47 Trees: A Cosmic Crusade Part 1 Thom Costea,2023-06-23 47 Trees: A Cosmic Crusade An Enthralling Spiritual Fantasy of Wondrous Exploration and Discovery This new millennium tale is a clever, intricately meshed tapestry of dimensional metaphysics, thrilling action with ancient hybrid tree warriors, perhaps a philosophical quagmire or two, and of course really cool spiritually organic space vessels. Sometimes you just have to keep climbing and searching for the truth, yet still seeking the excitement and satisfaction that can bring you contentment. Come fly with veteran journalist and author Thom Costea on this gripping literary flight: unrestrained riding the crest of an etherial wave through spiritual corridors and across interstellar trails, searching for universal truth and embracing the spirit of exploration and discovery on an electrifying journey, and maybe indulging in the occasional moral conundrum or a binge of intoxicated debauchery and exotic exploits.

Cosmic Beginnings Soyinka I. Ogunbusola,2010-12-23 This genre falls under the category of Sci-fi fantasy thriller a works that is just as exciting as the adventures of Lora Croft in "Tomb Raiders" I chose this genre to create characters that exist outside of the everyday urban-scape theme. One of the main characters is a black woman; a seasoned sea captain for example. I wanted to create another kind of hero, in another part of the world, on another kind of mission based on another mindset; more of a West African theme influenced by the folklore of the ancient Yoruba of Southwestern Nigeria which is deeply submerged in cosmological and celestial influences and is viewed as individual characteristic energies expressing themselves universally in allegorical narratives. These legends tend to be older than Western civilization. I wanted the story to be unique and the characters just as unique. This is a story told by the ancestors of the war in heaven before the creation of man...this a story of the battle of illumination and darkness the fight to maintain balance between good and evil.

Mars, A Cosmic Stepping Stone Kevin Nolan, 2010-10-29 **Mars - A Cosmic Stepping Stone connects ordinary people with the relevance of space exploration in a way not seen since Carl Sagan. **The book encapsulates, completely and understandably, the 'big picture' about humanity's path to uncovering its cosmic connections and how Mars is critical to that. Few, if any books in the area have attempted to do this and achieve it, since those of Sagan. **The book presents the broadest, most complete, most up-to-date and most exciting account of humanity's fascination with, and future intentions regarding the Red Planet. **The book is built on the authors 31 years experience of astronomy and 22 years of communicating science to the public, resulting in many unique ideas and unprecedented ways of conveying them. The author is establishing a reputation in his country for this. Such an emphasis is a priority for the book - more so than conveying facts. Few currently available books approach the subject from such a stand point. **A new generation, the second generation since the start of space exploration, deserve literature that encapsulates the important issues of the subject and sets them on their own path of exploration. **The book connects with issues pertinent to today's world. In a global community full of stresses, this book unfolds a positive human story that is of direct relevance to everyone. In a world full of frivolous interpretations and portrayed fear regarding science, the book brings to the table a grounded yet enigmatic perspective that will bestow a sense of optimism and inclusion.

Fat Tire Tales and Trails by Cosmic Ray Cosmic Ray, Ray Brutti, 1998-04-01 *Popular Science*, 1936-11 Popular Science gives our readers the information and tools to improve their technology and their world. PITUS PESTON AND THE VENDETTA Everett M. Hunt, 2013-01-30 Pitus Peston is really on the spot. Returning to Earth to save it from corstet, an alien life prolonging plant, he gets captured by the army and is in a military base in the Nevada desert being debriefed on all of his advanced technology. When they are done, what will they do with a 235 year old man who has knowledge of extraterrestrials? They seem to have only two cruel choices. Will they keep him a permanent resident in some "Area 51" type place, forever cut off from the world, or just make him part of the Nevada landscape? On the other side of the galaxy, Peston's alien friends, Calnoon and Kinar, two of three alien exiles whose ship Pitus discovered in the Arizona desert in 1811, and Orban, a renowned Oman official and scholar, wonder what is keeping Pitus from returning to them. Pitus is also in the sites of the third exile, Rohab, now a high ranking agent of the FBI, who has been trying to finish off Peston for nearly two centuries. If this weren't enough, there is also a ruthless crazy alien of the enemy planet Haldan, who wants nothing so fervently than to kill Peston, and is willing to travel across the galaxy to do it. This feeling is mutual of course, and is about to get intensified by the actions of this Haldi, and so starts the story of PITUS PESTON AND THE VENDETTA.

Three Days Before the Sun Warren LeRoi Johns, 2014-11-06 Three Days Before the Sun explores our origin, purpose and destiny in an eternity of time and an infinity of space! The holes and flaws acknowledged by Darwin in his evolution theory are precisely targeted with academic precision in a format designed for the general public. The scrupulously documented title dismantles the chance hypothesis, point-by-point, as a lawyer presents evidence to a jury. The 296-page, illustrated title comes salted with homey colloquialisms,

methodically exposing unproven assumptions. But more than an exposé of flawed conjecture masquerading as science. Three Days Before the Sun offers a generic Christian glimpse of the raging origins controversy. The book compliments the faith of Christian communities who believe the Genesis account of the creation miracle while asserting the Creator of the universe is the Author of science.
