancing forces of justice, community and security. The United States is no more. It is now the United Nation of Communities where geographic regions called Proctorates are each controlled and governed by Community Security Command, CommSec, headed by a Proctor. This is the story of the Midlant Proctorate, its Proctor Gelman Filias, and the struggle of the FLF, the Franklin Liberation Force, to destroy the tightening yoke of CommSec security demanded by the sheeple, those living in GateComms, gated communities, willing to sacrifice their freedoms to preserve their protected enclaves. The choices demanded by some of those involved include: Feldon Murphy who built a Ground Zero obelisk at the bottom of the shallow crater marking the spot on which Calia his wife had been vaporized by a tactical nuke, decided to also build FLF safe bunkers under his Pine Barrens Fish ponds. Delia Sleng who gave up being a GateComm snitch for CommSec to lead a group of armed housewives on a raid on their Detention & Interrogation facility to free their husbands. Captin Ralen Krause who chose to desert CommSec after learning his gay brother was responsible for gassing 31 people at a retirement party. Sulky, owner and opertor of Sulky's Palace of Pleasure, opens an on-site hospital for those wounded in the rebellion, converts her hedonistic paradise into Sulky's Funporium, a family vacation spot and amusement park, finally revealing her true identity to her father. Professor of Physics Asad Abbas who began designing customized explosives after his daughter, sodomized by prison guards, commits suicide. Mangiss Electro, the bearded Harley Hog rider drag queen, who rescued his friend, Gates Abonei, from a CommSec squad seeking revenge. Harri YoungSmith, head of the Franklin Liberation Force who chooses to ally himself with his greatest enemy in order to acheive a common goal. And Gelman Filias, who long before becoming the Midlantic Proctor, fell deeply in love with Keela, the free spirit who believed in the dream of an America reinvigorated by the independent spirit of the colonial dream. The depth of her commitment to those beliefs and her fierce strength of spirit enthralled and captivated him. Years after she was killed in a demonstration, and after becoming Proctor, her sister passes Keela's last message on to him: "Drive the flock of sheep hard enough to find those with the heart of a wolf." Inspired by this he makes a covenant that, if executed, will destroy the Proctorate, gambling on the independent citizenry to hit the reset button on a path to the country's new destiny.

Principles of Macroeconomics Asia-Pacific Edition with Online Study Tool S 12 Months Robin Ellen Stonecash, Jan Libich, Joshua Gans, Stephen King, N. Gregory Mankiw, Martin Byford, 2017-09-15 The brief and student-friendly approach of this book boils economics down to its essentials, by considering what is truly important for students to learn in their first course in economics. In keeping with the authors' philosophy of showing students the power of economic tools and the importance of economic ideas, this edition pays careful attention to regional and global policies and economic issues ' including the impacts of the ongoing global financial crisis, inflation, unemployment, interest rates, and monetary and fiscal policy. Continuing global financial uncertainty and the current state of the Australian economy provide a constant supply of new material, re-evaluated models, and policy changes and updates for the Principles of Macroeconomics text. The book emphasises the material that students should and do find interesting about the study of the economy, resulting in a focus on applications and policy, and less on formal economic theory. Principles of Macroeconomics, 7e encourages

students to make their own judgements by presenting both sides of the debate on five controversial issues facing policymakers: the proper degree of policy activism in response to the business cycle, the choice between rules and discretion in the conduct of monetary policy, the desirability of reaching zero inflation, the importance of balancing the government's budget, and the need for tax reform to encourage saving.

In the years ahead, we will no longer be too small to make a difference. In his book, Wesley points to the key economic and political issues that we need to be considering right now, as a western country geographically and economically tied to Asia, and urgently calls for a renewed public engagement and debate.

With his academic background, he was a surprise appointment to the position that he ended up holding for seven years. By 2006 Fairfax's earnings had doubled, costs were down and revenues were up; more importantly, in a highly competitive climate, Hilmer had restored the health of the flagging newspaper and publishing empire and built a digital platform.
