Stop Counterfeiting in Manufactured Goods Act United States. Congress. House. Committee on the Judiciary,2005

Is That Real? National Research Council,Division on Engineering and Physical Sciences,Board on Manufacturing and Engineering Design,Committee on Technologies to Deter Currency Counterfeiting,2006-04-19 A key mission of the Bureau of Engraving and Printing of the Department of the Treasury is the design and printing of U.S. banknotes. The BEP is responsible for producing easily recognizable currency that is difficult to counterfeit. In recent years, the bureau has recognized the modern information technology could lead to entirely new types of counterfeiting threats, and it has requested a number of studies by the NRC to assess these evolving threats. In this new request, the BEP asked the NRC to identify and evaluate significant emerging counterfeiting threats and to assess technologically feasible counterfeit-deterrent features for potential use in new designs. This first report provides an assessment of emerging threats including a wide range of digital imaging and printing techniques. It also presents an analysis of a systems approach to the counterfeiting threat. The second report will offer an evaluation of new banknote features to address these threats.

Revealed: the REAL GLOBAL COUNTERFEIT MEDICINE PEDDLERS - an

INVESTIGATIVE REPORT D. O. N. BERNADATE,2017-08-12 Why this report? Consider this: Fake Drugs Quote 1. 1. Fake drugs are more deadly than terrorism. Forty years of terrorism, has killed 65,000 people globally, compared with 200,000 in one year alone in China from counterfeit medicines. Ronald Noble, Interpol's Secretary-General Opening Remark to an Anti-Counterfeiting Conference in Africa Copied from: <https://www.slideshare.net/AlanClock/Fake-Drugs-1509-v2> Now if that is what fake and counterfeit medicines have done in ONE COUNTRY, IMAGINE HOW MANY PERSONS IT KILLS IN A YEAR WORLD-WIDE.. For the avoidance of doubt, bring out your map and check. You will find that there are over two hundred independent and non independent countries in the world. In the absence of global statistics on the issue, extrapolate the China figure a little and you will agree that it is safe to assume that over a million persons die annually directly and indirectly from the effects of fake and counterfeit drugs or medicines. The above is not the only harm fake and counterfeit drugs and medicines do. Let us mention a few here so that we can better appreciate the danger of this terrible practice.2. Counterfeit medicines make people doubt the integrity of professional healthcare practitioners. The common man does not know how to separate the wheat from the chaff. All they know is that they went to one hospital or the other and they were given medicines that did not work or that killed their relatives. So they lose faith in medicines generally.3. Counterfeit medicines deny legitimate medicine manufacturers, dealers and retailers their genuine livelihood. According to the World Health Organization [WHO] 70% of the world medicine trade particularly in Africa are either counterfeit or fake. Due to the fact that counterfeit medicines are often cheaper, people ignorantly go for them.To further buttress the point above, Newsweek magazine reported in an article written by Alexandra Ossoala, in the 17/9/15 edition said:Task forces are finding more fake drugs every year. Interpol's flagship pharmaceutical investigation, Operation Pangea, for example, says it seized 2.4 million fake and illicit pills in 2011; in 2015, the total number of pills and other medications that officials seized jumped to 20.7 million4. Families and people who

die of fake and counterfeit drugs become highly traumatized. This creates additional problems for mankind. 5. Counterfeit medicine create doubt in the mind of medical doctors when they know that the right treatment has been applied but do not get the right results. And so on and so forth. These sins are so much that we can spend the whole day on it. So many health practitioners have said times without number that medicine counterfeiters are nothing but murderers and should be treated as such. The problem is how do you know them? We must not be deceived by the occasional apprehension of some small fries and foot soldiers. Most of those so far arrested are retailers. How did the fake or counterfeit medicine hit the street? Who are the real barons behind this trade. My investigation puts me in a position to tell you who the real offenders are and until they are confronted and their operations audited, the world will continue to feel the pains of counterfeit drugs. I have no plan to beat about the bush here. This report will hit the nail on the head and call a spade a spade. And I know who the 'spade' is as you will found out in the course of reading this little but vital report.

Combating Trafficking in Counterfeit and Pirated Goods Strategy Policy and Plans Office of, Us Department of Homeland Security, 2020-02-06 The rapid growth of e-commerce has revolutionized the way goods are bought and sold, allowing for counterfeit and pirated goods to flood our borders and penetrate our communities and homes. Illicit goods trafficked to American consumers by e-commerce platforms and online third-party marketplace threaten public health and safety, as well as national security. This illicit activity impacts American innovation and erodes the competitiveness of U.S. manufacturers and workers. Consumers must be confident in the safety, quality, and authenticity of the products they purchase online. DHS is committed to combating counterfeiters and pirates with the help of our U.S. Government partners and private sector stakeholders - who are critical to helping secure supply chains to stem the tide of counterfeit and pirated goods. *Combating Trafficking in Counterfeit and Pirated Goods*, has been prepared by the U.S. Department of Homeland Security's Office of Strategy, Policy, and Plans. The report uses available data, substantial public input, and other information to develop a deeper understanding of how e-commerce platforms, online third-party marketplaces, and other third-party intermediaries facilitate the importation and sale of massive amounts of counterfeit and pirated goods. The report identifies appropriate administrative, statutory, regulatory, and other actions, including enhanced enforcement measures, modernization of legal and liability frameworks, and best practices for private sector stakeholders. These strong actions can be implemented swiftly to substantially reduce trafficking in counterfeit and pirated goods while promoting a safer America. This report was prepared pursuant to President Donald J. Trump's April 3, 2019, Memorandum on Combating Trafficking in Counterfeit and Pirated Goods. The President's historic memorandum provides a much warranted and long overdue call to action in the U.S. Government's fight against a massive form of illicit trade that is inflicting significant harm on American consumers and businesses. This illicit trade must be stopped in its tracks. This report was prepared in coordination with the Secretaries of Commerce and State, the Attorney General, the Office of Management and Budget, the Intellectual Property Enforcement Coordinator, the United States Trade Representative, the Assistant to the President for Economic Policy, the Assistant to the President for Trade and Manufacturing Policy, and with other partners in the U.S. Government. The report also benefitted from extensive engagement with the private sector

