White Tiger Alicia Marquis,2016-09-23 White Tiger: Amazing Photos & Interesting Facts Book about White Tiger The White Tiger is one of the most special animals in the world. It is a member of the family of big cats and is a cousin of lions, cheetahs, jaguars, and panthers. It is a subspecies of the Bengal tigers - subspecies means that they are like siblings because they have almost the same physical traits. However, unlike the Bengal tigers that have orange fur and black stripes, the White Tiger has white fur and black stripes. White Tigers look majestic, but they have a sad story. Because of their unique skin color, some people keep them in circuses and theme parks to make money out of them. Many of them that are sick and are not pretty are taken for granted. Luckily, scientists and animal protectors are doing their best to keep them safe, and educate everyone about their importance.

Methods For Monitoring Tiger And Prey Populations K. Ullas Karanth,James D. Nichols,2017-10-26 This book addresses issues of monitoring populations of tigers, ungulate prey species and habitat occupancy, with relevance to similar assessments of large mammal species and general biodiversity. It covers issues of rigorous sampling, modeling, estimation and adaptive management of animal populations using cutting-edge tools, such as camera-traps, genetic identification and Geographic Information Systems (GIS), applied under the modern statistical approach of Bayesian and likelihood-based inference. Of special focus here are animal survey data derived for use under spatial capture-recapture, occupancy, distance sampling, mixture-modeling and connectivity analyses. Because tigers are an icons of global conservation, in last five decades,enormous amounts of commitment and resources have been invested by tiger range countries and the conservation community for saving wild tigers. However, status of the big cat remains precarious. Rigorous monitoring of surviving wild tiger populations continues to be essential for both understanding and recovering wild tigers. However, many tiger monitoring programs lack the necessary rigor to generate the reliable results. While the deployment of technologies, analyses, computing power and human-resource investments in tiger monitoring have greatly progressed in the last couple of decades, a full comprehension of their correct deployment has not kept pace in practice. In this volume, Dr. Ullas Karanth and Dr. James Nichols, world leaders in tiger biology and quantitative ecology, respectively, address this key challenge. The have collaborated with an extraordinary array of 30 scientists with expertise in a range of necessary disciplines - biology and ecology of tigers, prey and habitats; advanced statistical theory and practice; computation and programming; practical field-sampling methods that employ technologies as varied as camera traps, genetic analyses and geographic information systems. The book is a 'tour de force' of cutting-edge methodologies for assessing not just tigers but also other predators and their prey. The 14 chapters here are lucidly presented in a coherent sequence to provide tiger-specific answers to fundamental questions in animal population assessment: why monitor, what to monitor and how to monitor. While highlighting robust methods, the authors also clearly point out those that are in use, but unreliable. The managerial dimension of tiger conservation described here, the task of matching monitoring objectives with skills and resources to integrate tiger conservation under an adaptive framework, also renders this volume useful to wildlife scientists as well as conservationists.

Among Tigers K. Ullas Karanth,2022-11-01 Today ten times more tigers live in captivity than survive in the wild. For over five decades, K. Ullas Karanth has been engaged in the struggle to bring wild tigers back from the brink in India, their last remaining wild stronghold. He tells the story of the tiger itself—its incredible biology, its critical role in shaping natural ecosystems of Asia, and the unique place it holds in our collective imagination. Among Tigers is the story of how we wound up with fewer than 5,000 wild tigers, and how, with focused efforts we can grow that population ten times or more in a few decades. In doing so, we would bring not only the world's largest and most beloved feline back from the brink, but also save countless other species that share the tigers habitats from the freezing forests of Siberia to the tropics of India. Karanth shares the adventurous real-life story of his quest to save a species and, along the way, the hopeful realization that tiger conservation is a battle that can be won. Ultimately, the book is a roadmap showing us how to not only to save the greatest of great cats, but to bring it roaring back at numbers never before seen in our lifetimes.

LIFE Tigers LIFE Magazine,2021-04-02 Tigers are the largest and most powerful of the big cats, spiritual symbols of strength and courage. This special edition of LIFE tells the rich story of these extraordinary animals, exploring why they capture our imagination and how they fit into our current world. Life in the Valley of Death Alan Rabinowitz,2008-01-15 Dubbed the Indiana Jones of wildlife science by The New York Times, Alan Rabinowitz has devoted—and risked—his life to protect nature's great endangered mammals. He has journeyed to the remote corners of the earth in search of wild things, weathering treacherous terrain, plane crashes, and hostile governments. Life in the Valley of Death recounts his most ambitious and dangerous adventure yet: the creation of the world's largest tiger preserve. The tale is set in the lush Hukaung Valley of Myanmar, formerly known as Burma. An escape route for refugees fleeing the Japanese army during World War II, this rugged stretch of land claimed the lives of thousands of children, women, and soldiers. Today it is home to one of the largest tiger populations outside of India—a population threatened by rampant poaching and the recent encroachment of gold prospectors. To save the remaining tigers, Rabinowitz must navigate not only an unforgiving landscape, but the tangled web of politics in Myanmar. Faced with a military dictatorship, an insurgent army, tribes once infamous for taking the heads of their enemies, and villagers living on less than one U.S. dollar per day, the scientist and adventurer most comfortable with animals is thrust into a diplomatic minefield. As he works to balance the interests of disparate factions and endangered wildlife, his own life is threatened by an incurable disease. The resulting story is one of destruction and loss, but also renewal. In forests reviled as the valley of death, Rabinowitz finds new life for himself, for communities haunted by poverty and violence, and for the tigers he vowed to protect.

The Massillon Tigers David Lee Morgan, Jr.,2020-09-08 After playing 4 quarters of hard-fought football games, the Massillon Tiger football team gathered in a circle at the center of every football field they played on in 2019 to do 15 pushups—a pushup for every game it would take to lead them to the State Championship game. The mantra for the season became: 15 for 15. Each pushup is represented as a chapter in this book and a different piece of the puzzle that explains the football town of Massillon, Ohio. In this dramatic and entertaining book, Author and Tiger running back coach, David Lee Morgan, Jr. shares stories that offer a unique and unequalled perspective into the 2019 season and the Tigers' quest for that elusive state championship. The Massillon Tiger football program isn't a typical high school football program. It's a ministry of football with the first season dating back to 1894. In this small, midwestern Ohio rust belt town, the community has rallied around this team every Friday at the historic Paul Brown Tiger Stadium (capacity 16,000) for decades. The school has produced numerous NFL standouts, including coaching legend and Hall of Famer Paul Brown. The Massillon support, locally and nationwide, is unrivaled and is arguably one of the most recognizable and successful high school football programs in the country. The Massillon Tigers: 15 for 15 is the next generation's Friday Night Lights—the powerful tale of one of the most storied high school football programs anywhere in the country and their magical 2019 season, as told by an award-winning author and journalist who enjoyed unlimited access to the players, coaches, and families through his role as the running backs coach.
