Understanding Context Andrew Hinton,2014-12-02 To make sense of the world, we're always trying to place things in context, whether our environment is physical, cultural, or something else altogether. Now that we live among digital, always-networked products, apps, and places, context is more complicated than ever—starting with where and who we are. This practical, insightful book provides a powerful toolset to help information architects, UX professionals, and web and app designers understand and solve the many challenges of contextual ambiguity in the products and services they create. You'll discover not only how to design for a given context, but also how design participates in making context. Learn how people perceive context when touching and navigating digital environments See how labels, relationships, and rules work as building blocks for context Find out how to make better sense of cross-channel, multi-device products or services Discover how language creates infrastructure in organizations, software, and the Internet of Things Learn models for figuring out the contextual angles of any user experience

Meaning, Context and Methodology Sarah-Jane Conrad,Klaus Petrus,2017-10-23 What methodological impact does Contextualism have on the philosophy of language? This collection sets out to provide some answers. The authors in this volume question three ultimately connected assumptions of the philosophy of language. The first assumption relates to the predominant status of referential semantics and its power to explain truth-conditional meaning. This assumption has come under attack by the context thesis and a number of papers pursue the question of whether this is justified. The second assumption gives priority to assertive sentences when considering language use. The context thesis changes our understanding of language use altogether; possible implications from this methodological shift are addressed in this volume. According to the third assumption, philosophical analysis amounts to nothing more than conceptual analysis. The context thesis risks undermining this project. Whether conceptual analysis can still be defended as a methodological tool is discussed in this volume.

Context in Language Learning and Language Understanding Kirsten Malmkjær,John Williams,1998-10-08 The papers in this volume represent varied views on the role of context in language learning.

Calling in Context Susan L. Maros,2022-04-19 I don't care for vocational books written in the United States; they're too American. When Susan Maros heard this comment from a Malaysian colleague, she was initially taken aback. Isn't the concept of calling universal? Why wouldn't resources with a biblical perspective on vocation apply to everyone? The reality is that each of us encounters our questions of calling from within a particular context. In this paradigm-shifting book, Maros explores how various dimensions of social location—including race, ethnicity, culture, socioeconomic status, and gender—shape our assumptions and experiences with vocation. Maros helps Christians in the United States in particular see how ideas about calling that emphasize certainty, career paths, and personal achievement arise from cultural priorities that shouldn't go unexamined, such as individualism, productivity, and meritocracy. She explains how unexamined mental maps can distort our perspective and refocuses our attention on biblical insights about calling as a lifelong journey. In the process, she helps us find both clarity and encouragement to explore the paths before us. God calls all people, yes—but calling is not a monolithic concept. Filled with numerous stories from Christians in diverse communities, Calling in Context invites anyone exploring questions of calling to find fresh possibilities in their own identity and engagement with God's mission. Reflection questions and Bible study prompts are included throughout.

The Problem of Context Roy Dilley,1999 The apparently simple notion that it is contextualization and invocation of context that give form to our interpretations raises important questions about context definition. Moreover, different disciplines involved in the elucidation and interpretation of meanings construe context indifferent ways. How do these ways differ? And what analytical strategies are adopted in order to suggest that the relevant context is self-evident? The notion of context has received less attention than is due such a central, key concept in social anthropology, as well as in

other related disciplines. This collection of contributions from a group of leading social anthropologists and anthropological linguists addresses the question of how the idea of context is constructed, invoked, and deployed in the interpretations put forward by social anthropologists. The ethnographic focus embraces peoples from regions such as Bali, Europe, Malawi, and Zaire. Primarily theoretical in its aims, the work also draws on expertise from anthropological linguistics and philosophy in order to set the issue as much in a comparative disciplinary perspective as in a comparative cross-cultural one. R.M. Dille is Senior Lecturer in Social Anthropology at the University of St Andrews.

