The Hyperlinked Society Lokman Tsui, 2009-12-11 Links are among the most basic---and most unexamined---features of online life. Bringing together a prominent array of thinkers from industry and the academy, *The Hyperlinked Society* addresses a provocative series of questions about the ways in which hyperlinks organize behavior online. How do media producers' considerations of links change the way they approach their work, and how do these considerations in turn affect the ways that audiences consume news and entertainment? What role do economic and political considerations play in information producers' creation of links? How do links shape the size and scope of the public sphere in the digital age? Are hyperlinks bridging mechanisms that encourage people to see beyond their personal beliefs to a broader and more diverse world? Or do they simply reinforce existing bonds by encouraging people to ignore social and political perspectives that conflict with their existing interests and beliefs? This pathbreaking collection of essays will be valuable to anyone interested in the now taken for granted connections that structure communication, commerce, and civic discourse in the world of digital media. This collection provides a broad and deep examination of the social, political, and economic implications of the evolving, web-based media environment. *The Hyperlinked Society* will be a very useful contribution to the scholarly debate about the role of the internet in modern society, and especially about the interaction between the internet and other media systems in modern society. ---Charles Steinfield, Professor and Chairperson, Department of Telecommunication, Information Studies, and Media, Michigan State University Joseph Turow is Robert Lewis Shayon Professor at the Annenberg School for Communication, University of Pennsylvania. He was named a Distinguished Scholar by the National Communication Association and a Fellow of the International Communication Association in 2010. He has authored eight books, edited five, and written more than 100 articles on mass media industries. His books include *Niche Envy: Marketing Discrimination in the Digital Age* and *Breaking up America: Advertisers and the New Media World*. Lokman Tsui is a doctoral candidate at the Annenberg School for Communication, University of Pennsylvania. His research interests center on new media and global communication. Electronic Word of Mouth (eWOM) in the Marketing Context Elvira Ismagilova, Yogesh K. Dwivedi, Emma Slade, Michael D. Williams, 2017-02-15 This SpringerBrief offers a state of the art analysis of electronic word-of-mouth (eWOM) communications and its role in marketing. The book begins with an overview of traditional word-of-mouth (WOM) and its evolution to eWOM. It discusses the differences between traditional and online WOM. The book examines why people engage in eWOM communications, but also how consumers evaluate its persuasiveness. It also looks at the effects of eWOM. The book identifies current gaps in the eWOM research, but also highlights future directions for this growing field. eWOM is an important marketing technique in brand communications, and it plays an important role in modern e-commerce. Marketers become extremely interested in enhancing the power of eWOM developing loyalty programs and building brands. Studying the effect of eWOM can be beneficial for companies. This book should be a good resource for scholars and practitioners that need to understand the pervasive effects of eWOM.

The SAGE Encyclopedia of Quality and the Service Economy Su Mi Dahlgaard-Park, 2015-05-29 Society, globally, has entered into what might be called the service economy. Services now constitute the largest share of GDP in most countries and provide the major source of employment in both developed and developing countries. Services permeate all aspects of peoples' lives and are becoming inseparable from most aspects of economic activity. Quality management has been a dominating managerial practice since World War II. With quality management initially associated with manufacturing industries, one might assume the relevance of quality management might decrease with the emergence of the service economy. To the contrary, the emergence of the service economy strengthened the importance of quality issues, which no longer are associated only with manufacturing industries but are increasingly applied in all service sectors, as well. Today, we talk not only about product or service quality but have even expanded the framework of quality to quality of life and quality of environment. Thus, quality and services have emerged in parallel as closely interrelated fields. The Encyclopedia of Quality and the Service Economy explores such relevant questions as: What are the characteristics, nature, and definitions of quality and services? How do we define quality of products, quality of services, or quality of life? How are services distinguished from goods? How do we measure various aspects of quality and services? How can products and service quality be managed most effectively and efficiently? What is the role of customers in creation of values? These questions and more are explored within the pages of this two-volume, A-to-Z reference work.

