The Operators Michael Hastings,2012-11-27 The inspiration for the Netflix original movie War Machine, starring Brad Pitt, Tilda Swinton, and Ben Kingsley From the author of The Last Magazine, a shocking behind-the-scenes portrait of our military commanders, their high-stake maneuvers, and the political firestorm that shook the United States. In the shadow of the hunt for Bin Laden and the United States' involvement in the Middle East, General Stanley McChrystal, the commanding general of international and U.S. forces in Afghanistan, was living large. His loyal staff liked to call him a "rock star." During a spring 2010 trip, journalist Michael Hastings looked on as McChrystal and his staff let off steam, partying and openly bashing the Obama administration. When Hastings's article appeared in Rolling Stone, it set off a political firestorm: McChrystal was unceremoniously fired. In The Operators, Hastings picks up where his Rolling Stone coup ended. From patrol missions in the Afghan hinterlands to senior military advisors' late-night bull sessions to hotel bars where spies and expensive hookers participate in nation-building, Hastings presents a shocking behind-the-scenes portrait of what he fears is an unwinnable war. Written in prose that is at once eye-opening and other times uncannily conversational, readers of No Easy Day will take to Hastings' unyielding first-hand account of the Afghan War and its cast of players.

Holeshot Jackie Barbosa,2019-10-01 Owen I can have any girl I want. Except her. I'm good at exactly two things: motocross racing and casual sex. Or I was good at the second one until I met Lucy Salcido. She's a reporter for MotoRacer magazine, and she's been embedded with my team ever since I came out of nowhere to lead the championship series this year. Having her around all the time has definitely put a crimp in my style. It's tough to pick up a new girl after every race when Lucy's there, watching me. Judging me. And it doesn't help that she's the girl I really want: all sexy brown skin, big eyes, soft curves, and the kind of smart that should make a guy like me—who barely graduated high school—quake in his dirt bike boots but just makes me hot and hard. But I don't do relationships. I can't. Not when I'm on the road all the time. Not when I've got no prospects for being anywhere else. A girl like Lucy doesn't want a guy like me. Or does she? Lucy He's everything I don't like in a guy. So why do I want him so hard? When my editor assigned me to Owen Lenart's racing team, I knew I was going to dislike him before I even met him. Not only is he the kind of cocky bastard you'd expect a crazy dirt biker to be, he's also got a rep for loving and leaving them. Still, he's the hottest racer on the motocross circuit right now, in more ways than one. I am not going to deny that he's easy on the eyes and hard on the circulatory system. He does things to me without even touching me. Not that I think he's interested. I don't want to be another one of Owen's conquests. Not a little bit. I want it a lot. AUTHOR'S NOTE: This book contains instalust, instalove, and on-the-page descriptions of very spicy Thai food. And also on-the-page descriptions of the other thing you were thinking of when you read the end of that sentence. If you like stories where two people fall for each other fast and hard, this book is for you. Best, M.A.

Crazy Good Charles Leerhsen,2008-05-20 A hundred years ago, the most famous athlete in America was a horse. But Dan Patch was more than a sports star; he was a cultural icon in the days before the automobile. Born crippled and unable to stand, he was nearly euthanized. For a while, he pulled the grocer's wagon in his hometown of Oxford, Indiana. But when he was entered in a race at the county fair, he won -- and he kept on winning. Harness racing was the top sport in America at the time, and Dan, a pacer, set the world record for the mile. He eventually lowered the mark by four seconds, an unheard-of achievement that would not be surpassed for decades. America loved Dan Patch, who, though kind and gentle, seemed to understand that he was a superstar: he acknowledged applause from the grandstands with a nod or two of his majestic head and stopped as if to pose when he saw a camera. He became the first celebrity sports endorser; his name appeared on breakfast cereals, washing machines, cigars, razors, and sleds. At a time when the highest-paid baseball player, Ty Cobb, was making \$12,000 a year, Dan Patch was earning over a

