Natural Language Processing in Action Hannes Hapke, Cole Howard, Hobson Lane, 2019-03-16 Summary Natural Language Processing in Action is your guide to creating machines that understand human language using the power of Python with its ecosystem of packages dedicated to NLP and AI. Purchase of the print book includes a free eBook in PDF, Kindle, and ePub formats from Manning Publications. About the Technology Recent advances in deep learning empower applications to understand text and speech with extreme accuracy. The result? Chatbots that can imitate real people, meaningful resume-to-job matches, superb predictive search, and automatically generated document summaries—all at a low cost. New techniques, along with accessible tools like Keras and TensorFlow, make professional-quality NLP easier than ever before. About the Book Natural Language Processing in Action is your guide to building machines that can read and interpret human language. In it, you'll use readily available Python packages to capture the meaning in text and react accordingly. The book expands traditional NLP approaches to include neural networks, modern deep learning algorithms, and generative techniques as you tackle real-world problems like extracting dates and names, composing text, and answering free-form questions. What's inside Some sentences in this book were written by NLP! Can you guess which ones? Working with Keras, TensorFlow, gensim, and scikit-learn Rule-based and data-based NLP Scalable pipelines About the Reader This book requires a basic understanding of deep learning and intermediate Python skills. About the Author Hobson Lane, Cole Howard, and Hannes Max Hapke are experienced NLP engineers who use these techniques in production. Table of Contents PART 1 -

Applied Physics, System Science and Computers III Klimis Ntalianis,George Vachtsevanos,Pierre Borne,Anca Croitoru,2019-06-27 This book reports on advanced theories and methods in three related fields of research: applied physics, system science and computers. The first part covers applied physics topics, such as lasers and accelerators; fluid dynamics, optics and spectroscopy, among others. It also addresses astrophysics, security, and medical and biological physics. The second part focuses on advances in computers, such as those in the area of social networks, games, internet of things, deep learning models and more. The third part is especially related to systems science, covering swarm intelligence, smart cities, complexity and more. Advances in and application of computer communication, artificial intelligence, data analysis, simulation and modeling are also addressed. The book offers a collection of contributions presented at the 3rd International Conference on Applied Physics, System Science and Computers (APSAC), held in Dubrovnik, Croatia on September 26–28, 2018. Besides presenting new methods, it is also intended to promote collaborations between different communities working on related topics at the interface between physics, computer science and engineering.

Agent and Multi-Agent Systems: Technologies and Applications Gordan Jezic,Mario Kusek,Ngoc Thanh Nguyen,Robert J. Howlett,Lakhmi C. Jain,2012-06-16 This book constitutes the refereed proceedings of the 6th KES International Conference on Agent and Multi-Agent Systems, KES-AMSTA 2012, held in Dubrovnik, Croatia, in June 2012. The conference attracted a substantial number of researchers and practitioners from all over the world who submitted their papers for ten main tracks covering the methodology and applications of agent and multi-agent systems, one workshop (TRUMAS 2012) and five special sessions on specific topics within the field. The 66 revised papers presented were carefully reviewed and selected for inclusion in the book. The papers are organized in topical sections on virtual organizations, knowledge and learning agents, intelligent workflow, cloud computing and intelligent systems, self-organization, ICT-based alternative and augmentative communication, multi-agent systems, mental and holonic models, assessment methodologies in multi-agent and other paradigms, business processing agents, Trumas 2012 (first international workshop), conversational agents and agent teams, digital economy, and

multi-agent systems in distributed environments.

#GIRLBOSS Sophia Amoruso, 2014-05-06 In the New York Times bestseller that the Washington Post called “Lean In for misfits,” Sophia Amoruso shares how she went from dumpster diving to founding one of the fastest-growing retailers in the world. Amoruso spent her teens hitchhiking, committing petty theft, and scrounging in dumpsters for leftover bagels. By age twenty-two she had dropped out of school, and was broke, directionless, and checking IDs in the lobby of an art school—a job she’d taken for the health insurance. It was in that lobby that Sophia decided to start selling vintage clothes on eBay. Flash forward to today, and she’s the founder of Nasty Gal and the founder and CEO of Girlboss. Sophia was never a typical CEO, or a typical anything, and she’s written **#GIRLBOSS** for other girls like her: outsiders (and insiders) seeking a unique path to success, even when that path is windy as all hell and lined with naysayers. **#GIRLBOSS** proves that being successful isn’t about where you went to college or how popular you were in high school. It’s about trusting your instincts and following your gut; knowing which rules to follow and which to break; when to button up and when to let your freak flag fly. “A witty and cleverly told account . . . It’s this kind of honest advice, plus the humorous ups and downs of her rise in online retail, that make the book so appealing.” —Los Angeles Times “Amoruso teaches the innovative and entrepreneurial among us to play to our strengths, learn from our mistakes, and know when to break a few of the traditional rules.” —Vanity Fair “**#GIRLBOSS** is more than a book . . . **#GIRLBOSS** is a movement.” —Lena Dunham