Harnessing Omni-Channel Marketing Strategies for Fashion and Luxury Brands Wilson Ozuem,Elena Patten,Yllka Azemi,2019-11-15 This book provides a contemporary theoretical insight into the fashion and luxury industry, addressing potential gray areas within the literature. The authors analyze the luxury and fashion industry using multiple perspectives, allowing for a critical comprehensive overview of the phenomenon across diverse streams. The book provides insight into fashion and luxury retailing in the context of both online and brick and mortar retailers based on a variety of market scenarios. It deciphers the rationale of customer behavioral and decision making in online and offline luxury and fashion purchasing contexts. It provides an overview of the challenges that the industry faces with the advent of the evolving omni-channel environment. The multiple theoretical and practical nuances of the fashion and luxury industry are presented. In this sense, the book is a fundamental reference point for the students and academics. This book will be of interest to practitioners in the fashion and luxury retailing sectors. Also, many policy makers will find the conceptual and exploratory insight of this book relevant to their organizational and retailing policies. The new knowledge that is produced in this book is a ground breaker in the fashion and luxury literature. It offers insight from both theoretical and practical perspectives from both retailer and customer perspectives.

Online Brand Communities Francisco J. Martínez-López, Rafael Anaya, Rocio Aguilar, Sebastián Molinillo, 2015-12-11 This book presents and analyzes the concept of online brand communities, an emerging and exciting topic in marketing and eCommerce. First, it lays out the foundations like the evolution of the Web and the so-called Social Web, its utility for users and businesses, and the evolution of the marketing mind-set to adapt the Social Web. On this basis, the book then presents a detailed analysis of online brand communities, examining the concept of virtual community with a specific focus on virtual brand communities. In this context the book also explores recent trends related to branding and brand management. Next, it proposes a classification system for online brand communities, taking into account questions like the motivating factors for consumers to join, participate and stay in a community. The process of value creation in communities is examined from both business and consumer perspectives. The book draws to a close with a brief presentation of the process broadly accepted for the successful development of online brand communities.

Database Marketing Robert C. Blattberg, Byung-Do Kim, Scott A. Neslin, 2010-02-26 Database marketing is at the crossroads of technology, business

strategy, and customer relationship management. Enabled by sophisticated information and communication systems, today's organizations have the capacity to analyze customer data to inform and enhance every facet of the enterprise—from branding and promotion campaigns to supply chain management to employee training to new product development. Based on decades of collective research, teaching, and application in the field, the authors present the most comprehensive treatment to date of database marketing, integrating theory and practice. Presenting rigorous models, methodologies, and techniques (including data collection, field testing, and predictive modeling), and illustrating them through dozens of examples, the authors cover the full spectrum of principles and topics related to database marketing. This is an excellent in-depth overview of both well-known and very recent topics in customer management models. It is an absolute must for marketers who want to enrich their knowledge on customer analytics. (Peter C. Verhoef, Professor of Marketing, Faculty of Economics and Business, University of Groningen) A marvelous combination of relevance and sophisticated yet understandable analytical material. It should be a standard reference in the area for many years. (Don Lehmann, George E. Warren Professor of Business, Columbia Business School) The title tells a lot about the book's approach—though the cover reads, database, the content is mostly about customers and that's where the real-world action is. Most enjoyable is the comprehensive story – in case after case – which clearly explains what the analysis and concepts really mean. This is an essential read for those interested in database marketing, customer relationship management and customer optimization. (Richard Hochhauser, President and CEO, Harte-Hanks, Inc.) In this tour de force of careful scholarship, the authors canvass the ever expanding literature on database marketing. This book will become an invaluable reference or text for anyone practicing, researching, teaching or studying the subject. (Edward C. Malthouse, Theodore R. and Annie Laurie Sills Associate Professor of Integrated Marketing Communications, Northwestern University)

Pervasive Advertising Jörg Müller, Florian Alt, Daniel Michelis, 2011-09-21 This book looks at the future of advertising from the perspective of pervasive computing. Pervasive computing encompasses the integration of computers into everyday devices, like the covering of surfaces with interactive displays and networked mobile phones. Advertising is the communication of sponsored messages to inform, convince, and persuade to buy. We believe that our future cities will be digital, giving us instant access to any information we need everywhere, like at bus stops, on the sidewalk, inside the subway and in shopping malls. We will be able to play with and change the appearance of our cities effortlessly, like making flowers grow along a

building wall or changing the colour of the street we are in. Like the internet as we know it, this digitalization will be paid for by adverts, which unobtrusively provide us suggestions for nearby restaurants or cafés. If any content annoys us, we will be able to effortlessly say so and change it with simple gestures, and content providers and advertisers will know what we like and be able to act accordingly. This book presents the technological foundations to make this vision a reality.

