Foundations of Programming Languages Kent D. Lee, 2017-12-10 This clearly written textbook provides an accessible introduction to the three programming paradigms of object-oriented/imperative, functional, and logic programming. Highly interactive in style, the text encourages learning through practice, offering test exercises for each topic covered. Review questions and programming projects are also presented, to help reinforce the concepts outside of the classroom. This updated and revised new edition features new material on the Java implementation of the JCoCo virtual machine. Topics and features: includes review questions and solved practice exercises, with supplementary code and support files available from an associated website; presents an historical perspective on the models of computation used in implementing the programming languages used today; provides the foundations for understanding how the syntax of a language is formally defined by a grammar; illustrates how programs execute at the level of assembly language, through the implementation of a stack-based Python virtual machine called JCoCo and a Python disassembler; introduces object-oriented languages through examples in Java, functional programming with Standard ML, and programming using the logic language Prolog; describes a case study involving the development of a compiler for the high level functional language Small, a robust subset of Standard ML. Undergraduate students of computer science will find this engaging textbook to be an invaluable guide to the skills and tools needed to become a better programmer. While the text assumes some background in an imperative language, and prior coverage of the basics of data structures, the hands-on approach and easy to follow writing style will enable the reader to quickly grasp the essentials of programming languages, frameworks, and architectures.

**Programming Languages** Kent D. Lee, 2008-12-15 Programming Languages: An Active Learning Approach introduces students to three programming paradigms: object-oriented/imperative languages using C++ and Ruby, functional languages using Standard ML, and logic programming using Prolog. This interactive textbook is intended to be used in and outside of class. Each chapter follows a pattern of presenting a topic followed by a practice exercise or exercises that encourage students to try what they have just read. This textbook is best-suited for students with a 2-3 course introduction to imperative programming. Key Features: (1) Accessible structure guides the student through various programming languages. (2) Seamlessly integrated practice exercises. (3) Classroom-tested. (4) Online support materials. Advance praise: "The Programming Languages book market is overflowing with books, but none like this. In many ways, it is precisely the book I have been searching for to use in my own programming languages course. One of the main challenges I perpetually face is how to teach students to program in functional and logical languages, but also how to teach them about compilers. This book melds the two approaches very well." -- David Musicant, Carleton College

**Disaster Response Practices** Michael Madigan, 2024-02-13 This book provides guidelines for emergency managers, responders, and health care professionals to establish a mass casualty/mass fatality (MC/MF) management plan. It identifies a need for a stronger and more global management structure for MC/MF events that includes standardized practices of identification, disposition, and possible repatriation to restore the situation to pre-event levels. This book covers this comprehensive process including disaster mortuary operational response teams (DMORTs), simple triage and rapid treatment (START) and national nurse response teams. It also demonstrates leadership in MC/MF events within government agencies, the public sector and international organizations featuring case studies, scenario questions and summaries of lessons learned.

**Developing Sustainable and Energy-Efficient Software Systems** Artem Kruglov,Giancarlo Succi,2023-02-06 This open access book provides information how to choose and collect the appropriate metrics for a software project in an organization. There are several kinds of metrics, based on the analysis of source code and developed for different programming paradigms such as structured programming and object-oriented programming (OOP). This way, the book follows three main objectives: (i) to identify existing and easily-collectible measures, if possible in the early phases of software development, for predicting and modeling both the traditional attributes of software systems and attributes specifically related to their efficient use of resources, and to create new metrics for such purposes; (ii) to describe ways to collect these measures during the entire lifecycle of a system, using minimally-invasive monitoring of design-time processes, and consolidate them into conceptual frameworks able to support model building by using a variety of approaches, including statistics, data mining and computational intelligence; and (iii) to present models and tools to support design time evolution of systems based on design-time measures and to empirically validate them. The book provides researchers and advanced professionals with methods for understanding the full implications of alternative choices and their relative attractiveness in terms of enhancing system resilience. It also explores the simultaneous use of multiple models that reflect different system interpretations or stakeholder perspectives.