million dollars. But even then horse racing attracted hustlers, cheats, and touts. Drivers and owners bet heavily on races, which were often fixed; horses were drugged with whiskey or cocaine, or switched off with ringers. Although Dan never lost a race, some of his races were rigged so that large sums of money could change hands. Dan's original owner was intimidated into selling him, and America's favorite horse spent the second half of his career touring the country in a plush private railroad car and putting on speed shows for crowds that sometimes exceeded 100,000 people. But the automobile cooled America's romance with the horse, and by the time he died in 1916, Dan was all but forgotten. His last owner, a Minnesota entrepreneur gone bankrupt, buried him in an unmarked grave. His achievements have faded, but throughout the years, a faithful few kept alive the legend of Dan Patch, and in Crazy Good, Charles Leerhsen travels through their world to bring back to life this fascinating story of triumph and treachery in small-town America and big-city racetracks.

The Lumumba Plot Stuart A. Reid,2023-10-17 The New York Times Book Review Editors' Choice • A spellbinding work of history that reads like a Cold War spy thriller—about the U.S.-sanctioned plot to assassinate the democratically elected leader of the newly independent Congo “This is one of the best books I have read in years . . . gripping, full of colorful characters, and strange plot twists.” —Fareed Zakaria, CNN host It was supposed to be a moment of great optimism, a cause for jubilation. The Congo was at last being set free from Belgium—one of seventeen countries to gain independence in 1960 from ruling European powers. At the helm as prime minister was charismatic nationalist Patrice Lumumba. Just days after the handover, however, the Congo’s new army mutinied, Belgian forces intervened, and Lumumba turned to the United Nations for help in saving his newborn nation from what the press was already calling “the Congo crisis.” Dag Hammarskjöld, the tidy Swede serving as UN secretary-general, quickly arranged the organization’s biggest peacekeeping mission in history. But chaos was still spreading. Frustrated with the fecklessness of the UN and spurned by the United States, Lumumba then approached the Soviets for help—an appeal that set off alarm bells at the CIA. To forestall the spread of Communism in Africa, the CIA sent word to its station chief in the Congo, Larry Devlin: Lumumba had to go. Within a year, everything would unravel. The CIA plot to murder Lumumba would fizzle out, but he would be deposed in a CIA-backed coup, transferred to enemy territory in a CIA-approved operation, and shot dead by Congolese assassins. Hammarskjöld, too, would die, in a mysterious plane crash en route to negotiate a cease-fire with the Congo’s rebellious southeast. And a young, ambitious military officer named Joseph Mobutu, who had once sworn fealty to Lumumba, would seize power with U.S. help and misrule the country for more than three decades. For the Congolese people, the events of 1960–61 represented the opening chapter of a long horror story. For the U.S. government, however, they provided a playbook for future interventions.

The Secret of Our Success Joseph Henrich,2017-10-17 How our collective intelligence has helped us to evolve and prosper Humans are a puzzling species. On the one hand, we struggle to survive on our own in the wild, often failing to overcome even basic challenges, like obtaining food, building shelters, or avoiding predators. On the other hand, human groups have produced ingenious technologies, sophisticated languages, and complex institutions that have permitted us to successfully expand into a vast range of diverse environments. What has enabled us to dominate the globe, more than any other species, while remaining virtually helpless as lone individuals? This book shows that the secret of our success lies not in our innate intelligence, but in our collective brains—on the ability of human groups to socially interconnect and learn from one another over generations. Drawing insights from lost European explorers, clever chimpanzees, mobile hunter-gatherers, neuroscientific findings, ancient bones, and the human genome, Joseph Henrich demonstrates how our collective brains have propelled our species' genetic evolution and shaped our biology. Our early capacities for learning from others produced many cultural innovations, such as fire, cooking, water containers, plant knowledge, and projectile weapons, which in turn drove the expansion of our brains and altered our physiology, anatomy, and psychology in crucial ways. Later on, some collective brains generated and recombined powerful concepts, such as the lever, wheel, screw, and writing, while also creating the institutions that continue to alter our motivations and perceptions. Henrich shows how our genetics and biology are inextricably interwoven with cultural evolution, and how culture-gene interactions launched our species on an extraordinary evolutionary trajectory. Tracking clues from our ancient past to the present, *The Secret of Our Success* explores how the evolution of both our cultural and social natures produce a collective intelligence that explains both our species' immense success and the origins of human uniqueness.
