Car Crash Culture M. Brottman,2016-04-30 A morbidly fascinating and

articulate collection of essays, this book explores the grim underside of America's cult of the automobile and the disturbing, frequently conspiratorial, speculations that arise whenever the car becomes the cause or the site of human death. Through analysis of fatal celebrity car accidents and other examples of death by automobile, as well as through personal memoir and forensic reports, cultural critics ponder our very human fascination with the car crash. Topics include the roles and experiences of passengers and bystanders, car crash conspiracy theories, the automobile as a site of murder, studies of car crash cinema, and psychological interpretations of the notion of the 'accident.' The book features original essays by such underground icons as Kenneth Anger and Adam Parfrey.

Someplace Else Donna Montalbano, 2015-08-21 Is there Love After Death? When you leave your body, where do you go? Star-crossed young lovers meet in an ethereal borderland between life and death, called Someplace Else. One of them is alive, and the other is not; but they soon discover that there are fates worse than death. Unimaginable danger surrounds them: a lethal Garden of Eden; ghost towns inhabited by real ghosts; a bottomless blue hole of drowned spirits. Inside Someplace Else, desperate souls prey on the living. The Sun is a god, and Light and Dark rule their own kingdoms. The real-life setting is the otherworldly wilderness of the New Jersey Pine Barrens, home to the infamous Jersey Devil. Someplace Else is a supernatural love story more chilling, heartbreaking and purely romantic than any you have ever read. ForeWord Clarion Book Review

Massively Parallel Processing Applications and Development L. Dekker, W. Smit, J.C. Zuidervart, 2013-10-22 The contributions of a diverse selection of international hardware and software specialists are assimilated in this book's exploration of the development of massively parallel processing (MPP). The emphasis is placed on industrial applications and collaboration with users and suppliers from within the industrial community consolidates the

scope of the publication. From a practical point of view, massively parallel data processing is a vital step to further innovation in all areas where large amounts of data must be processed in parallel or in a distributed manner, e.g. fluid dynamics, meteorology, seismics, molecular engineering, image processing, parallel data base processing. MPP technology can make the speed of computation higher and substantially reduce the computational costs. However, to achieve these features, the MPP software has to be developed further to create user-friendly programming systems and to become transparent for present-day computer software. Application of novel electro-optic components and devices is continuing and will be a key for much more general and powerful architectures. Vanishing of communication hardware limitations will result in the elimination of programming bottlenecks in parallel data processing. Standardization of the functional characteristics of a programming model of massively parallel computers will become established. Then efficient programming environments can be developed. The result will be a widespread use of massively parallel processing systems in many areas of application.
