Connecting the Dots John Chambers,Diane Brady,2018-09-25

Silicon Valley visionary John Chambers shares the lessons that transformed a dyslexic kid from West Virginia into one of the world's best business leaders and turned a simple router company into a global tech titan. When Chambers joined Cisco in 1991, it was a company with 400 employees, a single product, and about \$70 million in revenue. When he stepped down as CEO in 2015, he left a \$47 billion tech giant that was the backbone of the internet and a leader in areas from cybersecurity to data center convergence. Along the way, he had acquired 180 companies and turned more than 10,000 employees into millionaires. Widely recognized as an innovator, an industry leader, and one of the world's best CEOs, Chambers has outlasted and outmaneuvered practically every rival that ever tried to take Cisco on--Nortel, Lucent, Alcatel, IBM, Dell, and Hewlett-Packard, to name a few. Now Chambers is sharing his unique strategies for winning in a digital world. From his early lessons and struggles with dyslexia in West Virginia to his bold bets and battles with some of the biggest names in tech, Chambers gives readers a playbook on how to act before the market shifts, tap customers for strategy, partner for

growth, build teams, and disrupt themselves. He also adapted those lessons to transform government, helping global leaders like French President Emmanuel Macron and Indian Prime Minister Narendra Modi to create new models for growth. As CEO of JC2 Ventures, he's now investing in a new generation of game-changing startups by helping founders become great leaders and scale their companies. Connecting the Dots is destined to become a business classic, providing hard-won insights and critical tools to thrive during the accelerating disruption of the digital age.

Connect the Dots Keith Calabrese,2020-05-05 Liar & Spy meets The Parker Inheritance in this whimsically complex story about human connection and the power we all have to determine our own fate. Is there anything more random than middle school? Sixth graders Oliver and Frankie don't think so. Their first few

weeks have been full of weirdness -- lunchtime thievery, free beef jerky, and Matilda, the mysterious new girl who knows everything about them, but has a lot to learn about making friends. But what if none of it is random at all? What if a reclusive genius is keeping an eye on them and making sure the tiny pieces of his puzzle fall into place, one by one, until strange, seemingly unconnected incidents snowball totally out of control? Imagine the odds! First a cardamom shortage takes down the school bully. Then a giant dog leads to some extracurricular spying. Soon Oliver is being followed and Matilda is hacking the FBI. And by the time they discover a gang of angry clowns and the world's largest game of Mousetrap, an insanely brilliant plan has been set in motion that will change their lives forever. *Connect the Dots* is an intricately plotted story about the power of human connection and a chain of coincidences so serendipitous they must be destiny at work.

Connect the Dots Tricia Taylor,Nina Dibner,2019-09-27

Connecting the Dots presents three key interconnected areas of focus that will have the most impact on teaching and learning. 1. Building Strong Relationships: creating a sense of belonging, establishing norms and high expectations; and understanding barriers, like unconscious bias and misconceptions, in order to break them down 2. Maximising Memory: managing cognitive load, using effective learning strategies, planning for long term retention and application of knowledge 3. Cultivating Learning Mindsets: building self-efficacy; developing metacognitive skills; and using feedback, goal setting and talk effectively Each of these three chapters lays out the research worth knowing and applies that research to ready-to-use teaching tools for real classrooms. The chapters conclude with detailed guides to support leadership in creating personalised professional learning sessions to turnkey these concepts to school staff. Connecting the Dots is a book for

educators by educators. Conceived by lead author Tricia Taylor, who started as a teacher in the US but has been teaching in UK schools for nearly two decades as well as running her consultancy, Tailored Practice, and co-authored by Nina Dibner a veteran US educator and founder of PowerTools, an American educational consulting firm, *Connecting the Dots* offers a transcontinental lens.
