Assessing Attention-Deficit/Hyperactivity Disorder Arthur D. Anastopoulos, Terri L. Shelton, 2006-04-18 Over the past two decades, the assessment of Attention-Deficit/Hyperactivity Disorder (AD/HD) has evolved into a sophisticated balance of science and clinical judgement essential for arriving at reliable and valid diagnostic de- sions. Because of the precarious mix of clinical and empirical skill needed to evaluate children with this disorder, diagnostic practice in this area has been found wanting by many critics. In fact, a 1998 National Institutes of Health consensus panel concluded that “existing diagnostic treatment practices ... point to the need for improved awareness by the health service sector conce- ing an appropriate assessment, treatment, and follow-up. A more consistent set of diagnostic procedures and practice guidelines is of utmost importance” (p. 21). Drs. Arthur D. Anastopoulos and Terri L. Shelton have designed a book that addresses this need. A number of themes are highlighted throughout the text. Perhaps the most important is that the assessment guidelines set forth in this book represent a balance between science and practice. The authors account for the realities of clinical practice in an age of managed care while challenging clinicians to heed the lessons of empirical research. Although the use of empirically based asse- ment procedures may at times fly in the face of cost constraints (e. g. , systematic evaluation of medication effects), the authors present a strong argument for them. Further, they call upon their vast clinical experience to provide concrete suggestions for translating research findings into effective evaluations.

Peer Interaction and Second Language Learning Masatoshi Sato,Susan Ballinger,2016-03-10 This volume represents the first collection of empirical studies focusing on peer interaction for L2 learning. These studies aim to unveil the impact of mediating variables such as task type, mode of interaction, and social relationships on learners' interactional behaviors and language development in this unique and pedagogically powerful learning context. To examine these issues, contributors employed quantitative, qualitative, and mixed-methods designs as well as cognitive, social, and sociocognitive theoretical frameworks. The majority of the studies are classroom based and were conducted in a rich array of settings covering five continents and encompassing a wide range of learner L1s and target languages. These settings include second and foreign language classrooms from primary to university level, content-based programs, online contexts, and after-school programs. To span the divide between research and practice, each study includes a section suggesting pedagogical implications.
