The Crash Controversy Martin Barker, Jane Arthurs, Ramaswami Harindranath, 2001 Between 1996-97 an almost unprecedented campaign was mounted in the British press against one film: David Cronenberg's Crash. What motivated this campaign? What can it tell us about British film culture? What impact did the campaign have on general audiences? This book, which draws on a year-long investigation supported by the Economic and Social Research Council, offers a series of important and challenging findings and is a major contribution to our understanding of censorship campaigns, how audiences respond to films, and the strategies employed in engaging with such texts.

Python Crash Course Eric Matthes, 2015-11-01 Python Crash Course is a fast-paced, thorough introduction to Python that will have you writing programs, solving problems, and making things that work in no time. In the first half of the book, you'll learn about basic programming concepts, such as lists, dictionaries, classes, and loops, and practice writing clean and readable code with exercises for each topic. You'll also learn how to make your programs interactive and how to test your code safely before adding it to a project. In the second half of the book, you'll put your new knowledge into practice with three substantial projects: a Space Invaders-inspired arcade game, data visualizations with Python's super-handful libraries, and a simple web app you can deploy online. As you work through Python Crash Course you'll learn how to: –Use powerful Python libraries and tools, including matplotlib, NumPy, and Pygal –Make 2D games that respond to keypresses and mouse clicks, and that grow more difficult as the game progresses –Work with data to generate interactive visualizations –Create and customize Web apps and deploy them safely online –Deal with mistakes and errors so you can solve your own programming problems If you've been thinking seriously about digging into programming, Python Crash Course will get you up to speed and have you writing real programs fast. Why wait any longer? Start your engines and code! Uses Python 2 and 3

Crash Karen Redrobe, 2010-08-03 Artists, writers, and filmmakers from Andy Warhol and J. G. Ballard to Alejandro González Iñárritu and Ousmane Sembène have repeatedly used representations of immobilized and crashed cars to wrestle with the conundrums of modernity. In *Crash*, Karen Beckman argues that representations of the crash parallel the encounter of film with other media, and that these collisions between media offer useful ways to think about alterity, politics, and desire. Examining the significance of automobile collisions in film genres including the “cinema of attractions,” slapstick comedies, and industrial-safety movies, Beckman reveals how the car crash gives visual form to fantasies and anxieties regarding speed and

stasis, risk and safety, immunity and contamination, and impermeability and penetration. Her reflections on the crash as the traumatic, uncertain moment of inertia that comes in the wake of speed and confidence challenge the tendency in cinema studies to privilege movement above film's other qualities. Ultimately, Beckman suggests that film studies is a hybrid field that cannot apprehend its object of study without acknowledging the ways that cinema's technology binds it to capitalism's industrial systems and other media, technologies, and disciplines.

MariaDB Crash Course Ben Forta, 2011-08-29 MariaDB is a database server that offers drop-in replacement functionality for MySQL. Built by some of the original authors of MySQL, with assistance from the broader community of free and open source software developers, MariaDB offers a rich set of feature enhancements to MySQL, including alternate storage engines, server optimizations, and patches. MariaDB Crash Course teaches you all you need to know to be immediately productive with MariaDB. Master trainer Ben Forta introduces all the essentials through a series of quick, easy-to-follow, hands-on lessons. Instead of belaboring database theory and relational design, Forta focuses on teaching solutions for the majority of users who simply want to interact with data. Learn how to: Retrieve and sort data Filter data using comparisons, regular expressions, and full text search Join relational data Create and alter tables Insert, update, and delete data Leverage the power of stored procedures and triggers Use views and cursors Manage transactional processing Create user accounts and manage security via access control

Software Engineering Research, Management and Applications Roger Lee, 2009-01-29 The 6th ACIS International Conference on Software Engineering, Research, Management and Applications (SERA 2008) was held in Prague in the Czech Republic on August 20 – 22. SERA '08 featured excellent theoretical and practical contributions in the areas of formal methods and tools, requirements engineering, software process models, communication systems and networks, software quality and evaluation, software engineering, networks and mobile computing, parallel/distributed computing, software testing, reuse and metrics, database retrieval, computer security, software architectures and modeling. Our conference officers selected the best 17 papers from those papers accepted for presentation at the conference in order to publish them in this volume. The papers were chosen based on review scores submitted by members or the program committee, and underwent further rounds of rigorous review.

