Song Translation: Lyrics in Contexts Johan Franzon,Annjo K. Greenall,Sigmund Kvam,Anastasia Parianou,2021-02-01 Song Translation: Lyrics in Contexts grew out of a project dedicated to the translation of song lyrics. The book aligns itself with the tradition of descriptive translation studies. Its authors, scholars from Finland, Great Britain, Greece, Italy, Norway and Sweden, all deal with the translation of song lyrics in a great variety of different contexts, including music and performance settings, (inter)cultural perspectives, and historical backgrounds. On the one hand, the analyses demonstrate the breadth and diversity of the concept of translation itself, on the other they show how different contexts set up conditions that shape translational practices and products in different ways. The book is intended for translation studies scholars as well as for musicologists, students of language and/or music and practicing translators; in short, anybody interested in this creative and fascinating field of translational practice.

<u>Graduate Employability Across Contexts</u> Tran Le Huu Nghia,Binh Chi Bui,Jasvir Kaur Nachatar Singh,Vinh N. Lu,2022-09-02 This book explores stakeholders' perspectives, their practices, and engagement with enacting the employability agenda in the context of a rapidly changing world. It explains the need for developing graduate employability under socioeconomic, cultural, and political pressure exposed to the higher education sector. Largely framed within Bourdieu's concepts of social field, habitus, and capital, it explores international stakeholders' perspectives and experiences with graduate employability agenda in different contexts, which serves as a point of reference for the adoption of such initiatives. Based on empirical evidence, the authors develop a new graduate employability framework seeing it as a lifelong process, denote the relationships between types of employability capital, and shed light on the consequences of different strategies to translate employability capital to employment and career outcomes. Overall, this book generates both theoretical and practical insights which help to advance employability programs, better prepare the future workforce, and anticipate turbulence in the labour markets.

<u>Spectacular Listening</u> Byrd McDaniel,2024 In ways both mundane and sensational, listening can be an expressive act, enabling people to stage consumption as a public practice -- what author Byrd McDaniel calls spectacular listening. With a range of compelling ethnographic case studies, McDaniel investigates a broad shift in contemporary listening norms and the stakes for listeners with disabilities. He reveals how listening-as-performance can be an opportunity for play, as well as a critical practice that exposes ableism in music institutions, technologies, and discourse.

Writing Song Lyrics Glenn Fosbraey,Andrew Melrose,2019-03-15 This book is unique in offering practical advice on writing song lyrics within a critically informed framework. Part I provides the theoretical underpinning, while Part II covers the creative process, pulling together all the best songwriting advice and offering practical exercises. Fusing creative guidance with rigorous criticism, this is an essential companion for undergraduate and postgraduate students of songwriting, creative writing and music. Lively and accessible, it is a one-stop shop for all aspiring songwriters.

<u>Advances in Knowledge Discovery and Management</u> Fabrice Guillet,Bruno Pinaud,Gilles Venturini,Djamel Abdelkader Zighed,2012-12-30 The recent and novel research contributions collected in this book are extended and reworked versions of a selection of the best papers that were originally presented in French at the EGC'2011 Conference held in Brest, France, on January 2011. EGC stands for Extraction et Gestion des connaissances in French, and means Knowledge Discovery and Management or KDM. KDM is concerned with the works in computer science at the interface between data and knowledge; such as Data Mining, Knowledge Discovery, Business Intelligence, Knowledge Engineering and Semantic Web. This book is intended to be read by all researchers interested in these fields, including PhD or MSc students, and researchers from public or private laboratories. It concerns both theoretical and practical aspects of KDM. This book has been structured in two parts. The first part, entitled "Data Mining, classification and queries", deals with rule and pattern mining, with topological approaches and with OLAP. The second part of the book, entitled "Ontology and Semantic", is related to knowledge-based and user-centered approaches in KDM.

Automated Reasoning with Analytic Tableaux and Related Methods Neil V. Murray,2003-07-31 This book constitutes the refereed proceedings of the International Conference on Analytic Tableaux and Related Methods, TABLEAUX'99, held in Saratoga Springs, NY, USA, in June 1999. The volume presents 18 revised full papers and three system descriptions selected from 41 submissions. Also included are system comparisons and abstracts of an invited paper and of two tutorials. All current issues surrounding mechanization of reasoning with tableaux and similar methods are addressed – ranging from theoretical foundations to implementation and systems development and applications, as well as covering a broad variety of logic calculi. As application areas, formal verification of software and computer systems, deductive databases, knowledge representation, and systems diagnosis are covered.

System Architecture Wolfgang J. Paul,Christoph Baumann,Petro Lutsyk,Sabine Schmaltz,2016-10-04 The pillars of the bridge on the cover of this book date from the Roman Empire and they are in daily use today, an example of conventional engineering at its best. Modern commodity operating systems are examples of current system programming at its best, with bugs discovered and fixed on a weekly or monthly basis. This book addresses the question of whether it is possible to construct computer systems that are as stable as Roman designs. The authors successively introduce and explain specifications, constructions and correctness proofs of a simple MIPS processor; a simple compiler for a C dialect; an extension of the compiler handling C with inline assembly, interrupts and devices; and the virtualization layer of a small operating system kernel. A theme of the book is presenting system architecture design as a formal discipline, and in keeping with this the authors rely on mathematics for conciseness and precision of arguments to an extent common in other engineering fields. This textbook is based on the authors' teaching and practical experience, and it is appropriate for undergraduate students of electronics engineering and computer science. All chapters are supported with exercises and examples.

