Compass: A Story of Exploration and Innovation Alan Gurney, 2005-08-17 The compass's rocky evolution is charted with an enthusiast's passion...A fascinating adventure. —Bernadette Murphy, Los Angeles Times This is the rich history of the most important navigational device of all time, the magnetic compass, born of the need for a reliable means of negotiating treacherous sea routes around the globe. Compass chronicles the misadventures of those who attempted to perfect the instrument—so precious to sixteenth-century seamen that, by law, any man found tampering with one had his hand pinned to the mast with a dagger. Part history, part adventure, this book is a compelling tribute to human ingenuity—and the mysteries of the sea.

An American Sickness Elisabeth Rosenthal, 2018-03-13 A New York Times bestseller/Washington

Post Notable Book of 2017/NPR Best Books of 2017/Wall Street Journal Best Books of 2017 This book will serve as the definitive guide to the past and future of health care in America.”—Siddhartha Mukherjee, Pulitzer Prize-winning author of *The Emperor of All Maladies* and *The Gene* At a moment of drastic political upheaval, *An American Sickness* is a shocking investigation into our dysfunctional healthcare system - and offers practical solutions to its myriad problems. In these troubled times, perhaps no institution has unraveled more quickly and more completely than American medicine. In only a few decades, the medical system has been overrun by organizations seeking to exploit for profit the trust that vulnerable and sick Americans place in their healthcare. Our politicians have proven themselves either unwilling or incapable of reining in the increasingly outrageous costs faced by patients, and market-based solutions only seem to funnel larger and larger sums of our money into the hands of corporations. Impossibly high insurance premiums and inexplicably large bills have become facts of life; fatalism has set in. Very quickly Americans have been made to accept paying more for less. How did things get so bad so fast? Breaking down this monolithic business into the individual industries—the hospitals, doctors, insurance companies, and drug manufacturers—that together constitute our healthcare system, Rosenthal exposes the recent evolution of American medicine as never before. How did healthcare, the caring endeavor, become healthcare, the highly profitable industry? Hospital systems, which are managed by business executives, behave like predatory lenders, hounding patients and seizing their homes. Research charities are in bed with big pharmaceutical companies, which surreptitiously profit from the donations made by working people. Patients receive bills in code, from entrepreneurial doctors they never even saw. The system is in tatters, but we can fight back. Dr. Elisabeth Rosenthal doesn't just explain the symptoms, she diagnoses and treats the disease itself. In clear and practical terms, she spells out exactly how to

decode medical doublespeak, avoid the pitfalls of the pharmaceuticals racket, and get the care you and your family deserve. She takes you inside the doctor-patient relationship and to hospital C-suites, explaining step-by-step the workings of a system badly lacking transparency. This is about what we can do, as individual patients, both to navigate the maze that is American healthcare and also to demand far-reaching reform. *An American Sickness* is the frontline defense against a healthcare system that no longer has our well-being at heart.

Activating the Unemployed Neil Gilbert, Rebecca A. Van Voorhis, The last decade has witnessed a conspicuous alteration in policies protecting unemployed people in modern welfare states. Social policies are increasingly designed to encourage economic independence. Policy makers have introduced a wide range of reforms linking disability, unemployment, and welfare programs cash benefits to work-oriented measures. Welfare policies are being framed by a new emphasis on recipients' obligations, emphasizing that the receipt of benefits creates a responsibility to take action towards becoming self-reliant. The objective is to minimize the duration of dependence or improve the well-being of family or community. *Activating the Unemployed* addresses this growing interest in work-oriented measures. This represents a shift in the dominant discourse on social welfare from focus on the citizen's rights to social benefits to emphasis on their responsibilities to work and lead an active life. In this volume, a distinguished array of international contributors provide cross-cultural perspectives to analyze recent diverse policy initiatives to activate the unemployed in nine countries-

Britain, France, Italy, the Netherlands, New Zealand, Norway, Sweden, Switzerland, and the United States. Each provides a systematic account of the background, design, implementation, and results of employment-oriented measures. Collectively they permit comparison of organized responses to common problems in the areas of public assistance (welfare), unemployment, and disability, among others. Further chapters seek to broaden perspectives on policy options, the issues raised, and lessons learned in the course of activating the unemployed. This thorough and insightful account addresses significant contemporary issues and concerns about welfare, social security, and unemployment. It will aid policy makers, professionals, and scholars in assessing current trends in welfare in various countries throughout the world. Neil Gilbert is Chernin Professor of Social Services and Social Welfare at the University of California, Berkeley, and Director of the Center for Comparative Study of Family Welfare and Poverty Research. Dr. Gilbert served as a Senior Research Fellow for the United Nations Research Institute for Social Development in Geneva and was twice awarded Fulbright Fellowships to study European social policy. His numerous publications include 22 books and 100 articles that have appeared in the Wall Street Journal, The Public Interest, Society, Commentary, and other leading academic journals. Rebecca Van Voorhis is Assistant Professor in the Department of Sociology and Social Work at the State University of California, Hayward.

Archaeomagnetic Dating Jeffrey L. Eighmy, Robert Saul Sternberg, 1990 Archaeomagnetic dating—dating archaeological and geological materials by comparing their magnetic data with known changes in the earth's magnetic field—has proved to be of increasing reliability in establishing

behavioral and social referents of archaeological data. Now this volume presents the first book-length treatment of its theory and methodology in North American archaeology. The sixteen original papers in many cases represent the work of individuals who have been intimately involved with the development and refinement of archaeomagnetic dating techniques. They discuss the geophysical underpinnings of archaeomagnetism; general methodological problems associated with present archaeomagnetic studies, such as sample collection, data measurement and analysis, and experimental control; and advances in experimental archaeology. Case histories consider both successful and unsuccessful applications of the technique in New World fieldwork. Raw data is provided in an appendix. While the volume deals specifically with problems of archaeomagnetic direction dating in the Americas, it should prove useful in constructing exact chronologies in other archaeological sites as well and in the geologic record at large. As the only single volume devoted to the subject, it will serve as the standard reference in the field.

Current Ornithology Richard Johnston, 2012-12-06 Volume 5 of this series continues its coverage of currently active research fields in ornithology. Because an editor can never be a disinterested observer of his or her own editorial efforts, any claim for superiority of this volume is not without conflict of interest. Even so, Volume 5 has certain merits that even a parent should acknowledge, and I find the current chapters not merely timely and authoritative but compelling in their demand for a reader's attention. Wolfgang and Roswitha Wiltschko provide a perceptive review of magnetic orientation in birds, a piece dedicated to Fritz Merkel, the pioneer in studies of magnetic orientation. Sergei Kharitonov and Doug Las Siegel-Causey are concerned with the behavioral ecology of seabird coloniality, emphasizing their field experiences in the USSR and the United States. Ted Miller examines the application of studies of bird behavior to comparative biology, pursuing the interface of

behavior and evolutionary biology adumbrated by Konrad Lorenz in the 1930s. Jeremy Raynor gives us a summary of the work over the past decade on bird flight, which is not, by turns, as complex or as simple as we had formerly believed. Carrol Henderson describes recent developments in nongame bird conservation, based on his pioneering work in the State of Minnesota. Alan Kamil discusses optimal experimental design for research in ornithology, a field in which experimental work is frequently difficult to pursue.