Customer Engagement Marketing Robert W. Palmatier,V. Kumar,Colleen M. Harmeling,2017-08-29 This book provides a synthesis of research perspectives on customer engagement through a collection of chapters from thought leaders. It identifies cutting-edge metrics for capturing and measuring customer engagement and highlights best practices in implementing customer engagement marketing strategies. Responding to the rapidly changing business landscape where consumers are more connected, accessible, and informed than ever before, many firms are investing in customer engagement marketing. The book will appeal to academics, practitioners, consultants, and managers looking to improve customer engagement.

Services Marketing Cases in Emerging Markets Sanjit Kumar Roy,Dilip S. Mutum,Bang Nguyen,2016-09-08 This casebook provides students and academics in business management and marketing with a collection of case studies on services marketing and service operations in emerging economies. It explores current issues and practices in Asia, across different areas, countries, commercial and non-commercial sectors. This book is important and timely in providing a framework for instructors, researchers, and students to understand the service dynamics occurring in these countries. It serves as an invaluable resource for marketing and business management students requiring insights into the operationalization of services across different geographical areas in Asia. Students will find it interesting to compare and contrast different markets covering important aspects related to services.

Social Media Marketing in Tourism and Hospitality Roberta Minazzi, 2014-11-01 This book describes ongoing developments in social media within the tourism and hospitality sector, highlighting impacts on both the demand and the supply side. It offers a combination of theory and practice, with discussion of real-life business experiences. The book is divided into three parts, the first of which provides an overview of recent trends in social media and user-generated content, clarifies concepts that are often used in an overlapping way and examines the “digitization of word of mouth” via online networks. The second part analyzes the impacts that social media can have on traveler behavior for each step in the travel process and also on suppliers, highlighting opportunities, threats and strategies. In the third part of the book, future potential trends deriving from the mobile marketing technologies are explored and possible methods for social monitoring by means of key performance indicators are examined. It is considered how engaging customers and prospects by means of social media might increase customer loyalty, foster electronic word-of-mouth communication, and consequently have important effects on corporate sales and revenues. The discussion encompasses methods to measure company performance on each of the social media in order to understand the optimal mix that will support and improve business strategies.

Creating Technology-Driven Entrepreneurship Giuseppina Passiante,Aldo Romano,2016-08-27 This book proposes a comprehensive analysis of the existing schools of thought on technology-driven entrepreneurship to point out the process-based nature of this phenomenon. It explores whether entrepreneurship can be learned and examines the main processes that help influence entrepreneurial mind-sets. In the current economic landscape, technology-driven entrepreneurship is the driving force behind national economies and entrepreneurial societies. It is the engine of innovation, job creation, productivity and economic growth, bringing benefits both at the level of the individual and of the society and promoting sustainable smart growth and development. This book provides a comprehensive view of “how” entrepreneurs and future entrepreneurs learn and develop their business ventures in a wider environment. Moreover, it discusses issues concerning setting up the suitable entrepreneurial environments, processes, values and policies to encourage and foster individual entrepreneurial aptitudes. It also explores practices for developing technology-driven entrepreneurship in a European context as well as in emerging regions.

Landscape Architecture Documentation Standards Design Workshop,2015-10-26 SUPERB EXECUTION RELIES UPON RIGOROUS PROJECT DOCUMENTATION A project will only be built as well as it is documented. This publication focuses on the key documentation needs of the landscape

architectural design and construction documentation process. That includes both design documentation and construction documentation as well as all that which occurs in the transition from one phase to the other. Documentation requirements include those components necessary to explore and define design intent, logic, physical proposals, and ultimately, the specific components included within construction and bid documents. Discover how proper documentation facilitates every stage of the design process from pre-planning to construction, and leads to a highly resolved built outcome. Understand the principles behind these documentation practices. Implement best practices specific to each documentation phase and drawing, from title block and cover sheet design to soil plans and plant protection. Organize keynoting systems, cross-referencing and interdisciplinary coordination amongst multiple consultants and vendors. Study sample project documents from a leading landscape architecture firm to better understand the elements and benefits of complete and well-coordinated project documentation. These standards have been time-tested by over 150 designers at the industry leading landscape architecture firm Design Workshop, reflecting a range of project types, including parks, streetscapes, urban spaces and over-structure construction. This guide shares the methods behind the success, to facilitate exceptional built outcomes through principled documentation practices.
