The Business of News in England, 1760-1820 Victoria E. M. Gardner, 2016-01-26 The Business of News in England, 1760-1820 explores the commerce of the English press during a critical period of press politicization, as the nation confronted foreign wars and revolutions that disrupted domestic governance.

Expert Systems Richard Forsyth, 1989 This practical guide provides an introduction for people who want to make use of expert systems. It covers some of the practical experiences gained since the emergence of expert systems and their application to real-world problems.

Governing the Present Peter Miller, Nikolas Rose, 2008-04-28 Bringing together empirical research on the government of economic, social and personal life, the book clearly demonstrates the importance of analysing these as conjoint phenomena rather than separate domains, and questions some cherished boundaries between disciplines and topic areas.

Biomechanics of Rowing Valery Kleshnev, 2020-09-21 In rowing, races are often won in spite of, not because of, technique, and many misconceptions still preoccupy both rowers and coaches. This book explains the facts about rowing technique and will help you to find the right way to achieve your best performance. In this new edition, comprehensively updated to take account of the most recent developments in the sport The Biomechanics of Rowing offers a unique insight into the technical and tactical aspects of rowing, based on over twenty-five years experience of working with the best rowers and coaches all around the globe, a careful analysis of millions of data samples, and comprehensive biomechanical modelling with the aim of finding an optimal balance of variables. Topics covered include measurement; performance analysis; technique; ergometer rowing and, finally, rowing equipment and rigging.

Complexity Theory and the Social Sciences David Byrne, 2002-01-04 Chaos and complexity are the new buzz words in both science and contemporary society. The ideas they represent have enormous implications for the way we understand and engage with the world. Complexity Theory and the Social Sciences introduces students to the central ideas which surround the chaos/complexity theories. It discusses key concepts before using them as a way of investigating the nature of social research. By applying them to such familiar topics as urban studies, education and health, David Byrne allows readers new to the subject to appreciate the contribution which complexity theory can make to social research and to illuminating the crucial social issues of our day.

Rowing and Sculling Rosie Mayglothling, 2014-07-31 Crowood Sports Guides are the perfect tool for anyone wanting to improve their performance, from beginners learning the basic skills to more experienced participants working on advanced techniques. These practical, no-nonsense guides will help give you that all-important advantage. Rowing and Sculling - Crowood Sports Guides covers a brief history of rowing; choosing and setting up equipment; safety and risk assessment; capsize drill, steering and coxing; skill development and techniques; psychology and rower well being; understanding refuelling and hydration, and planning an effective training programme in order to optimise flexibility, stability and strength and prevent injury. Fully illustrated with 119 full colour photographic sequences, 33 diagrams and 19 tables.

How the World Breaks Stan Cox, Paul Cox, 2016-07-12 We've always lived on a dangerous planet, but its disasters aren't what they used to be. How the World Breaks gives us a breathtaking new view of crisis and recovery on the unstable landscapes of the Earth's hazard zones. Father and son authors Stan and Paul Cox take us to the explosive fire fronts of overheated Australia, the future lost city of Miami, the fights over whether and how to fortify New York City in the wake of Sandy, the Indonesian mud volcano triggered by natural gas drilling, and other communities that are reimagining their lives after quakes, superstorms, tornadoes, and landslides. In the very decade when we should be rushing to heal the atmosphere and address the enormous inequalities of risk, a strange idea has taken hold of global disaster policy: resilience. Its proponents say that threatened

communities must simply learn the art of resilience, adapt to risk, and thereby survive. This doctrine obscures the human hand in creating disasters and requires the planet's most beleaguered people to absorb the rush of floodwaters and the crush of landslides, freeing the world economy to go on undisturbed. The Coxes' great contribution is to pull the disaster debate out of the realm of theory and into the muck and ash of the world's broken places. There we learn that change is more than mere adaptation and life is more than mere survival. Ultimately, *How the World Breaks* reveals why—unless we address the social, ecological, and economic roots of disaster—millions more people every year will find themselves spiraling into misery. It is essential reading for our time.

