Monitoring in Anesthesia and Perioperative Care David L. Reich, 2011-08-08

Monitoring in Anesthesia and Perioperative Care is a practical and comprehensive resource documenting the current art and science of perioperative patient monitoring, addressing the systems-based practice issues that drive the highly regulated health care industry of the early twenty-first century. Initial chapters cover the history, medicolegal implications, validity of measurement and education issues relating to monitoring. The core of the book addresses the many monitoring modalities, with the majority of the chapters organized in a systematic fashion to describe technical concepts, parameters monitored, evidence of utility complications, credentialing and monitoring standards, and practice guidelines. Describing each device, technique and principle of clinical monitoring in an accessible style, *Monitoring in Anesthesia and Perioperative Care* is full of invaluable advice from the leading experts in the field, making it an essential tool for every anesthesiologist.

Nursing the Highly Dependent Child or Infant Michaela Dixon, Doreen Crawford, Debra Teasdale, Jan Murphy, 2009-03-16 Nursing the Highly Dependent Infant or Child is an accessible and clinical guide to the caring for the acutely ill child. It provides guidance on the specific nursing skills required to care for children and infants who require a 'step up' level of care from those on the general paediatric ward or a 'step down' level of care on discharge from neonatal or paediatric critical care facilities. The book follows a general systems approach, covering themes such as respiratory care, renal care and cardiac care as well as covering specialities such as neuro-trauma, burns and transportation of the acutely ill infant or child. Other areas explored include pain and sedation, monitoring and meeting the nutritional needs of the highly dependent child. Each chapter provides an overview of relevant anatomy and physiology, guidance on assessment and monitoring, and outlines effective nursing care and management guidance of common conditions encountered in acute children's care.

AFSOC HANDBOOK 48-1 EMT INTERMEDIATE/PARAMEDIC TREATMENT PROTOCOLS FOR AIR FORCE SPECIAL OPERATIONS MEDICAL TECHNICIANS, This handbook incorporates requirements, information, and procedures formerly contained in AFSOC SG policy letters. This Handbook applies to all active duty AFSOC 4F0X1 and 4N0X1 personnel, certified at the Emergency Medical Technician- Intermediate and Paramedic level, as outlined in AFSOCI 48-101. Medical Control Care of injured personnel in combat or rescue situations requires medical command and control by licensed medical providers. Paramedical and Emergency Medical Technician-Intermediates providing care in these situations are acting under the principal of 'delegated authority', where the provider (usually a physician) allows appropriately trained personnel to perform specified diagnostic and therapeutic interventions. There are several types of medical control: - On Line Medical Control: A physician is either present on the scene and personally directs patient care, or is contacted by radio or other means and gives 'live' instructions. - Off Line Medical Control: Contact with a control physician is impossible or impractical, care is given based on specific physician approved protocols. The medical control chain for AFSOC medical technicians assigned to Operations Support Squadron Medical Flights (OSS/OSM) is in the following precedence: On Line Medical Control: - Senior AFSOC Flight Surgeon present at the scene. - Special Tactics Flight Surgeon present at the scene. - Senior US military physician present at the scene. - Qualified (training equivalent to US physician) Allied country senior military physician present at the scene - Qualified civilian physician (training equivalent to US MD or DO) present at the scene, provided he/she agrees to assume responsibility for care and accompany the patient to higher level of care. - Senior AFSOC Physician Assistant present at the scene - Any of the above in direct radio contact Off Line Medical Control: On line medical control is the preferred means of medical control for all casualty situations. In the event on line control is not possible the following will

apply: - The Senior medic is responsible for directing medical care at all scenes where on line control is not possible. He/she will direct medical control in strict adherence to the established protocols contained herein. - AFSOC medical technicians assigned to OSS/OSM flights will attempt to contact on line medical control in all situations prior to reverting to protocol use, with the exception of an immediate life threat and then will attempt to establish on line control as soon as possible after the patient is stabilized.

Energy Efficient Servers Corey Gough, Ian Steiner, Winston Saunders, 2015-04-07 Energy Efficient Servers: Blueprints for Data Center Optimization introduces engineers and IT professionals to the power management technologies and techniques used in energy efficient servers. The book includes a deep examination of different features used in processors, memory, interconnects, I/O devices, and other platform components. It outlines the power and performance impact of these features and the role firmware and software play in initialization and control. Using examples from cloud, HPC, and enterprise environments, the book demonstrates how various power management technologies are utilized across a range of server utilization. It teaches the reader how to monitor, analyze, and optimize their environment to best suit their needs. It shares optimization techniques used by data center administrators and system optimization experts at the world's most advanced data centers.
