Everything Counts Gary Ryan Blair,2009-11-02 *Everything Counts!* is an execution strategy for inspiring excellence and driving exceptional results. Too many people and organizations are mired in a mediocrity of their own making. They focus their attention and efforts on getting the big things right, but they ignore the little things that often make a big difference. As a result, reputations are damaged, brands diluted, and loyalty is lost by blatant disregard for the small stuff which negatively impacts the customer experience. For years, we've been taught not to sweat the small stuff, but in the real world of business, *Everything Counts*. *Everything Counts* is a call to greater awareness and with awareness comes a responsibility to raise the performance bar. It offers a powerful operating philosophy that will steer your organization to reach higher levels of growth, productivity, and performance. Serving as the definitive guide on organizational and personal mastery, this book gives you a foundation for unparalleled customer service, superior quality, and consistent performance. A proven system for organizing, aligning, and improving all your efforts in sales, service, and performance improvement Shows how concentrating on the small things leads to growth, productivity, personal success, and business greatness Helps you motivate your people and teams to achieve better results on both the personal and organizational level *Everything Counts* reminds us that seemingly small things can make tremendous differences. If You Can Count to Four - How to Get Everything You Want Out of Life! James Breckenridge Jones,2016-02-20 How To Get Everything You Want Out Of Life There are basic laws in this universe that will work for you if you know how to apply them. They work for anyone who knows they exist and how to use them. The law of electricity works for all of us. We can burn your house down with electricity or you can light your home with it. You don't have to be a genius to do it. A child three years old can push a button and turn the lights on. Millions of people have been taught to believe that the rules of success are indeed so very difficult and complicated that surely they could never learn them. I found out that anyone can be genuinely successful if he will learn the exact same rules that the successful people learned and use them. Scroll up to get your copy now.

Life, the Universe, and Everything Ric Machuga,2012-03-29 No philosophical idea, no matter how small, can live alone. Ideas always gain their force, power, and life from their surroundings - their ecosystem. The ecosystem of ideas defended in this book comes from the ancient Greek philosopher Aristotle and his medieval interpreter, Thomas Aquinas. The ongoing relevance of their philosophical thought to twenty-first century issues is opened up in fascinating ways in this book. *Life, the Universe, and Everything* is the product of thirty years of teaching introductory courses in philosophy. Assuming no prior background, it only requires of readers an enquiring mind and a willingness to think carefully. An ideal guide to the big questions we face.

Count It All Joy Ashea S. Goldson,2011-10-24 After a long, complex engagement, Alex and Joshua Benning feel like happily ever after is finally theirs. But the marriage may sour as soon-to-be minister Joshua starts pressuring Alex to start a family. Years ago, Alex suffered a botched abortion, and she still struggles from it. Joshua has his own issues. A widower who already has a five-year-old daughter, Joshua wants the perfect family-to the point of it being an obsession. There's also a scandal brewing over a relationship with a possible surrogate and recent international adoption attempt in the mix. Soon all the drama makes the marriage seem unmanageable and things start falling apart. Can faith lead them back to the love they share and bring them back to joy?

How to Count It All Joy Bernita Scott Weston,2012-10-25 In September 2002 she married the man of her dreams. In June 2005 they purchased their home in paradise. It was the perfect love nest, the kind of home most people can only dream about. Their private get-a-way was nestled in 5.75 acres of plush exotic land, with a towering forest of landscape and natural habitat, overlooking several creeks and streams with breath taking sunset views from every angle. It was secretly hidden from the world, a place where deer's and rabbits seek refuge; where the falcons soared and roamed freely without fear of discovery. It was the summer of their lives, with a newly built wrap-around deck that lit up the night. They were the envy of all their friends and neighbors. Until one day the perfect dream they once shared came crashing down around them! Their once perfect marriage would be put to the test. Voluntary humility is an honor and privilege best served with a willing, sincere and open heart. To be humbled by God, is an indescribable devastation of heartache and pain for which they would soon discover. September 2009 the flood they once mocked and avoided two years prior, returns with a wicked vengeance, only this time it would take most of the city and their home in paradise with it! Being homeless with only the clothes on their backs, they did not sin nor did they charge God with wrong. They were hard-pressed on every side, but not crushed; perplexed, but not in despair; persecuted, but not forsaken; struck down, but not destroyed. In this faith based book, Bernita Weston shares with the world how they were able to turn their tragedy into triumph. Find out, *How to Count it ALL Joy, When Faced with Insurmountable Circumstances!*

