The Crocodile Hunter Steve Irwin,Terri Irwin,2002-11-05 For Steve and Terri Irwin, confronting aggressive sixteen-foot gators, hissing deadly snakes, charging rhinos, venomous spiders, huge lizards, and wild reptiles in their own habitats was a part of daily life. Steve's love for animals began at an early age, when his parents created an animal refuge—instilling in him a respect for Australia's native wildlife, and some of the most dangerous creatures on Earth. Writing with his wife and soul mate, Terri Irwin, Steve provides intimate insights into their private life away from the cameras. Learn how they first met, how they successfully translated a shared love of animals into a worldwide message of conservation, and how they built one of the largest private animal refuges in Australia.

On the Hunt with Crocodiles Kristen Pope,2016 Discover how crocodiles hunt, where they call home, and how they raise their young.

Crocodiles Sandra Markle,2004 Discusses the lives of crocodiles, focusing on how they hunt their prey.

Crocodile Fever Lawrence Earl,2019-11-22 Crocodile Fever, first published in 1954, is a fascinating look at the life and adventures of Bryan Herbert Dempster. Dempster, born in South Africa, was perhaps the first white man to successfully hunt crocodiles, not for sport but to obtain their skins for his livelihood. The book details the risks and special techniques he developed by long trial-and-error to hunt these river creatures, as well as his personal struggles with his failing health, his estranged family, and impassive government officials. Much of the hunting took place in the Kariba Gorge of the Zambezi River, now completely inundated by the Kariba Dam and part of the world's largest man-made lake. Included are 16 pages of photographs. Author Lawrence Earl was an internationally known journalist, novelist, and photographer.

Alligators and Crocodiles Elaine Landau,2007-06-01 Describes how alligators and crocodiles use their hearing, smell, and sight to hunt for food at night.

Hunters and Crocodiles Bakari Kamara,Gordon Innes,1990

American Alligator Kelby Ouchley,2013-10-01 Having survived since the Mesozoic era, alligators teetered on the brink of extinction in the 1960s. Their recovery in the 1970s was largely due to legislative intervention, and today populations are closely monitored throughout their range. American Alligator is the most up-to-date and comprehensive treatment of this resilient relic, a creature with a brain weighing less than half an ounce that has successfully adapted to a changing Earth for more than 200 million years. Kelby Ouchley chronicles the evolution of *A. mississippiensis* from shieldcroc--the last common ancestor of modern-day alligators, crocodiles, caimans, and gavials--to its current role as keystone of the ecological health of America's southern swamps and marshes. In Florida, the apex predator uses its snout and feet to clear muck from holes in the limestone bedrock. During the dry season, these small ponds or alligator holes provide refuge, food, and water for a variety of wildlife. In Louisiana, millions of dollars are spent on the bounty of the non-native nutria that overgraze marsh vegetation, but alligators prey on these coastal rodents free of charge. The loss of the American alligator would be a blow to biodiversity and an ecosystem disruption affecting all levels of the food chain. While the U.S. Fish and Wildlife Service removed it from the endangered species list in 1987 and today regulates the legal trade of the animal and its products, Ouchley cautions us not to forget the lessons learned: human activities, from urban development to energy production, can still threaten the future of the gator and its southern wetland habitat.

Crocodiles John B. Thorbjarnarson,Harry Messel,F. Wayne King,James Perran Ross,1992 This Action Plan describes the conservation status of 23 species of the order Crocodylia found worldwide. The plan is arranged in three principal sections: an Introductory overview, Country accounts, and Species accounts. Each Country account describes the status of wild populations, and current management programmes. The Species accounts summarise the conservation status, principle threats, and existing management programmes and then describe the ecology and natural history of the species and set out recommended priority conservation projects.
