Surge Jay Bernard,2019-06-20 **Winner of the 2020 Sunday Times/University of Warwick Young Writer of the Year Award** Jay Bernard's extraordinary debut is a fearless exploration of the New Cross Fire of 1981, a house fire at a birthday party in which thirteen young black people were killed. Dubbed the 'New Cross Massacre', the fire was initially believed to be a racist attack, and the indifference with which the tragedy was met by the state triggered a new era of race relations in Britain. Tracing a line from New Cross to the 'towers of blood' of the Grenfell fire, this urgent collection speaks with, in and of the voices of the past, brought back by the incantation of dancehall rhythms and the music of Jamaican patois, to form a living presence in the absence of justice. A ground-breaking work of excavation, memory and activism - both political and personal, witness and documentary - Surge shines a much-needed light on an unacknowledged chapter in British history, one that powerfully resonates in our present moment. 'The verse has anger and political purpose, but a rare lyrical precision, too. The combination is powerful' Sebastian Faulks, Spectator, Books of the Year 2020 *Winner of the Ted Hughes Award for New Work in Poetry* *Shortlisted for the Costa Poetry Award; T.S. Eliot Prize; Forward Prize for Best First Collection; Dylan Thomas Prize; RSL Ondaatje Prize; John Pollard Foundation International Poetry Prize* *Longlisted for the Jhalak Prize 2020*

Why Teach? Mark Edmundson,2014-08-12 Presents a collection of essays that explore a college education as a means through which serious-minded individuals broaden their minds and acquire life skills, arguing that higher learning is an essential remedy for today's problems.

What School Could Be Ted Dintersmith,2018-04-10 An inspiring account of teachers in ordinary circumstances doing extraordinary things, showing us how to transform education What School Could Be offers an inspiring vision of what our teachers and students can accomplish if trusted with the challenge of developing the skills and ways of thinking needed to thrive in a world of dizzying technological change. Innovation expert Ted Dintersmith took an unprecedented trip across America, visiting all fifty states in a single school year. He originally set out to raise awareness about the urgent need to reimagine education to prepare students for a world marked by innovation--but America's teachers one-upped him. All across the country, he met teachers in ordinary settings doing extraordinary things, creating innovative classrooms where children learn deeply and joyously as they gain purpose, agency, essential skillsets and mindsets, and real knowledge. Together, these new ways of teaching and learning offer a vision of what school could be—and a model for transforming schools throughout the United States and beyond. Better yet, teachers and parents don't have to wait for the revolution to come from above. They can readily implement small changes that can make a big difference. America's clock is ticking. Our archaic model of education trains our kids for a world that no longer exists, and accelerating advances in technology are eliminating millions of jobs. But the trailblazing of many American educators gives us reasons for hope. Capturing bold ideas from teachers and classrooms across America, What School Could Be provides a realistic and profoundly optimistic roadmap for creating cultures of innovation and real learning in all our schools.

I Can Do It Louise Hay,2021-08-17 In this concise yet information-packed book—which you can listen to on the included audio download or read at your leisure—bestselling author LOUISE HAY shows you that you can do it—that is, change and improve virtually every aspect of your life—by understanding and using affirmations correctly. Louise explains that every thought you think and every word you speak is an affirmation. Even your self-talk, your internal dialogue, is a stream of affirmations. You're affirming and creating your life experiences with every word and thought. Your beliefs are merely habitual thinking patterns that you learned as a child, and many of them work very well for you. But other beliefs may be limiting your ability to create the very things you say you want. You need to pay attention to your thoughts so that you can begin to eliminate the ones creating experiences that you don't want. As Louise discusses topics such as health, forgiveness, prosperity, creativity, relationships, job success, and self-esteem, you'll see that affirmations are solutions that will replace whatever problem you might have in a particular area. By the end of this book, you'll be able to say I can do it with confidence, knowing that you're on your way to the wonderful, joy-filled life you deserve.

The Scientific Revolution in National Context Roy Porter, 1992-09-25 The 'scientific revolution' of the sixteenth and seventeenth century continues to command attention in historical debate. Controversy still rages about the extent to which it was essentially a 'revolution of the mind', or how far it

must also be explained by wider considerations. In this volume, leading scholars of early modern science argue the importance of specifically national contexts for understanding the transformation in natural philosophy between Copernicus and Newton. Distinct political, religious, cultural and linguistic formations shaped scientific interests and concerns differently in each European state and explain different levels of scientific intensity. Questions of institutional development and of the transmission of scientific ideas are also addressed. The emphasis upon national determinants makes this volume an interesting contribution to the study of the Scientific Revolution.

Erasmus, Man of Letters Lisa Jardine, 2015-06-23 The name Erasmus of Rotterdam conjures up a golden age of scholarly integrity and the disinterested pursuit of knowledge, when learning could command public admiration without the need for authorial self-promotion. Lisa Jardine, however, shows that Erasmus self-consciously created his own reputation as the central figure of the European intellectual world. Erasmus himself—the historical as opposed to the figural individual—was a brilliant, maverick innovator, who achieved little formal academic recognition in his own lifetime. What Jardine offers here is not only a fascinating study of Erasmus but also a bold account of a key moment in Western history, a time when it first became possible to believe in the existence of something that could be designated European thought.
