Learning Through Visual Displays Gregory Schraw, Matthew T. McCrudden, Daniel Robinson, 2013-07-01 The purpose of the volume is to explore the theory, development and use of visual displays and graphic organizers to improve instruction, learning and research. We anticipate five sections that address (1) frameworks for understanding different types of displays, (2) research-tested guidelines for constructing displays, (3) empirically-based instructional applications, (4) using displays to promote research and theory development, and (5) using displays to report test and research data to improve consumer understanding. Authors represent a variety of perspectives and areas of expertise, including instructional psychology, information technology, and research methodologies. The volume is divided into four sections. Section 1 provides a conceptual overview of previous research, as well as the contents of the current volume. Section 2 includes theoretical perspectives on the design and instructional uses of visual displays from major theorists in the field. These chapters discuss ways that visual displays enhance general cognition and information processing. Section 3 provides eight chapters that address the use of visual displays to enhance student learning. These chapters provide examples of how to organize content and use visual displays in a variety of ways in the real and virtual classroom. Section 4 includes three chapters that discuss ways that visual displays may enhance the research process, but especially improved data display.

Cut/Copy/Paste Whitney Trettien, 2022-02-15 How do early modern media underlie today's digital creativity? In *Cut/Copy/Paste*, Whitney Trettien journeys to the fringes of the London print trade to uncover makerspaces and collaboratories where paper media were cut up and reassembled into radical, bespoke publications. Bringing these long-forgotten objects back to life through hand-curated digital resources, Trettien shows how early experimental book hacks speak to the contemporary conditions of digital scholarship and publishing. As a mixed-media artifact itself, *Cut/Copy/Paste* enacts for readers what Trettien argues: that digital forms have the potential to decenter patriarchal histories of print. From the religious household of Little Gidding—whose biblical concordances and manuscripts exemplify protofeminist media innovation—to the queer poetic assemblages of Edward Benlowes and the fragment albums of former shoemaker John Bagford, *Cut/Copy/Paste* demonstrates history's relevance to our understanding of current media. Tracing the lives and afterlives of amateur "bookwork," Trettien creates a method for identifying and comprehending hybrid objects that resist familiar bibliographic and literary categories. In the process, she bears witness to the deep history of radical publishing with fragments and found materials. With many of *Cut/Copy/Paste*'s digital resources left thrillingly open for additions and revisions, this book reimagines our ideas of publication while fostering a spirit of generosity and inclusivity. An open invitation to cut, copy, and paste different histories, it is an inspiration for students of publishing or the digital humanities, as well as anyone interested in the past, present, and future of creativity.

This Is Not a Copy Kaja Marczevska, 2018-02-22 In *This Is Not a Copy*, Kaja Marczevska identifies a characteristic 'copy-paste' tendency in contemporary culture—a shift in attitude that allows reproduction and plagiarizing to become a norm in cultural production. This inclination can be observed in literature and non-literary forms of

writing at an unprecedented level, as experiments with text redefine the nature of creativity. Responding to these transformations, Marczewska argues that we must radically rethink our conceptions of artistic practice and proposes a move away from the familiar categories of copying and originality, creativity and plagiarism in favour of the notion of iteration. Developing the new concept of the Iterative Turn, *This Is Not a Copy* identifies and theorizes the turn toward ubiquitous iteration as a condition of text-based creative practices as they emerge in response to contemporary technologies. Conceiving of writing as iterative invites us to address a set of new, critical questions about contemporary culture. Combining discussion of literature, experimental and electronic writing, mainstream and independent publishing with debates in 20th- and 21st-century art, contemporary media culture, transforming technologies and copyright laws, *This Is Not a Copy* offers a timely and urgently needed argument, introducing a unique new perspective on practices that permeate our contemporary culture.

Finale for Composers K. V. A. Bajura, Amy Stabenow, 2008-01-01 Much has changed with Finale since my first edition of Finale for Composers. It has taken me several years to write this second edition. With a new version of Finale every year, it was difficult to stay current. In a nutshell, there are a now fewer tools, but the tools that remain are more powerful and perform multiple functions. No longer do you have to use two or three tools to accomplish a common task. You are able do the same thing more quickly and more efficiently with the same tool. You may even think that the tools have become smarter. Almost all tools now have contextual menus which change based on what is selected. You access these menus by right clicking if you have a two-button mouse or by option-clicking on the Mac. Commonly used functions such as changing the key or time signature can be easily accomplished with one right click on the mouse. The other major upgrade in Finale is the addition of the Garritan Instruments. No longer are you stuck with the wimpy QuickTime sounds nor do you have to connect to an external synthesizer. With each new edition, the playback has become better and better. After countless hours of using Finale, hundreds of phone calls from musicians asking for help in Finale, and numerous lectures in the classroom teaching Finale at Carnegie Mellon University, I finally took the advice of my many colleagues, clients, friends, and students and set out to write a book on Finale. But not just any book... a book that focuses on Finale as a tool for composers. In order

to get the most out of this book, I would suggest that you have at least a basic knowledge of the workings of Finale. While I will cover the more elusive features, which many users may not know, I occasionally have omitted some of the more basic skills. These skills can be easily learned from the user guide. In the beginning, Coda created Finale and it was good. Well okay, it was good but very few people realized its potential at first. The interface was clunky with a different type of click needed to accomplish various tasks command-click for this, shift-click for that, and option-click for who remembers what. And the learning curve was steeper than Mount Everest, making it all the more appealing to me. I love a challenge and no program, no matter how difficult, was going to get the better of me. So after a few weeks of fooling around with the thing, reading all of the manuals, watching the video, and hours of trial and error, I became a Finale aficionado. From that point on, I jumped right in for every upgrade they offered. I even switched between Mac and PC a few times just for good measure and used it on everything from my old Mac SE/30 to my current 2.4 GHz Quad Core 2 Duo running Vista Ultimate 64 bit. I have used Finale to print everything from simple rhythmic patterns for Eurhythmics exercises to full-blown Symphonies and Operas that were performed by professional orchestras as well as everything in between. Finale has helped me when I needed to quickly arrange a hymn for my limited voice church choir, and has brought me enough clients to start a side business as a music copyist. You may have laughed earlier when I said that Finale has changed my life, but I believe that Finale has made all of these things possible for me. I would be at a very different place in my life if it were not for Finale. Now I would like to share my success in using Finale with you in this book so you can see what it can do for you.

IPractice Jennifer Mishra, Barbara Fast, 2018 This book provides new practical tools that bridge the gap between

familiar, easy-to-use technology and musical practice to enhance musicianship and motivate students. Authors Jennifer Mishra and Barbara Fast provide ideas for use with students of all levels, from beginners to musicians performing advanced repertoire. This book is written for teachers (both studio teachers and ensemble directors), but can be read by performers to help give new guidance to their own practice sessions. Some strategies in this book would not have been possible without advances in technology; others expand tried-and-true practice strategies with the use of technology. Most of the technologies discussed are free or inexpensive and don't require extensive specialist equipment or learning. Rather than replacing quality practice strategies, technology brings new tools to the practicing tool box. The strategies lay the foundation for how technology can be used in the practice room and are intended to spark creativity. The book encourages teachers and students to vary the integration of practice strategies with technology in personal ways to fit their own studios or practice routines. This book is all about exploring our musical practice through technology. The ideas in this book will invigorate your musical practice and lead to even more creativity between you and your students