The Lioness in Winter Ann Burack-Weiss, 2015-10-13 When she started working with the aged more than forty years ago, Ann Burack-Weiss began storing the knowledge and skills she thought would help when she got old herself. It was not until she hit her mid-seventies that she realized she had packed sneakers to climb Mount Everest, not anticipating the crevices and chasms that constitute the rocky terrain of old age. The professional gerontological and social work literature offered little help, so she turned to the late-life works of beloved women authors who had bravely climbed the mountain and sent back news from the summit. Maya Angelou, Colette, Simone de Beauvoir, Joan Didion, Marguerite Duras, M. F. K. Fisher, Doris Lessing, Mary Oliver, Adrienne Rich, May Sarton, and Florida Scott-Maxwell were among the many guides she turned to for inspiration. In *The Lioness in Winter*, Burack-Weiss blends an analysis of key writings from these and other famed women authors with her own wisdom to create an essential companion for older women and those who care for them. She fearlessly examines issues such as living with loss, finding comfort and joy in unexpected places, and facing disability and death. This book is filled with powerful passages from women who turned their experiences of aging into art, and Burack-Weiss ties their words to her own struggles and epiphanies, framing their collective observations with key insights from social work practice.

Emerging Perspectives on the Design, Use, and Evaluation of Mobile and Handheld Devices Lumsden, Joanna, 2015-07-17 Human-computer interaction is a growing field of study in which researchers and professionals aim to understand and evaluate the impact of new technologies on human behavior. With the integration of smart phones, tablets, and other portable devices into everyday life, there is a greater need to understand the

influence of such technology on the human experience. *Emerging Perspectives on the Design, Use, and Evaluation of Mobile and Handheld Devices* is an authoritative reference source consisting of the latest scholarly research and theories from international experts and professionals on the topic of human-computer interaction with mobile devices. Featuring a comprehensive collection of chapters on critical topics in this dynamic field, this publication is an essential reference source for researchers, educators, students, and practitioners interested in the use of mobile and handheld devices and their impact on individuals and society as a whole. This publication features timely, research-based chapters pertaining to topics in the design and evaluation of smart devices including, but not limited to, app stores, category-based interfaces, gamified mobility applications, mobile interaction, mobile learning, pervasive multimodal applications, smartphone interaction, and social media use.

Language Learning Accelerator Shannon L. Kennedy, 2017-06-16 You just don't have the time you'd like to learn a language. There's school or work, your family, and other various activities you need to juggle on a daily basis. And as much as you'd like to finally learn a language, you're just too tired or too busy. You feel like you'll never be able to fit language learning into your schedule. But here's the thing... You CAN find the time to learn a new language. Not convinced? Well, it's true... And I know that for a fact because I myself have done it. Over the last few years, I learnt several languages while working a full time job, performing as a professional musician, running my blog, EuroLinguiste, and maintaining my social/family life. It took me some time to figure out how I'd fit learning into my schedule, but after some experimenting I found several strategies that worked for me. And now I'd like to share them with you to help you save time. I created Language Learning Accelerator to share the exact strategies and tools that I use to be a productive language learner. I haven't always effectively managed my time, but with the experience of learning and maintaining close to ten languages, I've picked up a lot of tactics to change that. A lot of the techniques out there didn't work for me, so I decided to try a few things on my own. And that's when everything changed. With a full-time job, a full-time career, and as a new parent, figuring out how and when to study languages is a challenge. I've made a lot of mistakes along the way, but I've finally found a system that works for me. But I don't want you to spend all that time going through the same long and frustrating process that I did, which is why I've worked hard to include all of the best practices to fit language learning in to your busy schedule. Language Learning Accelerator combines the most impactful productivity strategies with tons of language learning tips to provide you with a time management system that will help you become a more effective language learner.

