Financial Services Law and Compliance in Australia Gail Pearson,2009-03-18 'Financial services' is the fastest growing sector of the economy and has profound implications for individuals, corporations and government. Following extensive review in the last part of the twentieth century, Australia has now put in place an overarching system for regulating all financial services, replacing a system based on separate regulation of products in individual industries. Financial Services Law and Compliance in Australia provides a comprehensive account of the new regulatory structure and a detailed analysis of the new legislative framework, including discussion of the new regulatory bodies, the new licensing requirements for those wishing to enter the financial services market and the new obligations for those marketing or offering financial services to the public. This book is an essential resource for those working in, and advising on, financial services, students and those needing to understand the new regime as a whole.--Provided by publisher.

Mortgage Stressbusters Alex Brooks,2016-05-12 Dreaming of being debt free? Wondering what a tumultuous property market will mean for your financial future? Multiple Comparisons Alan J. Klockars,Gilbert Sax,1986-09 Describes the most important methods used to investigate differences between levels of an independent variable within an experimental design. Readers will learn not only how to conduct multiple comparisons in experimental designs but also how to better understand and evaluate published research. A highly readable introduction to multiple comparison methods, which demands little from its reader in the way of background other than some familiarity with analysis of variance. --The Statistician

Handbook of Research Methods in Public Administration, Second Edition Gerald J. Miller,1998-10-15 This comprehensive handbook covers a wide variety of quantitative methods used for research in public administration, public policy, and nonprofit management, including theory-building and testing, increasing the readers awareness and command of analytical tools critical to the resolution of complex problems. Providing bibliographic citations and over 370 tables, equations, and drawings, the book compares the function of quantitative techniques in past and present public administration literature and practices, furnishes information for visualizing, planning, and implementing research projects, and explores potential applications of quantitative public administration.

The SAGE Encyclopedia of Research Design Bruce B. Frey,2022-01-27 The SAGE Encyclopedia of Research Design maps out how one makes decisions about research design, interprets data, and draws valid inferences, undertakes research projects in an ethical manner, and evaluates experimental design strategies and results. From A-to-Z, this four-volume work covers the spectrum of research design strategies and topics including, among other things: fundamental research design principles, ethics in the research process, quantitative versus qualitative and mixed-method designs, completely randomized designs, multiple comparison tests, diagnosing agreement between data and models, fundamental assumptions in analysis of variance, factorial treatment designs, complete and incomplete block designs, Latin square and related designs, hierarchical designs, response surface designs, split-plot designs, repeated measures designs, crossover designs, analysis of covariance, statistical software packages, and much more. Research design, with its statistical underpinnings, can be especially daunting for students and novice researchers. At its heart, research design might be described simply as a formalized approach toward problem solving, thinking, and acquiring knowledge, the success of which depends upon clearly defined objectives and appropriate choice of statistical design and analysis to meet those objectives. The SAGE Encyclopedia of Research Design will assist students and researchers with their work while providing vital information on research strategies.

Data Analysis, Classification, and Related Methods Henk A.L. Kiers, Jean-Paul Rasson, Patrick J.F. Groenen, Martin Schader, 2012-12-06 This volume contains a selection of papers presented at the Seventh Conference of the International Federation of Classification Societies (IFCS-2000), which was held in Namur, Belgium, July 11-14, 2000. From the originally submitted papers, a careful review process involving two reviewers per paper, led to the selection of 65 papers that were considered suitable for publication in this book. The present book contains original research contributions, innovative applications and overview papers in various fields within data analysis, classification, and related methods. Given the fast publication process, the research results are still up-to-date and coincide with their actual presentation at the IFCS-2000 conference. The topics captured are: • Cluster analysis • Comparison of clusterings • Fuzzy clustering • Discriminant analysis • Mixture models • Analysis of relationships data • Symbolic data analysis • Regression trees • Data mining and neural networks • Pattern recognition • Multivariate data analysis • Robust data analysis • Data science and sampling The IFCS (International Federation of Classification Societies) The IFCS promotes the dissemination of technical and scientific information data analysis, classification, related methods, and their applications.

Postsecondary Participation and State Policy Mario C. Martinez, 2023-07-03 Research shows that all sectors of society, across age and racial groups, consider access to higher education as essential to achieving satisfying employment and a better quality of life. Yet there has been surprisingly little public discussion about recent major changes in higher education access and funding and no policy debate about how to respond to Americans' growing aspirations about college. This book stimulates debate by presenting research about future demand: changing patterns of postsecondary participation and census projections over the next fifteen years, and their implications for resources and funding. The author disaggregates state data, taking into account states' individual histories, size, age demographics, regional characteristics and priorities, to show the different policy options available. Rather than advancing any particular policy, the author aims to stimulate an informed discussion about alternative strategies to meet demand and increase access. What is the college population likely to look like in 2015? What are the projected patterns for traditional and adult students? What factors will influence enrollment in private or public institutions, or two- or four-year colleges? The authors set their analyses in the context of the public and private benefits of higher education. This volume presents multiple scenarios of future enrollment, and state-by-state comparisons, that are vital for setting priorities and determining the implications of increasing access to higher education.