Context Herbert L. Meiselman, 2019-04-20 *Context: The Effects of Environment on Product Design and Evaluation* addresses the environment, or context, in which we consume products and the impact of context on choice and acceptability. The book explores what context is, how it influences design by specialists, and acceptance by consumers. Chapters discuss the basics of context, food and drink in context, testing a range of other products, and other contextual variables. Historically, research on context has been done in the laboratory and various natural locations, but rapid growth in other methods to study context, including evoked contexts, immersive contexts, virtual reality contexts, and more have widened research possibilities. Appealing to the professional, academic and commercial markets, this book will be of interest to those who conduct research in product development and product testing, to those who study what controls product usage, including eating from the health perspective, and to those who make decisions about product and space development. Explores information on how context works and how to assess its influence on product decisions. Discusses the basics of context, food and drink in context, and testing other products in context, including personal care products and home and workspace design. Identifies variables that contribute to the contextual experience.

Fast and Efficient Context-Aware Services Danny Raz, Arto Tapani Juhola, Joan Serrat-Fernandez, Alex Galis, 2006-05-01 *Fast and Efficient Context-Aware Services* gives a thorough explanation of the state-of-the-art in Context-Aware-Services (CAS). The authors describe all major terms and components of CAS, defining context and discussing the requirements of context-aware applications and their use in 3rd generation services. The text covers the service creation problem as well as the network technology alternatives to support these services and discusses active and programmable networks in detail. It gives an insight into the practical approach followed in the CONTEXT project, supplying concrete guidelines for building successful context-aware services. *Fast and Efficient Context-Aware Services*: * Provides comprehensive and in-depth information on state-of-the-art CAS technology. * Proposes a system architecture for CAS creation and delivery, discussing service management and active network layers. * Describes the service lifecycle functional architecture, covering service authoring, customization, invocation, and assurance. * Explains system design considerations and details, system evaluation criteria, test-bed requirements, and evaluation results. *Fast and Efficient Context-Aware Services* is an invaluable resource for telecommunications developers, researchers in academia and industry, advanced students in Computer Science and Electrical Engineering, telecoms operators, as well as telecommunication management and operator personnel.

Theologies of the Gospel in Context David Schnasa Jacobsen, 2017-08-25 Many preachers and teachers of preaching talk about the gospel; few name it. *Theologies of the Gospel in Context* assembles a gifted group of homiletics who think that preachers need to be able to articulate the gospel not in general, but in a certain time and place, in context. They consider what gospel sounds like for people under oppression, in capitalist economies, in neocolonial contexts, for survivors of trauma, and for disestablished mainline churches marred by racism. Preachers will appreciate these preacher/scholars' desire to articulate the gospel with clarity, especially since the term is so often left unexplained. Homiletics will see a new genre of doing their work as teachers and researchers in preaching: a vision that helps preaching see itself not just as an adjunct to exegesis or

communication, but a place of doing theology. In these pages homiletics is more than technique, it is a truly theological discipline.

Texts in Context David Boucher, 2012-12-06 The methodology of the study of the history of political thought is an area of study which has occupied my interests for nearly a decade. I was introduced to the subject in University College, Swansea. My teachers there provided me with an excellent grounding in political studies. I am particularly indebted to Bruce Haddock, Peter Nicholson and W. H. Greenleaf. Professor Greenleaf was kind enough to supply me with a copy of his bibliography and copies of two of his unpublished papers. I continued to pursue my interest in methodology at the London School of Economics and Political Science. I am indebted to Ken Minogue and Robert Orr who taught me there. My greatest debt is to Dr. Joseph Femia of the University of Liverpool who devoted a great deal of time to considering the arguments presented here. His criticisms and suggestions for improvement proved to be invaluable. I would also like to thank Alan Ryan for his general comments and encouraging advice. It would be remiss of me if I neglected to express my gratitude to Dewi Beynon who was my first teacher of politics. The research for this project was carried out in the following places; The British Library of Political Science, London; The Sidney Jones Library, University of Liverpool; The National Library of Scotland, Edinburgh; The Main Library, University of Edinburgh; The Arts and Social Science Library, University College, Cardiff; and the Bodleian Library, Oxford.