<u>Justice and the Social Context of Early Middle High German Literature</u> Robert G. Sullivan,2014-03-05 This book argues that far from preaching traditional, otherworldly ideals, the authors or these religious works were deeply engaged in the social, political, and spiritual issues that characterized the Holy Roman Empire at a time of radical transformation.

The Poetics of American Song Lyrics Charlotte Pence,2012-01-01 The Poetics of American Song Lyrics is the first collection of academic essays that regards songs as literature and that identifies intersections between the literary histories of poems and songs. The essays by well-known poets and scholars including Pulitzer Prize winner Claudia Emerson, Peter Guralnick, Adam Bradley, David Kirby, Kevin Young, and many others, locate points of synthesis and separation so as to better understand both genres and their crafts. The essayists share a desire to write on lyrics in a way that moves beyond sociological, historical, and autobiographical approaches and explicates songs in relation to poetics. Unique to this volume, the essays focus not on a single genre but on folk, rap, hip hop, country, rock, indie, soul, and blues. The first section of the book provides a variety of perspectives on the poetic history and techniques within songs and poems, and the second section focuses on a few prominent American songwriters such as Bob Dylan, Bruce Springsteen, and Michael Stipe. Through conversational yet in-depth analyses of songs, the essays discuss sonnet forms, dramatic monologues, Modernism, ballads, blues poems, confessionalism, Language poetry, Keatsian odes, unreliable narrators, personas, poetic sequences, rhythm, rhyme, transcription methods, the writing process, and more. While the strategies of explication differ from essay to essay, the nexus of each piece is an unveiling of the poetic history and poetic techniques within songs.

The Ugaritic Baal Cycle Mark S. Smith,1994 The Ugaritic Baal Cycle, Volume II provides a new edition,

translation and commentary on the third and fourth tablets of the Baal Cycle, the most important religious text found at Ugarit.

Christopher Smart's English Lyrics Rosalind Powell,2016-05-23 In the first full-length study of Christopher Smart's translations and the place and function of translation in Smart's poetry, Rosalind Powell proposes a new approach to understanding the relationship between Smart's poetics and his practice. Drawing on translation theory from the early modern period to the present day, this book addresses Smart's translations of Horace, Phaedrus and the Psalms alongside the better-known religious works such as Jubilate Agno and A Song to David. Five recurrent threads run throughout Powell's study: the effect of translation on the identity of a narrative voice in a rewritten text; the techniques that are used to present translated texts to a new literary, cultural and linguistic readership; performance and reading contexts; the translation of great works as an attempt to achieve literary permanence; and, finally, the authorial influence of Smart himself in terms of the overt religiosity and nationalism that he champions in his writing. In exploring Smart's major translation projects and revisiting his original poems, Powell offers insights into classical reception and translation theory; attitudes towards censorship; expressions of nationalism in the period; developments in liturgy and hymnody; and the composition of children's books and school texts in the early modern era. Her detailed analysis of Smart's translating poetics places them within a new, contemporary context and locality to uncover the poet's works as a coherent project of Englishing.

Hispano-Arabic Literature and the Early Provencal Lyrics J. A. Abu-Haidar,2013-12-16 As the distinctive contribution of Islamic Spain to Arabic literature, the strophic muwashshahand zajal are still viewed by some as a development from putative Romance prototypes. No less than seven theories of origin of the Provençal lyrics have been proffered, foremost among them being the Arabic origins theory. This book lets the strophic muwashshah tell its own tale of a natural development in the context of classical Arabic literature.

Advanced Methods, Techniques, and Applications in Modeling and Simulation Jong-Hyun Kim,Kangsun Lee,Satoshi Tanaka,Soo-Hyun Park,2012-10-04 This book is a compilation of research accomplishments in the fields of modeling, simulation, and their applications, as presented at AsiaSim 2011 (Asia Simulation Conference 2011). The conference, held in Seoul, Korea, November 16-18, was organized by ASIASIM (Federation of Asian Simulation Societies), KSS (Korea Society for Simulation), CASS (Chinese Association for System Simulation), and JSST (Japan Society for Simulation Technology). AsiaSim 2011 provided a forum for scientists, academicians, and professionals from the Asia-Pacific region and other parts of the world to share their latest exciting research findings in modeling and simulation methodologies, techniques, and their tools and applications in military, communication network, industry, and general engineering problems.

Aggregation Functions in Theory and in Practise Humberto Bustince Sola,Javier Fernandez,Radko Mesiar,Tomasa Calvo,2013-06-20 This volume collects the extended abstracts of 45 contributions of participants to the Seventh International Summer School on Aggregation Operators (AGOP 2013), held at Pamplona in July, 16-20, 2013. These contributions cover a very broad range, from the purely theoretical ones to those with a more applied focus. Moreover, the summaries of the plenary talks and tutorials given at the same workshop are included. Together they provide a good overview of recent trends in research in aggregation functions which can be of interest to both researchers in Physics or Mathematics working on the theoretical basis of aggregation functions, and to engineers who require them for applications.
