Stones of the New Consciousness Robert Simmons, 2021-01-12 • Details the spiritual, healing, and energetic qualities of stones such as Moldavite, Nuummite, Circle Stones, Nirvana Quartz from the Himalayas, and high-vibrational Natrolite from the emerald mines of Russia • Features color photos of exceptional examples of each of the stones • Includes practices for deepening one's awareness of the stones' gifts--from expanding consciousness, to healing, to awakening the Light Body, to fulfilling one's personal and collective destiny In Stones of the New Consciousness Robert Simmons examines the 62 most important stones to help accelerate and enhance conscious evolution and spiritual awakening. Each entry is illustrated with color photos of exceptional examples. The stones include Moldavite, the extraterrestrial amorphous crystal; Nuummite, the oldest gemstone on Earth; and Circle Stones, the highly energetic Flint found in crop circle formations. Other featured rarities include Nirvana Quartz from the Himalayas and high-vibrational Natrolite from the emerald mines of Russia. Simmons begins with a new approach to meditation with stones and to the possibility of conscious relationship with the spiritual beings who express themselves in our world as crystals and minerals. He includes historical and mythological references for each stone, positing that the fabled Stone of the Holy Grail and the Philosopher's Stone of the alchemists may have physical counterparts among the minerals discussed. Simmons presents practices for deepening one's awareness of the stones' gifts--from expanding one's consciousness, to healing, to awakening the Light Body, to fulfilling one's personal and collective destiny. While emphasizing direct contact with stones, the book also explores crystal energy tools, energy environments, and applications such as stone elixirs and essences that can aid anyone on a spiritual path.

**Atlantis** Arysio Santos,2011-03-01 The late author Arysio Santos was a highly regarded climatologist, geologist, and nuclear physicist. He was also a scholar of history, folklore, languages, and the occult. In this groundbreaking study of Atlantis, he draws on all these disciplines, as well as ancient maps, Plato's dialogues, and folkloric narratives, to provide the most compelling case yet of the disappearance of an entire civilization. Professor Santos demonstrates that Plato's dating of Atlantis's disappearance in 11,600 BP (before present) precisely corresponds to the catastrophic end of the Pleistocene Ice Age, as well as a historic flood event of cataclysmic proportions. The rising of the sea level by nearly 500 feet, he argues, submerged continent-sized lands—including Atlantis, which he connects with the biblical Garden of Eden. Provocative chapters cover such topics as the continent's appearance in ancient maps, Indonesia as the true site of Eden, American interpretations of Atlantis, the four rivers of paradise, and more, giving a clear form to the ghostly outline of this fabled land.

*Ancient Mysteries* Peter James, Nick Thorpe, 2007-12-18 What was the Minotaur? Did a Welsh prince discover America? Did Robin Hood really exist? How does the Star of Bethlehem fit into the science of astronomy? Is the Vinland Map a fake? Can archaeologists use spirit messages to guide their work? For centuries, philosophers, scientists, and charlatans have attempted to decipher the baffling mysteries of our past, from the Stonehenge to the lost continent of Atlantis. Today, however, DNA testing, radiocarbon dating, and other cutting-edge investigative tools, together with a healthy dose of common sense, are guiding us closer to the truth. Peter James and Nick Thorpe, the professional historian and archaeologist team who created the acclaimed *Ancient Inventions*, now tackle these age-old conundrums, presenting the latest information from the scientific community--and the most startling challenges to traditional explanations of mysteries such as: - The rise and fall of the Maya - A lost cache of Dead Sea Scrolls - The curse of Tutankhamun - The devastation of Sodom and Gomorrah - The Nazca Lines These true mystery stories twist and turn like a good whodunit, as James and Thorpe present the evidence for and against the expert theories, shedding new light on humankind's age-old struggle to make sense of the past. The authors also make dramatic contributions of their own to the fray, demonstrating persuasively that catastrophic events--

including the collisions of comets with the Earth long ago--could explain puzzles that have baffled experts for centuries. Ancient Mysteries will entertain and enlighten, delight the curious and inform the serious.

**Science-fiction** Everett Franklin Bleiler, Richard Bleiler, 1998 Complementing Science-Fiction: The Early Years, which surveys science-fiction published in book form from its beginnings through 1930, the present volume covers all the science-fiction printed in the genre magazines--Amazing, Astounding, and Wonder, along with offshoots and minor magazines--from 1926 through 1936. This is the first time this historically important literary phenomenon, which stands behind the enormous modern development of science-fiction, has been studied thoroughly and accurately. The heart of the book is a series of descriptions of all 1,835 stories published during this period, plus bibliographic information. Supplementing this are many useful features: detailed histories of each of the magazines, an issue by issue roster of contents, a technical analysis of the art work, brief authors' biographies, poetry and letter indexes, a theme and motif index of approximately 30,000 entries, and general indexes. Science-Fiction: The Gernsback Years is not only indispensable for reference librarians, collectors, readers, and scholars interested in science-fiction, it is also of importance to the study of popular culture during the Great Depression in the United States. Most of its data, which are largely based on rare and almost unobtainable sources, are not available elsewhere.