**Immigration Practice - 15th Edition** Robert C. Divine,2014-06-01 Immigration Practice guides readers through all aspects of immigration law in one volume, complete with over 3,000 footnote citations to the wide range of statutes, regulations, court and administrative cases, policy memos, operations instructions, agency interpretive letters, and internet sites that a lawyer needs for complete understanding of a particular problem. No other source merges the practical with commentary and analysis so helpfully. The book explains in understandable language and meaningful and dependable detail the substantive issues and the practical procedures a lawyer needs to handle a specific immigration matter, complete with checklists of forms, supporting evidence, and other strategies needed for application/petition packages. The book has unparalleled coherence, integration and consistency. \* Liberally cross references to other sections in the book where related topics are discussed (because so many topics are interrelated). \* Line-by-line instructions on how to complete the most commonly used forms to avoid embarrassing mistakes. \* Lists the contents of packages to file with government agencies: forms and fees, detailed support letters, and other supporting evidence. \* Explanations of potentially applicable visa options organized according to the attributes of the foreign national (and the employer), rather than classifications in alphabetical order, so that practitioners can make sense of options in light of the client in the office. \* Comparisons and charts of attributes and procedures of such topics as nonimmigrant visa classifications, procedures to permanent residence, and standards of extreme hardship. \* Citations throughout the book, and collection in the extensive CD-ROM Appendix, to primary source materials and the most useful Internet site URLs with explanation of the increasingly helpful free databases and tools available through each one. • Internet Links: Constantly increased and updated links to government web sites containing current contact information, forms, primary law sources of all types, case status information, and processing and substantive guides--all referenced by pinpoint citations in the text. See Chapter 5 explaining sources of law, Appendix C and D-1 showing web links, and the CD-ROM in the back cover providing one-click access! Readers are strongly encouraged to review and use the CD-ROM and to consider saving Appendix C, D-1, and E-1 into their hard drives or saving the links to their internet browser favorites or bookmarks for ready reference all the time. • Upgraded removal-related treatment: significant improvements to Chapters 10, 11, and 16 by attorney who has worked for immigration courts several years. • Supreme Court decisions: effects of limited marijuana distribution offense as aggravated felony (§ 10-6(b)(1)(vi)); tax offenses as aggravated felonies (§ 10-6(b)(1)(vi)); rejection of comparable grounds rule for 212(c) eligibility (§ 10-6(b)(1)(vii)); modified categorical approach applies only to divisible statutes (§ 10-6(b)(2)(i)); non-retroactivity of Padilla decision (§ 10-6(b)(2)(vi)); rejection of the statutory counterpart rule for § 212(c) waivers (§ 11-5(f)); invalidation of the Defense of Marriage Act § 14-7(a)(2)(i)); non-imputation to child of firm resettlement of parents (§ 16-4(c)). • Lower federal court decisions: concerning such issues as: recognizing a beneficiary to have standing to challenge a USCIS petition denial (§ 2-2(a)(1)(I)); reviewability of good moral character determinations and other (§ 2-2(a)(1)(I)); court order of USCIS to speed up FOIA certain responses (§ 4-2); CBP FOIA process (§ 4-2); DOL case disclosure data (§ 4-5); need to exhaust remedies under DHS TRIP to challenge inclusion on watch list (§ 10-3); CIMT crime determinations (§ 10-6(b)(1)(iii)); effect of a single firearm sale (§ 10-6(b)(1)(vi)); 212(h) waiver eligibility in regard to post-entry adjustment but not as to stand alone request (§ 10-6(b)(3)); interference with police helicopter using laser light as CIMT (§ 10-6(c)); whether post-entry adjustment is an admission for § 212(h) waivers (§ 10-6(b)(3)); whether there is an involuntariness or duress exception to the terrorism support bar (§ 10-6(c)); enforcement of I-864 financial support obligations (§ 10-6(d)(2)); mandatory bond hearing after six months of detention (§ 11-3(f)); ICE detainers found to lack authority (§ 11-3(g)); representation in immigration court at government expense for aliens with serious mental disabilities (§ 11-4(g)); stop-time and petty offense exceptions relating to cancellation of removal (§ 11-5(f)); revelation of the BIA's erroneous reliance for decades on nonexistent provisions of Mexican Constitution affecting legitimation issues (§ 12-3(d)(3)); rejection of BIA's rule against nunc pro tunc adoption orders (§ 14-7(b)(3)); invalidation of FSBPT efforts to restrict applicants from certain countries to sit for physical therapy exams (§ 15-2(c)(2)); use of impeachment evidence only to terminate asylum (16-2(b)); asylum claims of German homeschoolers, and mixed motive cases (§ 16-4(a)(3)); social group asylum claims (§ 16-4(a)(3)); expansive implications of inconsistencies in testimony (§ 16-4(a)(4)); particularly serious crimes barring asylum claims (§ 16-4(c)); special asylum procedures for unaccompanied children (§ 16-4(c)); adjustment eligibility of alien who entered without inspection and then obtained TPS (§ 16-7(a)(6)); eligibility of after-acquired spouse under Cuban Adjustment Act (§ 16-7(e)); preempted state law provisions aimed at aliens, employers, and landlords (§ 19-4(l)(3)). • BIA decisions on such issues as: what constitutes a drug trafficking crime (§ 10-6(b)(1)(iv)); implications of child pornography conviction (§ 10-6(b)(1)(vi)); possession of ammunition by a convicted felon (§ 10-6(b)(1)(vi)); availability of stand-alone § 212(h) waiver without adjustment application (§ 10-6(b)(3)); service of NTA on a minor (§ 11-3(b)); service of NTA and other safeguards for aliens with serious mental conditions (§ 11-4(g)); approval of administrative closure of removal cases (§ 11-5(d)); termination of asylum, then removal and relief in proceedings (§16-2(b)); relocation

*Developments in the Call Centre Industry* Julia Connell, John Burgess, 2006-09-27 Over the past ten years there has been a massive growth in call centres worldwide. These centres are said to represent the most dynamic growth area in white-collar employment internationally since the mid 1990s. Yet the footloose and global nature of the industry means that jobs will always be susceptible to outsourced operations, ICT developments, public sector subsidization of business restructuring and re-location, and cheaper operations elsewhere. This book conducts a thorough analysis of this modern phenomenon.