You'll get first-hand guidance and learn how to apply her advice to your own med school journey. Counselors and checklists are helpful, but your pre-med journey cannot be boiled down to a list of activities and a collection of accolades. In Making Pre-Med Count, Fassas teaches you how to translate your accomplishments into a compelling and personalized med school application. Fassas gets into the weeds of the pre-med years to touch on the most fundamental and gnawing questions that interested applicants must face. Using examples from her own journey from freshman year to acceptance, plus tips and tricks from her peers, she guides readers through an endless stream of conflicting advice towards preparing academically, mentally and psychologically for the med school application process. Her advice starts with the idea that anything and everything can get you into medical school if you're able to get into the heads of the admissions committee. You'll also get her take on many of the questions raised in student forums. Fassas, who will begin med school in the fall of 2019, helps relieve some of the common pre-med doubts, anxieties, and fears that you'll feel. Making Pre-Med Count compiles Fassas' advice in one place -- it's like having your own personal med school advisor.

The Ideal made Real (Unabridged edition) Christian D. Larson,2022-03-26 The purpose of this work is to present practical methods through which anyone, the beginner in particular, may realize his ideals, cause his cherished dreams to come true, and cause the visions of the soul to become tangible realities in everyday life. The best minds now believe that the ideal can be made real; that every lofty idea can be applied in practical living, and that all that is beautiful on the heights of existence can be made permanent expressions in personal existence. And so popular is this belief becoming that it is rapidly permeating the entire thought of the world. Accordingly, the demand for instructive knowledge on this subject, that is simple as well as scientific, is becoming almost universal. This book has been written to supply that demand. However, it does not claim to be complete; nor could any work on The Ideal Made Real possibly be complete, because the ideal world is limitless and the process of making real the ideal is endless. To know how to begin is the principal secret, and he who has learned this secret may go on further and further, forever and forever, until he reaches the most sublime heights that endless existence has in store. No attempt has been made to formulate the ideas, methods and principles presented, into a definite system. In fact, the tendency to form a new system of thinking or a new philosophy of life, has been purposely avoided. Closely defined systems invariably become obstacles to advancement, and we are not concerned with new philosophies of life. Our purpose is the living of a greater and a greater life, and in such a life all philosophies must constantly change. In preparing the following pages, the object has been to take the beginner out of the limitations of the old into the boundlessness of the new; to emphasize the fact that the possibilities that are latent in the human mind are nothing less than marvelous, and that the way to turn those possibilities to practical use is sufficiently simple for anyone to understand. But no method has been presented that will not tend to suggest new and better methods as required for further advancement. The best ideas are those that inspire new ideas, better ideas, greater ideas. The most perfect science of life is that science that gives each individual the power to create and recreate his own science as he ascends in the scale of life. (Great souls are developed only where minds are left free to employ the best-known methods according to their own understanding and insight. And it is only as the soul grows greater and greater that the ideal can be made real. It is individuality and originality that give each person the power to make his own life as he may wish it to be; but those two important factors do not flourish in definite systems. There is no progress where the soul is placed in the hands of methods; true and continuous progress can be promoted only where all ideas, all methods and all principles are placed in the hands of the soul. We have selected the best ideas and the best methods known for making the ideal real, and through this work, will place them in your hands. We do not ask you to follow these methods; we simply ask you to use them. You will then find them all to be practical; you will find that every one will work and produce the results you desire. You will then, not only make real the ideal in your present sphere of life, but you will also develop within yourself that Greater Life, the power of which has no limit, the joy of which has no end.