Will It Make The Boat Go Faster? Harriet Beveridge, Ben Hunt-Davis, 2020-03-28 With its winning mix of gripping narrative and easy-to-implement performance-raising tips, this book has become a best-selling classic. It's garnered 5-star reviews and wide-ranging endorsements - from Sebastian Coe and Dame Kelly Holmes to Lord Digby Jones

How Democracies Die Steven Levitsky, Daniel Ziblatt, 2019-01-08 NEW YORK TIMES BESTSELLER • "Comprehensive, enlightening, and terrifyingly timely."—The New York Times Book Review (Editors' Choice) WINNER OF THE GOLDSMITH BOOK PRIZE • SHORTLISTED FOR THE LIONEL GELBER PRIZE • NAMED ONE OF THE BEST BOOKS OF THE YEAR BY The Washington Post • Time • Foreign Affairs • WBUR • Paste Donald Trump's presidency has raised a question that many of us never thought we'd be asking: Is our democracy in danger? Harvard professors Steven Levitsky and Daniel Ziblatt have spent more than twenty years studying the breakdown of democracies in Europe and Latin America, and they believe the answer is yes. Democracy no longer ends with a bang—in a revolution or military coup—but with a whimper: the slow, steady weakening of critical institutions, such as the judiciary and the press, and the gradual erosion of long-standing political norms. The good news is that there are several exit ramps on the road to authoritarianism. The bad news is that, by electing Trump, we have already passed the first one. Drawing on decades of research and a wide range of historical and global examples, from 1930s Europe to contemporary Hungary, Turkey, and Venezuela, to the American South during Jim Crow, Levitsky and Ziblatt show how democracies die—and how ours can be saved. Praise for *How Democracies Die* "What we desperately need is a sober, dispassionate look at the current state of affairs. Steven Levitsky and Daniel Ziblatt, two of the most respected scholars in the field of democracy studies, offer just that."—The Washington Post "Where Levitsky and Ziblatt make their mark is in weaving together political science and historical analysis of both domestic and international democratic crises; in doing so, they expand the conversation beyond Trump and before him, to other countries and to the deep structure of American democracy and politics."—Ezra Klein, Vox "If you only read one book for the rest of the year, read *How Democracies Die*. . . . This is not a book for just Democrats or Republicans. It is a book for all Americans. It is nonpartisan. It is fact based. It is deeply rooted in history. . . . The best commentary on our politics, no contest."—Michael Morrell, former Acting Director of the Central Intelligence Agency (via Twitter) "A smart and deeply informed book about the ways in which democracy is being undermined in dozens of countries around the world, and in ways that are perfectly legal."—Fareed Zakaria, CNN

Communicating Differences Sudeshna Roy, Ibrahim Seaga Shaw, 2016-02-05 This volume captures the essence of how we communicate differences in relationships, between and across cultures, in organizations, through education and in moments of local and global conflict and crisis that demonstrates the importance and viability of approaching peace and conflict communication from various fields within communication studies.

Ice and Mixed Climbing Will Gadd, 2012-02-09 * Will Gadd is an ESPN X Games and Ice World Cup winner * There are 1.1 million ice climbers in the U.S. (Outdoor Industry Association, 2001) * Seventh installment in The Mountaineers Outdoor Expert series Mixed climbing is my favorite discipline. It's the most fun because it has the fewest rules-sort of like professional wrestling compared to boxing. So says Will Gadd, as profiled in

Fifty Favorite Climbs. Here the champion ice climber presents the same techniques and veteran wisdom he imparts to those who attend his annual clinics. These include step-by-step instructions for the swing (ice axe), the kick (footwork), and putting it all together (tracking); how to read ice to select your line and follow it safely; and drytool techniques for mixed climbing. Training exercises and inspirational stories complete this seminal guide. Will Gadd won every major ice competition in the world in 1998 and 1999, as well as the 2000 Ice World Cup. A resident of Canmore, Alberta, he has written for Climbing and Rock & Ice, among other publications. Roger Chayer's photos have appeared in Rock & Ice, Climbing, Grippped, Equinox, and the Alpine Club of Canada Journal. He lives in Calgary, Alberta. Part of the Mountaineers Outdoor Expert series.

From Bean to Bar Andrew Baker, 2020-03 Chocolate dark, white or milk, smooth, plain and creamy or bursting with flavours and textures, it's guaranteed to get the pulses racing. And with chocolate-making now one of the most exciting areas of Britain's artisan food scene, this book takes you on a tantalising tasting tour of the country's sweet spots that helps you explore chunks of Britain while enjoying the country's best and most authentic chocolate. Whether they're based in the Highlands of Scotland or the mountains of Wales, a shed in Cleethorpes or in the shadow of Winchester Cathedral, we seek out the rising stars of the chocolate industry, try their mouthwatering products and explore towns and cities where the bean-to-bar magic takes place. Among the people and places included are Duffy Sheardown, a former Formula One racing engineer who makes bars of chocolate in a shed in Cleethorpes that are prized by chocolate connoisseurs all over the world, Willie Harcourt-Cooze, a glamorous globetrotter who grows cocoa in Venezuela and makes chocolate in Uffculme, Devon (sold in Waitrose) and the passionate young women of Dormouse, who from tiny premises in Manchester are winning international accolades.

