An Atlas of Countries That Don't Exist Nick Middleton, 2017-03-21 A "fascinating" journey to little-known and contested lands

around the globe, from Tibet to the Isle of Man to Elgaland-Vargaland (Geographical Magazine). What is a country? Acclaimed travel writer and Oxford geography don Nick Middleton brings to life the origins and histories of fifty states that, lacking international recognition and United Nations membership, exist on the margins of legitimacy in the global order. From long-contested lands like Crimea and Tibet to lesser-known territories such as Africa's last colony and a European republic that enjoyed independence for a single day, Middleton presents fascinating stories of shifting borders, visionary leaders, and "forgotten" peoples. "Engrossing . . . You'll not find Middle-earth, Atlantis or Lilliput inside, but you will find something just as intriguing . . . sure to prompt discussions about what makes a country a 'real country.'" —Seattle Times

Countries of the World and Their Leaders Yearbook, 1986

The Changing Wealth of Nations 2018 Glenn-Marie Lange, Quentin Wodon, Kevin Carey, 2018-01-30 Countries regularly track gross domestic product (GDP) as an indicator of their economic progress, but not wealth—the assets such as infrastructure, forests, minerals, and human capital that produce GDP. In contrast, corporations routinely report on both their income and assets to assess their economic health and prospects for the future. Wealth accounts allow countries to take stock of their assets to monitor the sustainability of development, an urgent concern today for all countries. The Changing Wealth of Nations 2018: Building a Sustainable Future covers national wealth for 141 countries over 20 years (1995+“2014) as the sum of produced capital, 19 types of natural capital, net foreign assets, and human capital overall as well as by gender and type of employment. Great progress has been made in estimating wealth since the first volume, *Where Is the Wealth of Nations? Measuring Capital for the 21st Century*, was published in 2006. New data substantially improve estimates of natural capital, and, for the first time, human capital is measured by using household surveys to estimate lifetime earnings. The Changing Wealth of Nations 2018 begins with a review of global and regional trends in wealth over the past two decades and provides examples of how wealth accounts can be used for the analysis of development patterns. Several chapters discuss the new work on human capital and its application in development policy. The book then tackles elements of natural capital that are not yet fully incorporated in the wealth accounts: air pollution, marine fisheries, and ecosystems. This book targets policy makers but will engage anyone committed to building a sustainable future for the planet.

The Good Country Equation Simon Anholt, 2020-08-11 “Not only does Anholt explain the challenges facing the world with

unique clarity, he also provides genuinely new, informative, practical, innovative solutions. . . . The book is a must-read for anyone who cares about humanity's shared future.” —H. E. Mohamed Abdullahi Mohamed (Farmaajo), President of the Federal Republic of Somalia Simon Anholt has spent decades helping countries from Austria to Zambia to improve their international standing. Using colorful descriptions of his experiences—dining with Vladimir Putin at his country home, taking a group of Felipe Calderon's advisors on their first Mexico City subway ride, touring a beautiful new government hospital in Afghanistan that nobody would use because it was in Taliban-controlled territory—he tells how he began finding answers to that question. Ultimately, Anholt hit on the Good Country Equation, a formula for encouraging international cooperation and reinventing education for a globalized era. Anholt even offers a “selfish” argument for cooperation: he shows that it generates goodwill, which in turn translates into increased trade, foreign investment, tourism, talent attraction, and even domestic electoral success. Anholt insists we can change the way countries behave and the way people are educated in a single generation—because that's all the time we have.
