Having a well-formed body with the right amount of body fat takes a lot of hard work and commitment; this is something none can dispute. What we can dispute, however, is the fact that to get that nice toned body you need to spend thousands of hours in the gym 'hitting' weights as if your life depended on it. We live in a world where to make ends meet, the conventional person has to work a 9-5 job-sometimes even multiple jobs-not to mention the many hours we spend in transit or stuck in traffic jams-the average person loses 42 hours a year to traffic jams. As such, making time for the gym may not be feasible. Does this mean that just because you cannot make your way to the gym, you should let the fat accumulate and the muscles waste away? Definitely NO! While strength training is an ideal way to sculpt your body and you should schedule some consistent gym time into your schedule, if you cannot make it to the gym, there are exercises you can practice to enjoy the benefits of strength training without having to go to the gym. Calisthenics is one such type of exercise. But what are calisthenics and how can you get started on the practice? Complete 12 Month Workout Plan Andrea Raimondi,2021-01-06 You will find the detail of my training protocol lasting a total of 52 weeks, 12 months of training, at the end of which it is possible to continue, resuming a certain phase that better fit your needs. This macrocycle is divided into four main phases: a break-in or adaptation phase lasting 8 weeks suitable for those who have just started training or for those who resume

activity after a period of rest. This is followed by an 8 weeks strength phase in which we try to increase overall strength. After the strength phase, very expensive for the body, follows a recovery phase lasting 4 weeks. The last mesocycle of the protocol consists of the hypertrophy phase lasting 12 weeks, in which the workouts will be aimed at gaining muscle mass. At the end of the period of hypertrophy it is good to insert a recovery period of another 4 weeks. At this point you have to decide based on your goals and restart with a cycle of strength or with another cycle of hypertrophy. In first case restart 8 weeks of strength phase, 4 weeks of recovery and another 8 weeks of strength phase. If your goal is hypertrophy you can continue with 12 weeks of hypertrophy protocol and 4 weeks of recovery protocol.

Finding Time For Fitness Is Never Easy, But Home Training Could Provide The Answer! From assembling a few pieces of basic training equipment, to setting up a complete gym in a room in your house, at-home workouts could be the key to your fitness. Home Fitness entails exactly what it implies: executing your personal fitness routine while at home using a variety of different techniques. Home fitness has been in our lives for decades – and it's taken on a new role since the Covid-19 pandemic closed gyms around the world. Whether it's a yoga class on Zoom or panic-buying a Peloton, many of us are trying to find ways to exercise effectively within four walls. Whether you are looking to improve your cardiovascular system, lose weight, gain lean muscle mass, or just stay active, in-home training has a place in your life. And the benefits of staying fit are no secret: Improvements in cardiovascular and respiratory health, better regulation of blood sugar, the potential to reduce or eliminate prescription medications (such as for diabetes or blood pressure), weight loss, reduction in cancer risk, and improved musculoskeletal strength are some of the better-known. But when you're working out at home, you're

responsible for the whole plan: What exercises should you do? How many reps of each? How often should you rest? Are you feeling a cardio workout? An upper-body workout? Or do you want to fit in a total body workout instead? For many of us, answering all these questions is an added stress we'd rather avoid right now. And the good news is that's something you can avoid—without skipping your workout. We are about to show you an immaculate at-home workout program that take the guesswork out for you and will give you the whole exercise plan.
