Michele Bousquet, Michael McCarthy

*Copy Paste* Adrien Ravon, Diana Ibáñez López, Why Factory, 2017 New! A new face! A new style! Worldwide, there is talk of a cult of novelty. This is also true in architecture, where architects compete against each other in terms of innovation and originality. The Why Factory does things differently, and in *Copy Paste*, it explores the possibilities of copying in architecture. What are the really original ideas in architecture? Isn't it better to ask what someone adds to the existing repertoire and then to evaluate that? In science, it is common to define originality in that respect. This type of attitude seems to be a taboo in architecture. So now the time has come to stop this obsessive pursuit of unique authorship. The Why Factory brings together diverse viewpoints on the dilemma of copying in architecture, along with the ethical and legal obligations. This book contains a versatile guide to copying, and explores the potential by means of a broad set of scenarios with the help of various tools.

*Copy Paste* Joe La Pompe, 2016-10 Taking a second look at advertising campaigns: revealing reproductions, trumpeting creativity, and inspiring all to look just a little closer. Books about advertising are supposed to be a source of inspiration, yet here is one that takes the opposite tack. Not that the dozens of adverts compiled here are bad--au contraire. They have been presented at major industry conferences and some have even won awards--but because many of them are, knowingly or not, reproductions. Whether that is the result of deliberate plagiarism or unlucky coincidence remains an open question. You are free to judge for yourself.

**Go H\*ck Yourself** Bryson Payne, 2022-01-18 Learn firsthand just how easy a cyberattack can be. *Go Hack Yourself* is an eye-opening, hands-on introduction to the world of hacking, from an award-winning cybersecurity coach. As you perform common attacks against yourself, you'll be shocked by how easy they are to carry out--and realize just how vulnerable most people really are. You'll be guided through setting up a virtual hacking lab so you can safely try out attacks without putting yourself or others at risk. Then step-by-step instructions will walk you through executing every major type of attack, including physical access hacks, Google hacking and reconnaissance, social engineering and phishing, malware, password cracking, web hacking, and phone hacking. You'll even hack a virtual car! You'll experience each hack from the point of view of both the attacker and the target. Most importantly, every hack is grounded in real-life examples and paired with practical cyber defense tips, so you'll understand how to guard against the hacks you perform. You'll learn: How to practice hacking within a safe, virtual environment How to use popular hacking tools the way real hackers do, like Kali Linux, Metasploit, and John the Ripper How to infect devices with malware, steal and crack passwords, phish for sensitive information, and more How to use hacking skills for good, such as to access files on an old laptop when you can't remember the password Valuable strategies for protecting yourself from cyber attacks You can't truly understand cyber threats or defend against them until you've experienced them firsthand. By hacking yourself before the bad guys do, you'll gain the knowledge you need to keep you and your loved ones safe.

**Digital Sound Studies** Mary Caton Lingold, Darren Mueller, Whitney Trettien, 2018-10-26 The digital turn has created new opportunities for scholars across disciplines to use sound in their scholarship. This volume's contributors provide a blueprint for making sound central to research, teaching, and dissemination. They show how digital sound studies has the potential to transform silent, text-centric cultures of communication in the humanities into rich, multisensory experiences that are more inclusive of diverse knowledges and abilities. Drawing on multiple disciplines—including rhetoric and composition, performance studies, anthropology, history, and information science—the contributors to Digital Sound Studies bring digital humanities and sound studies into productive conversation while probing the assumptions behind the use of digital tools and technologies in academic life. In so doing, they explore how sonic experience might transform our scholarly networks, writing processes, research methodologies, pedagogies, and knowledges of the archive. As they demonstrate, incorporating sound into scholarship is thus not only feasible but urgently necessary. Contributors. Myron M. Beasley, Regina N. Bradley, Steph Ceraso, Tanya Clement, Rebecca Dowd Geoffroy-Schwinden, W. F. Umi Hsu, Michael J. Kramer, Mary Caton Lingold, Darren Mueller, Richard Cullen Rath, Liana M. Silva, Jonathan Sterne, Jennifer Stoeve, Jonathan W. Stone, Joanna Swafford, Aaron Trammell, Whitney Trettien

*Fight Write* Carla Hoch, 2019-06-11 Whether a side-street skirmish or an all-out war, fight scenes bring action to the pages of every kind of fiction. But a poorly done or unbelievable fight scene can ruin a great book in an instant. In *Fight Write* you'll learn practical tips, terminology, and the science behind crafting realistic fight scenes for your fiction. Broken up into Rounds, trained fighter and writer Carla Hoch guides you through the many factors you'll need to consider when developing battles and brawls. • In Round 1, you will consider how the Who, When, Where, and Why questions affect what type of fight scene you want to craft. • Round 2 delves into the human factors of biology (think fight or flight and adrenaline) and psychology

(aggression and response to injuring or killing another person). • Round 3 explores different fighting styles that are appropriate for different situations: How would a character fight from a prone position versus being attacked in the street? What is the vocabulary used to describe these styles? • Round 4 considers weaponry and will guide you to select the best weapon for your characters, including nontraditional weapons of opportunity, while also thinking about the nitty-gritty details of using them. • In Round 5, you'll learn how to accurately describe realistic injuries sustained from the fights and certain weapons, and what kind of injuries will kill a character or render them unable to fight further. By taking into account where your character is in the world, when in history the fight is happening, what the character's motivation for fighting is, and much more, you'll be able write fight scenes unique to your plot and characters, all while satisfying your reader's discerning eye.

Its powerful Biped module, with pre-linked and realistically constrained skeletons and its suite of motion tools, dramatically speeds up the animation process. The easy-to-follow instructions in this book will have you animating your own characters in just a few hours.
