Bobbie Celler

Your Creative Mind Scott Cochrane, 2016-09-19 Too many companies limit their strategic thinking by focusing on what they already know how to do. Executives are expected to set concrete objectives and create detailed, step-by-step plans to reach them. This approach may satisfy short-term considerations like quarterly earnings reports, but it produces modest innovation and evolutionary development at best. As a result, the business can find itself in a performance plateau that it cannot seem to break out of. In *Your Creative Mind*, you will discover an entirely different approach to the creative process. You will learn: How to catapult your company out of a performance plateau and into dynamic growth, expansion, and market leadership. How to move beyond classic groupthink and unleash your true creative power. How to become a trend leader and paradigm shifter by harnessing the secrets of the power of creation. How to innovate your way into the most beneficial business relationships you can imagine. Using the practical techniques and steps described in *Your Creative Mind* will infuse your company with creative power and drive innovation. Break free of business as usual and create the dynamic growth you deserve!

Living With A Creative Mind Jeffrey Robert Crabtree, Julie Crabtree, 2011
Wired to Create Scott Barry Kaufman, Carolyn Gregoire, 2016-12-27 Is it possible to make sense of something as elusive as creativity? Based on psychologist Scott Barry Kaufman's groundbreaking research and Carolyn Gregoire's popular article in the Huffington Post, *Wired to Create* offers a glimpse inside the "messy minds" of highly creative people. Revealing the latest findings in neuroscience and psychology, along with engaging examples of artists and innovators throughout history, the book shines a light on the practices and habits of mind that promote creative thinking. Kaufman and Gregoire untangle a series of paradoxes— like mindfulness and daydreaming, seriousness and play, openness and sensitivity, and solitude and collaboration – to show that it is by embracing our own contradictions that we are able to tap into our deepest creativity. Each chapter explores one of the ten attributes and habits of highly creative people: Imaginative Play * Passion * Daydreaming * Solitude * Intuition * Openness to Experience * Mindfulness * Sensitivity * Turning Adversity into Advantage * Thinking Differently With insights from the work and lives of Pablo Picasso, Frida Kahlo, Marcel Proust, David Foster Wallace, Thomas Edison, Josephine Baker, John Lennon, Michael Jackson, musician Thom Yorke, chess champion Josh Waitzkin, video-game designer Shigeru Miyamoto, and many other creative luminaries, *Wired to Create* helps us better understand creativity – and shows us how to enrich this essential aspect of our lives.

communicative modalities, such as gesture, while at the same time expanding the traditional limits of linguistic and cognitive enquiry into creative domains such as music, literature, and visual images. Papers in this collection show how the study of language paves the way for these new areas of investigation. They bring issues of multimodal communication to the attention of linguists, while also looking through and beyond language into various domains of human creativity. This refreshed view of the relations across various communicative domains will be important not only to linguists, but also to all those interested in the creative potential of the human mind.