Improv Patchwork Maria Shell, 2017-10-01 Explore new options in improvisational piecing and empower your creativity! Cut and combine solid-color fabrics to create your own "prints"—stripes, polka dots, chevrons, plaids, and more. Use color, pattern, and repetition to develop your personal design aesthetic as you stitch freely to create unique quilts that pack a punch!

What Happened to the Bennetts Lisa Scottoline, 2024-01-18 From #1 bestselling author Lisa Scottoline comes a

pulse-pounding new novel. Your family has been attacked. Now you have to choose between law... and justice. Jason Bennett is a suburban dad whose life takes a horrific turn. He is driving his family home when a pickup truck begins tailgating them. Suddenly two men jump from the pickup and pull guns on Jason, demanding the car. A horrific flash of violence changes his life forever. Later that awful night, Jason and his family receive a visit from the FBI. The agents tell them that the carjackers were members of a dangerous drug-trafficking organization – and now Jason and his family are in their crosshairs. The agents advise the Bennetts to enter the witness protection program. But WITSEC was not designed to protect law-abiding families. Trapped in an unfamiliar life, the Bennetts begin to fall apart at the seams. Then Jason learns a shocking truth and realizes that he has to take matters into his own hands. Sometimes justice is a one-man show.

Brain–Computer Interfaces Handbook Chang S. Nam,Anton Nijholt,Fabien Lotte,2018-01-09 Brain–Computer Interfaces Handbook: Technological and Theoretical Advances provides a tutorial and an overview of the rich and multi-faceted world of Brain–Computer Interfaces (BCIs). The authors supply readers with a contemporary presentation of fundamentals, theories, and diverse applications of BCI, creating a valuable resource for anyone involved with the

improvement of people's lives by replacing, restoring, improving, supplementing or enhancing natural output from the central nervous system. It is a useful guide for readers interested in understanding how neural bases for cognitive and sensory functions, such as seeing, hearing, and remembering, relate to real-world technologies. More precisely, this handbook details clinical, therapeutic and human-computer interfaces applications of BCI and various aspects of human cognition and behavior such as perception, affect, and action. It overviews the different methods and techniques used in acquiring and pre-processing brain signals, extracting features, and classifying users' mental states and intentions. Various theories, models, and empirical findings regarding the ways in which the human brain interfaces with external systems and environments using BCI are also explored. The handbook concludes by engaging ethical considerations, open questions, and challenges that continue to face brain-computer interface research. Features an in-depth look at the different methods and techniques used in acquiring and pre-processing brain signals, extracting features, and classifying the user's intention Covers various theories, models, and empirical findings regarding ways in which the human brain can interface with the systems or external environments Presents applications of BCI technology to understand various aspects of human cognition and behavior such as perception, affect, action, and more Includes clinical trials and individual case studies of the experimental therapeutic applications of BCI Provides human factors and human-computer interface concerns in the design, development, and evaluation of BCIs Overall, this handbook provides a synopsis of key technological and theoretical advances that are directly applicable to brain-computer interfacing technologies and can be readily understood and applied by individuals with no formal training in BCI research and development.

Socks Appeal Brenna Maloney, 2010-11-05 "Turn your favorite socks into adorable bunnies, kittens, hamsters, turtles, lions and more! Included are step-by-step photos for picture perfect results." -Crafts n' Things Stitch up a sweet and silly sock critter tonight! Sixteen projects are categorized by skill level, from super-simple to more advanced. Your dryer ate a brand-new sock? No worries-stray singles can now become the perfect gift in just an hour. Enjoy making whimsical stuffed animals using baby socks, knee socks, crew socks . . . any kinds of socks rock! Give your critter's face plenty of creative expression by embellishing with your favorite buttons and embroidery. Several projects are easy enough for children to make for their own toybox, but you'll want a bunch of these irresistible cuties for yourself, too! "Assigned to cover the recession and housing crises that was brewing in 2008, Maloney started making sock animals for her children as a stress reducer. Maloney found that the more traumatic her job got, the more creating a new sock animal each night seemed to help. Maloney's wit and candor in how she writes the instructions is hilarious." -Publishers Weekly "Her collection takes the classic idea of the sock monkey and makes it into something new using basic techniques and imagination . . . Most of the projects are

easy enough for (supervised) children, but adults who like a little whimsy won't be disappointed, either."
