**Controlling Immigration** James F. Hollifield,Philip L. Martin,Pia M. Orrenius,François Héran,2022-09-27 The fourth edition of this classic work provides a systematic, comparative assessment of the efforts of major immigrant-receiving countries and the European Union to manage migration, paying particular attention to the dilemmas of immigration control and immigrant integration. Retaining its comprehensive coverage of nations built by immigrants—the so-called settler societies of the United States, Canada, Australia and New Zealand—the new edition explores how former imperial powers—France, Britain and the Netherlands—struggle to cope with the legacies of colonialism, how social democracies like Germany and the Scandinavian countries balance the costs and benefits of migration while maintaining strong welfare states, and how more recent countries of immigration in Southern Europe—Italy, Spain, and Greece—cope with new found diversity and the pressures of border control in a highly integrated European Union. The fourth edition offers up-to-date analysis of the comparative politics of immigration and citizenship, the rise of reactive populism and a new nativism, and the challenge of managing migration and mobility in an age of pandemic, exploring how countries cope with a surge in asylum seeking and the struggle to integrate large and culturally diverse foreign populations.

Research Anthology on Improving Health Literacy Through Patient Communication and Mass Media Management Association, Information Resources,2021-07-16 Increasing health literacy among patients is a difficult task as medical jargon and healthcare directions can be overwhelming and difficult to comprehend. In today's digital world, people are more connected than ever before and have the ability to find healthcare information in a way

that was not possible in recent years. Mass media and social media have become particularly influential in conveying health information to the public. With the amount of misinformation being spread, coupled with poor health literacy skills, it is imperative that new strategies and policies are undertaken to ensure that patients and the general public receive accurate information and are appropriately educated in order to provide them with the best possible knowledge and care. The Research Anthology on Improving Health Literacy Through Patient Communication and Mass Media provides an overview of the importance of health literacy and the various means to achieve health literacy for patients using several strategies and elements such as patient communication and mass media. The book covers health awareness challenges that have been faced recently and historically and pushes for better patient-provider communication. The book also examines the use of social media, virtual support groups, and technological tools that aid in the facilitation of health knowledge. Covering a range of key topics such as patient safety, health illiteracy, and eHealth, this anthology is crucial for healthcare professionals, researchers, academicians, students, and those interested in understanding the importance of health literacy and how it connects to media and communication.

**Communicating Rare Diseases and Disorders in the Digital Age** Costa, Liliana Vale,Oliveira, Sónia,2020-01-03 A primary concern of rare disease diagnosis is the lack of accurate information that may lead to delayed interventions, administering inaccurate treatments, and social consequences. Health communication continues to be one-way and rely on the expertise from the health practitioner. In such a broad spectrum of rare diseases, patients may find it difficult to obtain timely information, accurate diagnosis, and appropriate treatments, surgeries, medications, or psychological counseling in their own countries. The use of information and communication technologies can create new communication channels that address this lack of knowledge. *Communicating Rare Diseases and Disorders in the Digital Age* is an essential reference source that uses computer-mediated communication to improve patient knowledge when afflicted or dealing with rare health conditions. Featuring research on topics such as support networking, eHealth management, and social computing, this book is ideally designed for health practitioners, physicians, patients, medical administrators, nurses, surgeons, infectious disease educators, hospital directors, world health organizations, academicians, students, and researchers seeking coverage on current advances in health communication, computer science, and epidemiology.

*Ambition and Failure in Stuart England* Ian Atherton,1999 The Second World War and the German Occupation remain a major focal point in French culture and society, with new and sometimes controversial titles published every year - Irène Némirovsky's *Suite française* and Jonathan Littell's *Les Bienveillantes*, both rapidly translated into English, offer just two examples of this significant phenomenon. Gathering within one volume studies of genres, visual cultures, chronology, narrative theory, and a wealth of narratives in fiction and film, *Framing narratives of the Second World War and occupation in France 1939-2009* brings together an internationally distinguished group of contributors and offers an authoritative overview of criticism on war and occupation narratives in French, a

redefinition of the canon of texts and films to be studied and a vibrant demonstration of the richness of the work in this area. Now available in paperback, the book includes contributions by William Cloonan, Richard J Golsan, Leah Hewitt, Colin Nettelbeck and Gisèle Sapiro

*Evolució y complejidad* Jordi Bascompte Sacrets,Bartolome Luque Serrano,2012-07 Les espècies evolucionen, canvien amb el pas del temps i així ho va constatar i argumentar Charles Darwin. El que té entre les mans és una obra que intenta integrar dues grans visions de l'evolució que sovint es presenten enfrontades. D'una banda, la visió que emfatitza la contingència, els accidents congelats i la irreversibilitat, i determina una ciència eminentment històrica. De l'altra, la visió més racional, basada en la comprensió dels processos d'auto-organització semblants als d'altres sistemes físics allunyats de l'equilibri termodinàmic, i que determina una ciència estructuralista. El resultat és una visió més rica i plural del fenomen evolutiu, en la qual es posen en evidència els paradigmes clàssics. Una revisió acurada de la visió més ortodoxa de l'evolució a la recerca d'explicacions teòriques que van més enllà dels límits de la biologia.
