**Introducing Communication Research** Donald Treadwell,Andrea Davis,2019-07-15

Introducing Communication Research: Paths of Inquiry, Fourth Edition demystifies the theories and applications of communication research through its focus on methods in practice. Offering an overview of the research process with a focus on examples of research in real-world settings, Donald Treadwell and Andrea Davis introduce both quantitative and qualitative methods.

*Intercultural Communication* James W. Neuliep,2020-01-28 Intercultural Communication: A Contextual Approach introduces students to the fundamental topics, theories, concepts, and themes of intercultural communication. Best-selling author James W. Neuliep presents a clear model for examining communication within a variety of contexts, including cultural, microcultural, environmental, sociorelational, and perceptual. Each chapter focuses on one context and explores the combination of factors within that context, including setting, situation, and circumstances. The updated Eighth Edition

reflects the most recent research in the field and further incorporates the role of modern technology and its impact on intercultural communication. Included with this title: The password-protected Instructor Resource Site (formally known as SAGE Edge) offers access to all text-specific resources, including a test bank and editable, chapter-specific PowerPoint® slides.

**Operational and Medical Management of Explosive and Blast Incidents** David W. Callaway,Jonathan L. Burstein,2020-07-03 This book provides a comprehensive overview of the medical and operational management of blast and explosive incidents affecting civilian populations. It incorporates global lessons learned from first responders, emergency medicine providers, surgeons, intensivists, and military specialists with deep experience in handling blast injuries from point of injury through rehabilitation. The book

begins with background and introductory information on blast physics, explosion types, frequency, and perspectives from the military. This is followed by a section on prehospital management focusing on medical and trauma responses, triage, psychological consequences, and operational considerations. It then examines the roles of the emergency department and ICU with chapters on planning and training, surge capacity, resilience, management of common injury types, contamination, and ventilator strategies. The next section covers surgical treatment of a variety of blast injuries such as thoracoabdominal, extremity and vascular, and orthopedic injuries. The book then discusses medical treatment of various injury patterns including lung, abdominal, extremity, and traumatic brain injury. The final section of the book covers post-hospital considerations such as rehabilitation, mental health, and community resilience. Throughout, case studies of recent incidents provide real-life examples of operational and medical management. *Operational and Medical Management of Explosive and Blast Incidents* is an essential resource for physicians and related professionals, residents, nurses, and medical students in emergency medicine, traumatic surgery, intensive care medicine, and public health as well as civilian and military EMS providers.
