The Crazy Bird Christopher Maclaine,1951

Crazy for Birds Misha Maynerick Blaise,2020-04-07 An exuberant and vibrant illustrated exploration of birds and our relationships with them. From the Common Swift, which can stay in the air continuously without landing for up to ten months at a time, to the tiny Goldcrest, Europe's smallest bird, which can lay a clutch of a dozen eggs in two weeks totaling one-and-one-half times its body weight, the class of animals we call birds is filled with incredible feats of beauty, intellect, and wonder. With enthralling facts, humorous anecdotes, and gorgeous artwork, artist Misha Blaise pays loving homage to these amazing beings that populate our skies and share the planet with us. Using her own adoration of birds as a starting point to explore avian minutiae both strange and fascinating, Blaise winds through the interconnectedness between humans and our feathered friends, from the eccentric people who obsess about birds to the compelling ways people have integrated birds into culture throughout history, as well as our similar behaviors, kindred intelligence, and shared habitats. Thoughtful, philosophical, and delightful, *Crazy for Birds* pairs beautiful artwork with whimsical writing to explore the many wonders of birds, shedding light on our abiding connection with nature, the diversity of life, and the idiosyncrasy of the human psyche.

Return of the Crazy Bird Clara Pinto-Correia,2014-01-15

Crazy Bird Stories Daryl Barnes,2020-11-14 The aim of this book is to introduce to birds through entertainment and education. Having fun with birds in these twelve humorous, catchy and 'crazy' short stories will hopefully cement an impression in the mind of each child that will remain with them as they develop and grow. I have observed that reading to small children is most important and that it can sow a seed for the future. When children are older and can read for themselves they can then enjoy the 'crazy' stories and discover some interesting facts about a 'real' bird that is related to the fictitious one. This introduction to birds will hopefully encourage children and parents alike to seek and discover more about the large range of birds species that Australia and this planet of ours, have to offer. Since relocating from Coleraine in Western Victoria to Mackay in North Central Queensland in 1996, I soon discovered a diverse range of habitats including bushland, wetland, rainforest and beaches, all within an eighty-kilometer radius of the town. Of the many bird species that I've observed here, I selected twelve to feature in this book.

Return of the Crazy Bird Clara Pinto-Correia,2006-04-18 Using the history of the concept of extinction with the dodo as a case study, Pinto-Correia carefully weaves together story fragments to give a cohesive eye-opening view of 17th century exploration and the grave ramifications it had for the survival and extinction of many species. More importantly, she shows us the intellectual underpinnings of the old view that it was acceptable for some animals to die out. Within this narrative, we can see what the modern view of the dodo tells us about the history of our changing understanding and valuation of nature and our place in it. Strong writing, powered by lively historical anecdotes and sober insights into human behavior, makes this beautifully illustrated book a page-turner to the end.

Becky and her mom are getting used to having Billy around, as he performs various household chores, utilizing his amazing strength. Nothing could be better, aside from a jumpy relationship with the cat. until one day Billy hears screeching in the back yard and runs out to find a very large owl attacking his housemate. "I hate that cat, but it's our cat!" yells Billy, and chases the owl off. Billy soon discovers that the owl he has just scared off has left an egg in his nest. When the egg hatches, it's up to Billy to reunite the baby owl with his mother, and the two head off into the deep, deep woods in search of her. The resulting adventure is a crazy potion of all-ages fun, humor, thrills and chills like only Tony Millionaire is capable of.

Nature's Ghosts Mark V. Barrow, Jr., 2011-04-15 The rapid growth of the American environmental movement in recent decades obscures the fact that long before the first Earth Day and the passage of the Endangered Species Act, naturalists and concerned citizens recognized—and worried about—the problem of human-caused extinction. As Mark V. Barrow reveals in *Nature's Ghosts*, the threat of species loss has haunted Americans since the early days of the republic. From Thomas Jefferson's day—when the fossil remains of such fantastic lost animals as the mastodon and the woolly mammoth were first reconstructed—through the pioneering conservation efforts of early naturalists like John James Audubon and John Muir, Barrow shows how Americans came to understand that it was not only possible for entire species to die out, but that humans themselves could be responsible for their extinction. With the destruction of the passenger pigeon and the precipitous decline of the bison, professional scientists and wildlife enthusiasts alike began to understand that even very common species were not safe from the juggernaut of modern, industrial society. That realization spawned public education and legislative campaigns that laid the foundation for the modern environmental movement and the preservation of such iconic creatures as the bald eagle, the California condor, and the whooping crane. A sweeping, beautifully illustrated historical narrative that unites the fascinating stories of endangered animals and the dedicated individuals who have studied and struggled to protect them, *Nature's Ghosts* offers an unprecedented view of what we've lost—and a stark reminder of the hard work of preservation still ahead.

Billy Hazelnuts Tony Millionaire, 2006-04-05 Tony Millionaire, creator of Sock Monkey and one of America's most popular weekly comic strips, *Maakies*, delivers his first original graphic novel for Fantagraphics, *Billy Hazelnuts*. Billy Hazelnut transmutes nursery rhymes and the golem myth into a storybook about Becky, girl scientist, her friend Billy Hazelnuts (who was created from cooking ingredients by tailless mice), and their journey to find the missing moon while battling an evil steam-driven alligator with a seeing-eye skunk. Millionaire fuses the darker spirit of older fairy tales with an absurdist adventure story, throws gender politics into the mix, and brings it to life with his dementedly charming and meticulous drawing style that is utterly transporting.

Crazy Bird Stories Daryl Barnes, 2019-11-04 This story is based upon a relationship between a bird and rainforest termites. In Papua New Guinea, during the month of November, the tiny Buff-breasted Paradise-Kingfisher prepares to return to its birthplace to breed. Only certain locations along the North Queensland coast offer suitable habitat. Using its amazing navigational skills, it flies the long distance required with the aid of a northerly wind. Soon after reaching its destination and finding a mate, they both search for a perfect nest site. It must be a terrestrial termite mound with an active colony of rainforest termites. Oh! The wonders of nature. Daryl Barnes