Vagueness in Context Stewart Shapiro, 2006-01-05 Stewart Shapiro's aim in *Vagueness in Context* is to develop both a philosophical and a formal, model-theoretic account of the meaning, function, and logic of vague terms in an idealized version of a natural language like English. It is a commonplace that the extensions of vague terms vary with such contextual factors as the comparison class and paradigm cases. A person can be tall with respect to male accountants and not tall (even short) with respect to professional basketball players. The main feature of Shapiro's account is that the extensions (and anti-extensions) of vague terms also vary in the course of a conversation, even after the external contextual features, such as the comparison class, are fixed. A central thesis is that in some cases, a competent speaker of the language can go either way in the borderline area of a vague predicate without sinning against the meaning of the words and the non-linguistic facts. Shapiro calls this open texture, borrowing the term from Friedrich Waismann. The formal model theory has a similar structure to the supervaluationist approach, employing the notion of a sharpening of a base interpretation. In line with the philosophical account, however, the notion of super-truth does not play a central role in the development of validity. The ultimate goal of the technical aspects of the work is to delimit a plausible notion of logical consequence, and to explore what happens with the sorites paradox. Later chapters deal with what passes for higher-order vagueness - vagueness in the notions of 'determinacy' and 'borderline' - and with vague singular terms, or objects. In each case, the philosophical picture is developed by extending and modifying the original account. This is followed with modifications to the model theory and the central meta-theorems. As Shapiro sees it, vagueness is a linguistic phenomenon, due to the kinds of languages that humans speak. But vagueness is also due to the world we find ourselves in, as we try to communicate features of it to each other. Vagueness is also due to the kinds of beings we are. There is no need to blame the phenomenon on any one of those aspects.

Context in Communication: A Cognitive View Gabriella Airenti, Marco Cruciani, Alessio Plebe, 2017-04-03 Context is what contributes to interpret a communicative act beyond the spoken words. It provides information essential to clarify the intentions of a speaker, and thus to identify the actual meaning of an utterance. A large amount of research in Pragmatics has shown how wide-ranging and multifaceted this concept can be. Context spans from the preceding words in a conversation to the general knowledge that the interlocutors supposedly share, from the perceived environment to features and traits that the participants in a dialogue attribute to each other. This last category is also very broad, since it includes mental and emotional states, together with culturally constructed knowledge, such as the reciprocal identification of social roles and positions. The assumption of a cognitive point of view brings to the foreground a number of new questions regarding how information about the context is organized in the mind and

how this kind of knowledge is used in specific communicative situations. A related, very important question concerns the role played in this process by theory of mind abilities (ToM), both in typical and atypical populations. In this Research Topic, we bring together articles that address different aspects of context analysis from theoretical and empirical perspectives, integrating knowledge and methods derived from Philosophy of language, Linguistics, Cognitive Science, Cognitive Neuroscience, Developmental and Clinical Psychology.

The Common European Sales Law in Context Gerhard Dannemann, Stefan Vogenauer, 2013-03-21 European Contract Law unification projects have recently advanced from the Draft Common Frame of Reference (2009) to a European Commission proposal for an optional Common European Sales Law (2011) which is to facilitate cross-border marketing. This book investigates for the first time how CESL and DCFR rules would interact with various aspects of domestic law, represented by English and German law. Nineteen chapters, co-authored by British and German scholars, examine such interface issues for eg pre-contractual relationships, notions of contract, formation, interpretation, and remedies, extending to non-discrimination, third parties, transfers or rights, aspects of property law, and collective proceedings. They go beyond a critical analysis of CESL and DCFR rules by demonstrating where and how CESL rules would interact with neighbouring areas of English and German law before English and German courts, how domestic traditions might influence the application, which aspects might motivate sellers and buyers to choose or reject CESL, and which might serve as model for national legislators. The findings are summarized in the final two chapters.