Integrated Security Systems Design Thomas L. Norman, 2014-09-10 *Integrated Security Systems Design, 2nd Edition*, is recognized as the industry-leading book on the subject of security systems design. It explains how to design a fully integrated security system that ties together numerous subsystems into one complete, highly coordinated, and highly functional system. With a flexible and scalable enterprise-level system, security decision makers can make better informed decisions when incidents occur and improve their operational efficiencies in ways never before possible. The revised edition covers why designing an integrated security system is essential and how to lead the project to success. With new and expanded coverage of network architecture, physical security information management (PSIM) systems, camera technologies, and integration with the Business Information

Management Network, Integrated Security Systems Design, 2nd Edition, shows how to improve a security program's overall effectiveness while avoiding pitfalls and potential lawsuits. Guides the reader through the strategic, technical, and tactical aspects of the design process for a complete understanding of integrated digital security system design. Covers the fundamentals as well as special design considerations such as radio frequency systems and interfacing with legacy systems or emerging technologies. Demonstrates how to maximize safety while reducing liability and operating costs.

Moments Before the Crash P. D. Crofts, 2010 Ben lives in a country where bare knuckle fighting is a national sport. Hedonistic joyclubs serve drug cocktails while youths dance all night to aggressive electronic music. Those who are not so easily distracted are controlled by harsh laws and armed police. The country is on the brink of revolution. Politicians govern from a fortress known as the White Zone, clinging to power through the doctrine of security. But the system has become a liability to itself when it spurs even ordinary young men like Ben to join the vanguard of violent revolutionaries.

Proceedings of the Second International Conference on Innovations in Computing Research (ICR'23) Kevin Daimi, Abeer Al Sadoon, 2023-06-16 The Second International Conference on Innovations in Computing Research (ICR'23) brings together a diverse group of researchers from all over the world with the intent of fostering collaboration and dissemination of the innovations in computing technologies. The conference is aptly segmented into six tracks: Data Science, Computer and Network Security, Health Informatics and Medical Imaging, Computer Science and Computer Engineering Education, Internet of Things, and Smart Cities/Smart Energy. These tracks aim to promote a birds-of-the-same-feather congregation and maximize participation. The Data Science track covers a wide range of topics including complexity score for missing data, deep learning and fake news, cyberbullying and hate speech, surface area estimation, analysis of gambling data, car accidents predication model, augmenting character designers' creativity, deep learning for road safety, effect of sleep disturbances on the quality of sleep, deep learning-based path-planning, vehicle data collection and analysis, predicting future stocks prices, and trading robot for foreign exchange. Computer and Network Security track is dedicated to various areas of cybersecurity. Among these are decentralized solution for secure management of IoT access rights, multi-factor authentication as a service (MFAaaS) for federated cloud environments, user attitude toward personal data privacy and data privacy economy, host IP obfuscation and performance analysis, and vehicle OBD-II port countermeasures. The Computer Science and Engineering Education track enfolds various educational areas, such as data management in industry-academia joint research: a perspective of conflicts and coordination in Japan, security culture and security education, training

and awareness (SETA), influencing information security management, engaging undergraduate students in developing graphical user interfaces for NSF funded research project, and emotional intelligence of computer science teachers in higher education. On the Internet of Things (IoT) track, the focus is on industrial air quality sensor visual analytics, social spider optimization meta-heuristic for node localization optimization in wireless sensor networks, and privacy aware IoT-based fall detection with infrared sensors and deep learning. The Smart Cities and Smart Energy track spans various areas, which include, among others, research topics on heterogeneous transfer learning in structural health monitoring for high-rise structures and energy routing in energy Internet using the firefly algorithm.
