Finding North George Michelsen Foy, 2016-05-10 Navigation is the key human skill. It's something we do everywhere, whether feeling our way through a bedroom in the dark, or charting a ship's course. But how does navigation affect our brains, our memory, ourselves? Blending scientific research and memoir, and written in beautiful prose, *Finding North* starts with a quest by the author to understand this most basic of human skills---and why it's in mortal peril. In 1844, Foy's great-great grandfather, captain of a Norwegian cargo ship, perished at sea after getting lost in a snowstorm. Foy decides to unravel the mystery surrounding Halvor Michelsen's death--and the roots of his own obsession with navigation---by re-creating his ancestor's trip using only period instruments. Beforehand, he meets a colorful cast of characters to learn whether men really have better directional skills than women, how cells, eels, and spaceships navigate; and how tragedy results from GPS glitches. He interviews a cabby who has memorized every street in London, sails on a Haitian cargo sloop, and visits the site of a secret navigational cult in Greece. At the heart of Foy's story is this fact: navigation and the brain's memory centers are inextricably linked. As Foy unravels the secret behind Halvor's death, he also discovers why forsaking our navigation skills in favor of GPS may lead not only to Alzheimers and other diseases of memory, but to losing a key part of what makes us human.

**Taylor's Lives** Martha Banta, 1993 Scientific management: Technology spawned it, Frederick Winslow Taylor championed it, Thorstein Veblen dissected it, Henry Ford implemented it. By the turn of the century, practical visionaries prided themselves on having arrived at the one best way both to increase industrial productivity and to regulate the vagaries of human behavior. Nothing escaped the efficiency craze, and in this vivid, wide-ranging book, Martha Banta explores its effect on the culture at large. To the Taylorists, everything needed tidying up: government, business, warfare, households, and, most of all, the workplace, with its unruly influx of strangers into the native scenes. *Taylor's Lives* gives us a striking sense of what it was like to live, work, love, and die

when time, motion, and emotions were checked off on worksheets and management charts. Canvassing the culture, Banta shows how the cause of efficiency was taken up in narratives, of every sort - in mail-order catalogs, popular romances, newspaper stories, and personal testimonials from below, as well as in the canonical works of writers from Henry Adams and William James, to Sinclair Lewis, Nathanael West, and William Faulkner. The strategies of impassioned theorists and hands-on practitioners affected the kinds-of narratives produced in the controversy over the pros and cons of the management culture; they bear an eerie resemblance to the means by which we today, storytellers all, keep trying to make sense of our own chaotic times. This interdisciplinary work charts the development of a managerial culture from its start in the steel mills of Pennsylvania through its spread across the American experience in an interlocking series of social systems and everyday practices. Banta scrutinizes narrative strategies employed by inscribers as diverse as Josephine Goldmark, Theodore Roosevelt, Charlotte Perkins Gilman, Anzia Yezierska, Richard Harding Davis, Booker T. Washington, and Theodore Dreiser; by Taylor himself, as well as Veblen and Ford; by women who toiled on the factory floor; by writers of dream-copy for ready-made houses; and by Buster Keaton in his silent treatment of the dysfunctional honeymoon home. With its historical scope and its provocative readings of assorted narratives, this richly illustrated book offers a complex and disturbing picture of a period, as well as invaluable insights into the way theory-making continually makes and breaks cultures. A remarkable work, *Taylored Lives* confirms Martha Banta's place as one of our leading cultural and literary critics.