Given World and Time Tyrus Miller, 2008-10-10 The interconnections of time with historical thought and knowledge have come powerfully to the fore since the 1970s. An international group of scholars, from a range of fields including literary theory, history of ideas, cultural anthropology, philosophy, intellectual history and theology, philology, and musicology, address the matter of time and temporalities. The volume's essays, divided into four main topical groups question critically the key problem of context, connecting it to the problem of time. Contexts, the essays suggest, are not timeless. Time and its contexts are only partly given to us: to the primordial donations of time and world correspond our epistemic, moral, and practical modes of receiving what has been granted. The notion of context may have radically different parameters in different historical, cultural, and disciplinary situations. Topics include the deep antiquity, and the timeless time of eternity, as well as formal philosophies of history and the forms of histories implicit in individual and community experience. The medium specific use of time and history are examined with regard to song, image, film, oral narration, and legal discourse.

Europe in a Global Context Anne Sophie Krossa, 2017-09-16 Rethinking familiar frameworks and exploring new perspectives, this book provides a much-needed analysis of European culture, society and politics in a global context. With contributors from across the social sciences and the humanities, this book highlights key topics and assesses the open ended question of Europe's place in a global age.

Within the Context of No Context George W. S. Trow, 1997 Written originally for a special issue of *The New Yorker* and reissued here with a new forward by the author, *Within the Context of No Context* is George W. S. Trow's brilliant exposition on the state of American culture and twentieth-century life. Published to widespread acclaim, *Within the Context of No Context* became an immediate classic and is, to this day, a favorite work of writers and critics alike. Both a chilling commentary on the times in which it was written and an eerie premonition of the future, Trow's work locates and traces, describes and analyzes the components of change in contemporary America -- a culture increasingly determined by the shallow worlds of consumer products, daytime television, and celebrity heroes. This elegant little book is essential reading for anyone interested in the demise, the terminal silliness, of our culture. -- John Irving, *The New York Times Book Review*; In this elegant, poignant essay, written with the grace of a master stylist, George Trow articulates the accelerated impermanence of American culture with a precision that is both flaunting and devastating. -- Rudy Wurlitzer; *Within the Context of No Context* is a masterpiece of the century that belongs on a shelf next to Theodore Adorno's *Minima Moralia* and Guy

Debord's *The Society of the Spectacle*. -- Michael Tolkin; *Within the Context of No Context* may appear to be a book of the mind, for it is suffused with such a keen intelligence, but it is actually a book of the heart -- passionate, brave, and stirring. -- Sue Halpern.

Depression in Context Christopher R. Martell, Michael E. Addis, Neil S. Jacobson, 2001 This book represents one of the last contributions of Neil Jacobson to the study of depression. At the time of his death he, Christopher Martell, and Michael Addis had just begun writing. In fact, they had spent several years discussing behavioral approaches to treating depression and had been collaborating on one of the largest clinical trials for depression comparing behavioral activation to cognitive therapy and medication. Preliminary findings suggest that treating depression by helping to activate people (behavioral activation) is just as effective as helping them to change their thinking (cognitive therapy). Behavioral activation is a positive approach to treating depression. Within this framework, the therapist helps clients to see depression not as something inside of them but as a natural consequence of the way they cope with the shifting contexts of daily life. There is no search for mental illness, skill deficits or distortions in thinking. Rather, the therapist coaches the client to engage in activities that will lead to a more rewarding life. This book is arranged in three parts. Part I reviews theories of depression and various treatments for depression, particularly pharmacological treatments, cognitive therapy and behavioral therapy. Part II describes the behavioral activation treatment approach and provides ample case transcript material. Part III looks at problems that can arise in therapy and at future opportunities for the use of behavioral activation.

Out of Context Daniel Balderston, 1993-03-12 By providing the historical context for some of the writer's best-loved and least understood works, this study gives us a new sense of Borges' place within the context of contemporary literature.