Counterfeit Parts United States. Government Accountability Office, 2016 The DOD supply chain is vulnerable to the risk of counterfeit parts, which have the potential to delay missions and ultimately endanger service members. To effectively identify and mitigate this risk, DOD began requiring its agencies in 2013 and its contractors in 2014, to report data on suspect counterfeit

parts. A Senate report included a provision for GAO to review DO's efforts to secure its supply chain from counterfeit parts. This report examines, among other things, (1) the use of GIDEP to report counterfeits, (2) GIDE's effectiveness as an early warning system, and (3) DOD's assessment of defense contractors' systems for detecting and avoiding counterfeits. GAO recommends that DOD oversee its defense agencies' reporting efforts, develop standard processes for when to report a part as suspect counterfeit, establish guidance for when to limit access to GIDEP reports, and clarify criteria to contractors for their detection systems.

A Path to the Next Generation of U.S. Banknotes National Research Council, Division on Engineering and Physical Sciences, Board on Manufacturing and Engineering Design, Committee on Technologies to Deter Currency Counterfeiting, 2007-07-26 The rapid pace at which digital printing is advancing is posing a very serious challenge to the U.S. Department of the Treasury's Bureau of Printing (BEP). The BEP needs to stay ahead of the evolving counterfeiting threats to U.S. currency. To help meet that challenge, *A Path to the Next Generation of U.S. Banknotes* provides an assessment of technologies and methods to produce designs that enhance the security of U.S. Federal Reserve notes (FRNs). This book presents the results of a systematic investigation of the trends in digital imaging and printing and how they enable emerging counterfeiting threats. It also provides the identification and analysis of new features of FRNs that could provide effective countermeasures to these threats and an overview of a requirements-driven development process that could be adapted to develop an advanced-generation currency.

Counterfeit Deterrent Features for the Next-Generation Currency Design National Research Council, Division on Engineering and Physical Sciences, National Materials Advisory Board, Commission on Engineering and Technical Systems, Committee on Next-Generation Currency Design, 1993-02-01 Traditionally, counterfeit deterrent features restricted counterfeiting to only the dedicated craftsman. With the advent of highly sophisticated reprographic systems, this is no longer true. Redesign of U.S. banknotes is necessary in order to incorporate additional features aimed at discouraging counterfeiting using advanced copiers-scanners-printers. This volume evaluates a large number of such features while recommending a comprehensive national strategy for anticipating and responding to counterfeiting threats.

Illicit Trade Trends in Trade in Counterfeit and Pirated Goods OECD, European Union Intellectual Property Office, 2019-03-18 This study examines the value, scope and trends of trade in counterfeit and pirated goods. First, it presents the overall scale of this trade and discusses which parts of the economy are particularly at risk. Next, it looks at the main economies of origin of fakes in global trade. Dangerous Doses Katherine Eban, 2006-05-01 In the tradition of the great investigative classics, *Dangerous Doses* exposes the dark side of America's pharmaceutical trade. Stolen, compromised, and counterfeit medicine increasingly makes its way into a poorly regulated distribution system—where it may reach unsuspecting patients who stake their lives on its effectiveness. Katherine Eban's hard-hitting exploration of America's secret ring of drug counterfeiters takes us to Florida, where tireless investigators follow the trail of medicine stolen in a seemingly minor break-in as it funnels into a sprawling national network of drug polluters. Their pursuit stretches from a strip joint in South Miami to the halls of Congress as they battle entrenched political interests and uncover an increasing threat to America's health. With the conscience of a crusading reporter, Eban has crafted a riveting narrative that shows how, when we most need protection, we may be most at risk.

Do beliefs about agricultural inputs counterfeiting correspond with actual rates of counterfeiting? Ashour, Maha, Billings, Lucy,Gilligan, Daniel,Hoel, Jessica B.,Karachiwalla, Naureen,2016-08-26 Adoption of productivity- and income-enhancing agricultural technologies is conspicuously low in Africa south of the Sahara. Farmers’ beliefs regarding the authenticity of agricultural inputs are important for explaining technology adoption: if farmers do not believe that inputs are genuine, they are unlikely to invest in them. The degree of alignment between beliefs about and actual counterfeiting can help explain both the social costs of the “lemons” problem, and low rates of adoption. This is the first paper to explore whether farmer beliefs regarding counterfeiting align with actual rates of counterfeiting, and we do so across a very large geographic area serving tens of thousands of farmers in Uganda using a more precise measure of counterfeiting than many previous studies. We examine the relationship between beliefs and counterfeiting using quantitative measures of farmer beliefs regarding the authenticity of herbicide in their local market as well as a large random sample of laboratory-tested herbicide samples to measure counterfeiting rates in local markets. We report evidence of considerable counterfeiting of herbicides in local markets, with nearly one in three bottles containing less than 75 percent of the labeled concentration of active ingredient. We find evidence that farmers’ beliefs regarding the extent of counterfeiting of herbicide are significantly associated with measures of the actual prevalence of counterfeiting in local markets. These results indicate that farmers are at least partly informed about the “market for lemons” problem in local input markets. However, the results also suggest that although better informed farmers imply a lower social cost of counterfeiting, the high rate of counterfeiting and the relative accuracy of farmer information contributes to low adoption of agricultural inputs in Africa.
