**Blogging, Citizenship, and the Future of Media** Mark Tremayne,2012-10-02 This collection of original essays addresses a number of questions seeking to increase our understanding of the role of blogs in the contemporary media landscape. It takes a provocative look at how blogs are reshaping culture, media, and politics while offering multiple theoretical perspectives and methodological approaches to the study. Americans are increasingly turning to blogs for news, information, and entertainment. But what is the content of blogs? Who writes them? What is the consequence of the population's growing dependence on blogs for political information? What are the effects of blogging? Do readers trust blogs as credible sources of information? The volume includes quantitative and qualitative studies of the blogosphere, its contents, its authors, and its networked connections. The readers of blogs are another focus of the collection: how are blog readers different from the rest of the population? What consequences do blogs have for the lives of everyday people? Finally, the book explores the ramifications of the blog phenomenon on the future of traditional media: television, newspapers, and radio.

**International Blogging** Adrienne Russell,Nabil Echchaibi,2009 Bloggers around the world produce material for local, national and international audiences, yet they are developing in ways that are distinct from the U.S. model. Through case studies of blogs written in English, Chinese, Arab, French, Russian, and Hebrew, this book explores the way blogging is being conceptualized in different cultural contexts. The authors move beyond the most highly trafficked sites to shed light on larger developments taking place online, calling into question assumptions that form the foundation of much of what we read on blogging and, by extension, on global amateur or do-it-yourself media. This book suggests a more nuanced approach to understanding how blogospheres serve communication needs, how they exist in relation to one another, where they exist apart as well as where they overlap, and how they interact with other forms of communication in the larger media landscape.

It is a transformation that business is eager to exploit. In order to do so, a clear commercial strategy needs to be established; does your organization wish to use the media actively as a business tool, or do you need to respond to the use of social media by others? Blogging and Other Social Media will address this question with practical guidance on using social media as well as the risks associated with it. A collaboration by leading thinkers and business users of social media, the book contains detailed and practical advice on the various forms of social media - their applications, advantages and disadvantages, how these technologies are evolving, and whether or not their use will benefit your business. The section covering social media and the law explains the risks and remedies related to abuse of copyright, defamation, privacy, data protection and user contracts as well as the opportunities and threats for online reputation. If you are looking to encourage your employees but want to protect your business from the threats this emerging media presents, get a copy of this practical guide and study it before you start including social media as part of your corporate marketing or communications strategy.

**The Mediated City** Stephen Coleman, Nancy Thumim, Chris Birchall, Julie Firmstone, Giles Moss, Katy Parry, Judith Stamper, Jay G. Blumler, 2016-08-15 How does news circulate in a major post-industrial city? And how in turn are identities and differences formed and mediated through this circulation? This seminal work is the first to offer an empirical examination, and trace a city's pattern of, news circulation. Encompassing a comprehensive range of practices involved in producing, circulating and consuming 'news' and recognizing the various ways in which individuals and groups may find out, follow and discuss local issues and events, *The Mediated City* critiques thinking that takes the centrality of certain news media as an unquestioned starting point. By doing so, it opens up a discussion: do we know what news is? What types of media constitute it? And why does it matter?

**Online Journalism from the Periphery** Scott A. Eldridge II, 2017-09-26 Online Journalism from the Periphery looks at how a range of new media actors, communicating online, have challenged us to think differently about the journalistic field. Emerging from the disruption of digital technology, these new actors have been met with resistance by an existing core of journalism, who perceive them as part of a 'digital threat' and dismiss their claims of journalistic belonging. As a result, cracks are appearing in the conceptual foundations of what journalism is and should be. Applying field theory as a conceptual lens, Scott Eldridge guides the reader through the intricacies of these tensions at both the core and periphery. By first unpacking definitions of journalism as a social and cultural construction, this book explores how these are dominated by narratives which have reinforced a limited set of expectations about its purpose and reach. The book goes on to examine how these narratives have been significantly undermined by the output of major new media players, including Gawker, reddit, Breitbart, and WikiLeaks. *Online Journalism from the Periphery* argues for a broadening of ideas around what constitutes journalism in the modern world, concluding with alternative approaches to evaluating the contributions of emerging media heavy-weights to society and to journalism.

self-understanding. In this context, the notion of publicness enables a consideration of publics not as static 'spheres' that actors merely enter, but as produced and constituted by social practices. The vibrant media landscape of Beirut serves as a selection of samples for an ethnographic exploration of blogging.