Pushed Jennifer Block, 2007-09-10 A groundbreaking narrative investigation of childbirth in the age of machines, malpractice, and managed care, *Pushed* presents the complete picture of maternity care in America. From inside the operating room of a hospital with a 44% Cesarean rate to the living room floor of a woman who gives birth with an illegal midwife, Block exposes a system in which few women have an optimal experience. *Pushed* surveys the public health impact of routine labor inductions, C-sections, and epidurals, but also examines childbirth as a women's rights issue: Do women even have the right to choose a normal birth? Is that right being upheld? A wake-up call for our times, Block's gripping research reveals that while emergency obstetric care is essential, we are overusing medical technology at the expense of maternal and infant health.

Motivating People in Lean Organizations Linda Holbeche, Andrew Mayo, 2009-11-03 Shortlisted for the prestigious Management Consultancies Association (MCA) best management book of the year, 1997. *Motivating People in Lean Organizations* is the essential guide for managers who need to motivate employees and promote new forms of career development. In organizations that have been delayed, career progression is often stunted. The best talent may jump ship at a time when they're most needed, leaving less capable employees to fill the space. This book focuses on: implementation of motivational strategies, appropriate internal communications, new career development structures, reward and recognition of achievement. *Motivating People in Lean Organizations* is idea for HR/training managers and directors. Line managers, team leaders and internal communications managers will also find this of great benefit. Linda Holbeche is Director of Research at Roffey Park Management Institute. She has been studying career development in organizations with flatter structures for several years and is the author of *Career Development: The impact of flatter structures on careers*.

Social Work Theories and Methods Mel Gray, Stephen Webb, 2012-12-14 The second edition of this celebrated book by two of the world's leading researchers in social work introduces readers to the main theories, theorists and perspectives that contribute to the debate on social work theory and social work methods. It brings together some outstanding international researchers in social work to challenge the reader to critically

question how they think about social work. The new edition includes a focus on the psychosocial perspective, with three new chapters on: - Cognitive behavioural approaches - Attachment theory and psychoanalytic social work - Ecological approaches Each chapter allows the reader to relate the theories and methods discussed to their own personal experiences. This reader friendly book includes student questions, glossaries and recommended reading so that students and practitioners can reappraise and expand the knowledge they have learned. This book will be valuable for undergraduate and postgraduate students taking courses in social work theory and research methods, social work interventions and perspectives as well as post qualifying students and researchers in social work.

Developments and Directions in Intellectual Property Law Hayleigh Boshier, Eleonora Rosati, 2023-05-24 Developments and Directions in Intellectual Property Law celebrates the 20th anniversary of award-winning intellectual property (IP) blog, The IPKat, originally founded in 2003. Over the past two decades, The IPKat has covered and commented on several of the most topical developments in the IP field from substantive, practical, and policy standpoints. Today, The IPKat is considered the “Most Popular Intellectual Property Law Blog” of all time (source: Justia) and its readers are academics, members of the judiciary, policy and law-makers, practitioners, and students from all over the world. By bringing together several of the current and past contributors to The IPKat, this book reflects on the developments and directions that have emerged in the IP field over the past twenty years. Topics covered include changes within substantive IP rights, as well as IP law, policy, and practice broadly intended and from a global perspective. From copyright to trade marks, patents to designs, image and publicity rights to geographical indications, and developments in IP practice and the court system to contract drafting, readers of this book will find expert insights into some of the most notable developments in IP since the inception of The IPKat blog.

The Power of Money Armand Van Dormael, 2016-07-27 A highly readable account of the collision between sovereign states and global economic forces for the control of money. Throughout the ages money was a prerogative of national sovereignty and currency management was the responsibility of governments. Bretton Woods provided the post-war framework for intergovernmental monetary cooperation until the banking community, using the Eurodollar as an international medium of exchange, forced governments to adopt a regime of floating rates in the 1970s. The book describes the development of the Eurodollar market and the consequences for world finance as a new breed of financiers and currency traders radically changed the nature of international banking.
