Sound Practice, Second Edition Lyn Layton, Karen Deeny, 2016-07-20 The second edition of Sound Practice looks afresh at how young children can be helped to discover basic facts about an alphabetic spelling system, within the context of their developing spoken language. It examines why children might fail to understand letter-sound links; the origins of severe and persistent difficulties with achieving functional literacy skills; and developmental processes underpinning the areas of learning identified in national initiatives for promoting children's learning. The book also discusses the need for differentiation strategies to respond to individual children's learning needs within national initiatives, and techniques and approaches that can be effectively applied to fulfil curriculum objectives. Phonological awareness is the key to independent literacy and must be explicitly tackled in the classroom in order to promote early reading and writing and to address written language difficulties in older children. This book is a suitable resource for initial and in-service training for teachers and teaching assistants and includes photocopiable worksheets.

Sound Field Amplification Carl C. Crandell, Joseph J. Smaldino, Carol Ann Flexer, 2005 This much-anticipated new edition of Sound Field Amplification continues its reign as the only communication sciences book devoted to sound field amplification. Both professionals and students will benefit from the presentation of the theoretical foundations of sound field amplification and its practical applications. Readers will appreciate the straightforward and comprehensive approach to topics such as how children learn to hear and how acoustics affects the learning ability of all children. The new edition continues to provide a solid foundation to understanding why the topic of sound field amplification should be included in any

discussion of what is needed to ensure success in children's learning. The book also provides the information necessary to conduct sound surveys, obtain funding for amplification systems, and act within the parameters of the laws and regulations governing this topic.
